Index

Note: Page numbers of article titles are in boldface type.

A

Abdomen
acute. See Acute abdomen.
  examination of
  in emergency patients, 299–300
  neuroanatomy of, 375–376

Abdominal fluid
  in acute abdomen, 385–387
  biochemical analysis and culture of, 388–390
  cytologic analysis of, 387–388

Abdominal pain
  perception of, 375–376

Acepromazine
  for trauma patients, 487

Acute abdomen
  abdominal fluid accumulations in detection and retrieval of, 385–387
  approach to, 375–396
  biochemical abdominal fluid analysis and culture for, 388–390
  causes of, 379, 380–383
  clinical signs of, 376–379
  cytologic abdominal fluid analysis for, 387–388
  defined, 299
  diagnosis of, 385
  history of, 376–379
  imaging of, 390–394
  initial stabilization of, 379, 383–385
  management of, 379, 383–385
  physical examination of, 376–379
  surgical evaluation of, 394–395
  trauma-associated causes of, 379, 384

Acute renal failure, 366–371
  clinical signs of, 368
  described, 366–367
  pathophysiology of, 367–368
  treatment of, 368–371
  new directions in, 371

Aggression
  analgesia and chemical restraint for, 484–489

\( \alpha \)-Agonist(s)
  for trauma patients, 486

Airway(s)
  assessment of
  in emergency patients, 287
  lower respiratory distress of, 312–313
  upper respiratory distress of, 310–312

Airway obstruction
  upper analgesia and chemical restraint for, 491–492

Analgesia/analgesics
  for infants, 506–507
  for neonates, 506–507
  for nursing mothers, 505–506
  for pediatric patients, 506–507
  for pregnant dogs and cats, 510
  for weanlings, 506–507
  in emergency patients, 481–515
  adjuvant drugs, 510–512
  for aggression, 484–489
  for arrhythmias, 500–501
  for cardiovascular compromise, 494–498
  for chest trauma, 493
  for dehydration, 500
  for diaphragmatic hernia, 493
  for dilation volvulus, 501–503
  for gastric volvulus, 501–503
  for gastrointestinal pain, 501
  for intravenous catheter placement, 504
  for lower respiratory injury, 492–493
  for neurologic compromise, 489
  for pancreatitis, 503–504
  for peritonitis, 503–504
  for respiratory compromise, 489–491
Analgesia/analgesics (continued)
for shock, 498–500
for upper airway obstruction, 491–492
for urinary catheter placement, 504
for visceral pain, 501
in intra-arterial catheter placement, 504
NSAIDs, 510
nursing care–related, 512

Anesthesia/anesthetics
for emergencies, 435–453
anticholinergics, 441
case studies, 444–451
etomidate, 440
general anesthesia, 436–441
in monitoring, 442–444
in pain management, 441–442
ketamine, 440
propofol, 438–439
sedation, 436
thiopental, 439–440

Anterior uveitis, 456–458
prognosis of, 458
treatment of, 458

Anticholinergic(s)
for emergencies, 441

Anti-inflammatory drugs
nonsteroidal (NSAIDs)
in emergency patients, 510

Arrhythmia(s)
analgesia and chemical restraint for, 500–501

Arterial blood pressure
monitoring of
for perfusion abnormalities in emergency patients, 325–326

Body temperature
in assessment of emergency patients, 290

Brain stem examination of
in emergency patients, 304

Breath sounds examination of
in emergency patients, 293–296

Breathing examination of
in emergency patients, 287, 293–296

Butorphanol
for trauma patients, 486, 487

C

Capillary refill time
in assessment of emergency patients, 289

Cardiogenic shock
in emergency patients, 336

Cardiopulmonary cerebral resuscitation
in young animals, 430–431

Cardiovascular compromise
analgesia and chemical restraint for, 494–498

Cardiovascular system examination of
in emergency patients, 297–299

Cat(s)
pregnant
analgesia for, 510

Catheter placement
intra-arterial
analgesia and chemical restraint for, 504
intravenous
analgesia and chemical restraint for, 504
urinary
analgesia and chemical restraint for, 504

Catheterization
in pediatric emergencies, 421–422

Central nervous system (CNS)
abnormalities of
in emergency patients, 343–358
cerebral blood volume optimization for, 351–352

B

Bleeding
active
in assessment of emergency patients, 292
in assessment of emergency patients, 292

Blindness
sudden, 476

Blood pressure
arterial
monitoring of
for perfusion abnormalities in emergency patients, 325–326
cerebral edema reduction in, 350–351
for gastrointestinal pain, 501
for intra-arterial catheter placement, 504
for intravenous catheter placement, 504
for lower respiratory injury, 492–493
for neurologic compromise, 489
for pancreatitis, 503–504
for peritonitis, 503–504
for respiratory compromise, 489–491
for shock, 498–500
for upper airway obstruction, 491–492
for urinary catheter placement, 504
for visceral pain, 501

Chest trauma
analgesia and chemical restraint for, 493

Cimetidine
in emergency situations, 521

Circulation
in assessment of emergency patients, 287

CNS. See Central nervous system (CNS).

Conjunctival grafts, 474

Conjunctivitis, 475–476

Cornea
foreign bodies in, 474–475

Corneal laceration, 473

Corneal perforation, 471–472

Corneal ulcers, 465–471
causes of, 466
clinical signs of, 466–467
corneal laceration, 473
deep, 470
prognosis of, 469
superficial, 469
treatment of, 468–469

D

Dehydration
analgesia and chemical restraint for, 500
in young animals, 426–428

Descemetocele, 471

Diaphragmatic hernia
analgesia and chemical restraint for, 493
Diazepam
for trauma patients, 486, 487

Dilation volvulus
analgesia and chemical restraint for, 501–503

Disability(ies)
in assessment of emergency patients, 288

Distributive shock
in emergency patients, 334–336

Dog(s)
pregnant
analgesia for, 510

Drug therapy
emergency, 521–522
practical considerations in, 517–525. See also Emergency drug therapy.
for trauma patients, 486–487

Dystocia, 399–406
causes of, 400–401
criteria for suspicion of, 402
defined, 399
evaluation of, 402–403
management of, 403–406
prevalence of, 401
risk factors for, 401–402

E
Eclampsia, 411–412

Edema
cerebral
reduction of
for CNS abnormalities in emergency patients, 350–351

Emergency(ies)
analgesia for, 481–515. See also Analgesialanalgesics, in emergency patients.
anesthesia for, 435–453. See also Anesthesialanesthetics, for emergencies.
chemical restraint for, 481–515. See also Chemical restraint, in emergency patients.
CNS abnormalities after, 343–358. See also Central nervous system (CNS), abnormalities of, in emergency patients.
drugs for, 481–515
in young animals, 421–434. See also Pediatric emergencies.
NSAIDs in, 510

opioids in, 509–510
perfusion-related, 319–342. See also Perfusion abnormalities, in emergency patients.
reproductive, 397–420. See also Reproductive emergencies.
sedatives in, 507–509
urinary tract, 359–373. See also Urinary tract emergencies.

Emergency drug therapy
drug dosages in, 519–520
drugs used in, 521–522
guidelines for, 520
monitoring during, 523–524
patient factors in, 522–523
practical considerations in, 517–525
resources for, 524
routes of administration of, 517–519

Emergency patients
global assessment of, 281–305
abdomen, 299–300
airway, 287
brain stem, 304
breath sounds, 293–296
breathing, 287, 293–296
capillary refill time, 289
cardiovascular system, 297–299
circulation, 287
clarity during, 282
comprehensive assessment in, 284–286
critical thinking in, 282
database in, 282
decision making in, 282
disabilities, 288
disability team in, 281–282
gait, 304
genitourinary system, 300–301
head and neck, 292–293, 303–304
hydration state, 290–291
initial assessment in, 283–284
integument, 301–302
lymph nodes, 302
mental state, 288–289, 303
mucous membrane color, 289, 296
musculoskeletal system, 301
neurologic system, 302–304
pain, 291–292
palpation in, 296–297
percussion in, 297
physical examination in, 286–305
postural response, 304
problem-oriented medical record in, 286
pulse quality in, 290
pulse rate in, 290
pupils, 304
Endometritis, 410–411

Enrofloxacin
for ophthalmic emergencies, 479

Etomidate
for emergencies, 440

F
Fentanyl
for trauma patients, 486

Fetal monitoring, 406–407

Fluid(s)
abdominal
in acute abdomen, 385–387
biochemical analysis and culture of, 388–390
cytologic analysis of, 387–388
in emergencies, 521
pediatric, 423

Foreign bodies
corneal, 474–475

G
Gabapentin
in emergency patients, 511–512

Gait
examination of
in emergency patients, 304

Gas exchange, 307–308

Gastric volvulus
analgesia and chemical restraint for, 501–503

Gastrointestinal pain
analgesia and chemical restraint for, 501

General anesthesia
defined, 437
for emergencies, 436–441

Genitourinary system
examination of
in emergency patients, 300–301

Glaucoma, 458–461
causes of, 458
prognosis of, 461
secondary
causes of, 458
treatment of, 459–461

Graft(s)
conjunctival, 474

H
H blockers
in emergency situations, 521

Head
examination of
in emergency patients,
292–293, 303–304

Head trauma
in young animals, 431–432

Hemodynamic monitoring
for perfusion abnormalities in emergency patients, 325, 327

Hemorrhage
as reproductive emergency, 407
in emergency patients, 332–334

Hernia(s)
diaphragmatic
analgesia and chemical restraint for, 493

Hydration state
in assessment of emergency patients, 290–291

Hydromorphone
for trauma patients, 486, 487

Hyphema
causes of, 465
prognosis of, 465
treatment of, 464–465

Hypoglycemia
in young animals, 426

Hypoperfusion
classification of, 320
consequences of, 320–321
in emergency patients
treatment of, 331
local
assessment of
in emergency patients,
330–331

Hypovolemia
in emergency patients
treatment of, 331–332
in young animals, 426–428
Hypovolemic shock
nonhemorrhagic
in emergency patients, 334

Hypoxemia
causes of, 308–309

I
Infant(s)
analgesia for, 506–507

Integument
examination of
in emergency patients, 301–302

Intra-arterial catheter placement
analgesia and chemical restraint for,
504

Intravenous catheter placement
analgesia and chemical restraint for,
504

K
Ketamine
for trauma patients, 487
in emergency patients, 440, 511

L
Laceration(s)
corneal, 473

Lactate
measurement of
for perfusion abnormalities in
emergency patients, 327–329

Lidocaine
in emergency patients, 511

Lower respiratory injury
analgesia and chemical restraint for,
492–493

Lung(s)
diseases affecting, 313–315

Lymph nodes
examination of
in emergency patients, 302

M
Mastitis, 409–410

Medetomidine
for trauma patients, 486, 487

Mental state
examination of

in emergency patients, 288–289,
303

Meperidine
for trauma patients, 486

Midazolam
for trauma patients, 486, 487

Mucous membrane
color of
in assessment of emergency
patients, 289, 296

Musculoskeletal system
examination of
in emergency patients, 301

N
Neck
examination of
in emergency patients, 292–293,
303–304

Neonatal resuscitation, 406

Neonate(s)
algesia for, 506–507
respiratory distress of, 429–430

Neuritis
optic, 478–479

Neurologic compromise
analgesia and chemical restraint for,
489

Neurologic system
examination of
in emergency patients, 302–304

Newborn(s). See Neonate(s).

Nonhemorrhagic hypovolemic shock
in emergency patients, 334

NSAIDs. See Anti-inflammatory drugs,
nonsteroidal (NSAIDs).

Nursing care
analgesia in, 512

Nursing mothers
analgesia for, 505–506

O
Ophthalmic emergencies, 455–480. See also
specific disorders, e.g., Anterior uveitis.

anterior uveitis, 456–458
blindness
sudden, 476
conjunctival grafts for, 474
conjunctivitis, 475–476
corneal foreign bodies, 474–475
INDEX

533

corneal laceration, 473
corneal perforation, 471–472
corneal ulcers, 465–471
descemetocoele, 471
enrofloxacin for, 479
glaucoma, 458–461
hyphema, 464–465
optic neuritis, 478–479
retinal separation, 476–478
SARDS, 478
traumatic proptosis, 462–464

Opioid(s)
for trauma patients, 486, 487
in emergency patients, 509–510

Optic neuritis, 478–479

Oxygen therapy
for respiratory distress, 309–310

Oxygenation
systemic parameters of
in emergency patients, 329–330

Oxymorphone
for trauma patients, 486

P

Pain
abdominal
perception of, 375–376
gastrointestinal
analgesia and chemical restraint
for, 501
in assessment of emergency patients,
291–292
level of
in emergency conditions, 481–484
management of
anesthesia/anesthetics in,
441–442
visceral
analgesia and chemical restraint
for, 501

Pancreatitis
analgesia and chemical restraint for,
503–504

Parturition
normal, 397–399

Pediatric emergencies, 421–434
cardiopulmonary cerebral
resuscitation, 430–431
catheterization in, 421–422
defined, 421
dehydration, 426–428
fluid requirements in, 423
head trauma, 431–432
hypoglycemia, 426
hypovolemia, 426–428
imaging in, 424–426
initial examination in, 421–422
laboratory values in, 423–424
pharmacology in, 424–426
respiratory distress of the newborn,
429–430
sepsis, 428–429

Pediatric patients
analgesia for, 506–507

Perforation(s)
corneal, 471–472

Perfusion
clinical assessment of
in emergency patients, 321–324
defined, 319

Perfusion abnormalities
in emergency patients, 319–342
arterial blood pressure
monitoring for, 325–326
cardiogenic shock, 336
central venous pressure
monitoring for, 326–327
distributive shock, 334–336
hemodynamic monitoring of,
325, 327
hemorrhage, 332–334
hypoperfusion
classification of, 320
consequences of, 320–321
treatment of, 331
hypovolemia
treatment of, 331–332
lactate measurement for, 327–329
local hypoperfusion assessment
for, 330–331
nonhemorrhagic hypovolemic
shock, 334
systemic oxygenation
parameters, 329–330

Peritonitis
analgesia and chemical restraint for,
503–504

Pleural space
diseases of, 315–316

Postural response
examination of
in emergency patients, 304

Pregnancy
in dogs and cats
analgesia during, 510

Problem-oriented medical record
in global assessment of emergency
patients, 286
Prolapse
uterine
as reproductive emergency, 408–409

Propofol
for emergencies, 438–439

Proptosis
traumatic, 462–464
enucleation of, 464
long-term complications of, 463–464
prognosis of, 464
surgical procedure for, 462–463

Pulse quality
in assessment of emergency patients, 290

Pulse rate
in assessment of emergency patients, 290

Pupil(s)
examination of
in emergency patients, 304

Pyometra, 412–417

Ranitidine
in emergency situations, 521

Renal failure
acute, 366–371. See also Acute renal failure.

Reproductive emergencies, 397–420
dystocia, 399–406
eclampsia, 411–412
endometritis, 410–411
fetal monitoring, 406–407
hemorrhage, 407
mastitis, 409–410
neonatal resuscitation, 406
pyometra, 412–417
uterine monitoring, 406–407
uterine prolapse, 408–409
uterine torsion, 409

Respiratory compromise
analgesia and chemical restraint for, 489–491

Respiratory distress
approach to patient with, 307–317
assessment of, 310
diseases affecting lungs, 313–315
diseases of pleural space, 315–316
gas exchange and, 307–308
of lower airway, 312–313
of upper airway, 310–312
oxygen therapy for, 309–310

Respiratory distress of the newborn, 429–430

Respiratory system
examination of
in emergency patients, 293–297
lower
injury of analgesia and chemical restraint for, 492–493

Restraint
chemical
in emergency patients, 481–515.
See also Chemical restraint, in emergency patients.

Resuscitation
cardiopulmonary cerebral
in young animals, 430–431
neonatal, 406

Retinal separation, 476–478

S
SARDS. See Sudden acquired retinal degeneration syndrome (SARDS).

Sedation
defined, 436
for emergencies, 436, 507–509

Sedative(s)
for trauma patients, 486
in emergency patients, 436, 507–509

Seizure(s)
in emergency patients, 304–305

Sepsis
in young animals, 428–429

Shock
analgesia and chemical restraint for, 498–500
cardiogenic
in emergency patients, 336
distributive
in emergency patients, 334–336
hypovolemic
nonhemorrhagic
in emergency patients, 334
in assessment of emergency patients, 288–289

Space-occupying masses
elimination of
in emergency patients, 352

Spine
examination of
in emergency patients, 304
Stromal ulcers
infected, 470–471

Sudden acquired retinal degeneration
syndrome (SARDS), 478

Sudden blindness, 476

T
Temperature
in assessment of emergency patients, 290

Thiopental
for emergencies, 439–440

Torsion
uterine
as reproductive emergency, 409

Trauma
acute abdomen in
causes of, 379, 384
chest
analgesia and chemical restraint
for, 493
head
in young animals, 431–432

Traumatic proptosis, 462–464

Tremor(s)
in emergency patients, 304–305

U
Ulcer(s)
corneal, 465–471. See also Corneal ulcers.
stromal
infected, 470–471

Upper airway obstruction
analgesia and chemical restraint for, 491–492

Urethral obstructions, 359–364
clinical signs of, 361
described, 359–361
initial database for, 361
treatment of, 361–364
goal of, 361

Urinary catheter placement
analgesia and chemical restraint for, 504

Urinary tract emergencies, 359–373. See also specific type, e.g., Urethral obstructions.
acute renal failure, 366–371
urethral obstructions, 359–364
uroperitoneum, 364–366

Uroperitoneum, 364–366
described, 364–365
laboratory parameters in, 365–366
physical examination of, 365–366
treatment of, 366

Uterine monitoring, 406–407

Uterine prolapse
as reproductive emergency, 408–409

Uterine torsion
as reproductive emergency, 409

Uveitis
anterior, 456–458. See also Anterior uveitis.
causes of, 457

V
Visceral pain
analgesia and chemical restraint for, 501

Volvulus
dilation
analgesia and chemical restraint
for, 501–503
gastric
analgesia and chemical restraint
for, 501–503

W
Weanling(s)
algesia for, 506–507

Y
Young animals
emergencies in, 421–434. See also Pediatric emergencies.
