INDEX

Note: Page numbers of article titles are in **boldface** type.

Abdomen, acute, management of, 912–914
Acetaminophen, 797, 936
Acupuncture, description of, 876
  for management of pain, 875–884
  incorporation into pain management, 880
  physiology of, 877
  specific points for, locations of, 881–884
  and techniques of, 877–880
  traditional Chinese medical basis of, 876–877
  S-Adenosyl-L-methionine, in osteoarthritis, 942
Adequan, in osteoarthritis, 943–944
Aggression, management of, during diagnostic and emergency procedures, 885–887
Airway, upper, obstruction of, management of, during diagnostic and emergency procedures, 889
Alpha-2 agonists, 896
Analgesia, and chemical restraint, for diagnostic and emergency procedures, 885–898
Analgesic agents, 721–723, 741–745
  for initial management of acute pain, 738
  in cancer pain, 962
  opioid. See Opioid analgesics.
Analgesic therapy, adjunctive, 805–813
  alternative drugs and techniques in, 807–811
  nonpharmacologic approaches to, 810–811
  novel drugs and routes of administration in, 809–810
Anesthesia, epidural. See Epidural analgesia, and anesthesia.
  induction of, drugs for, 920
  local and regional, 839–857
  techniques in cats, 851–855
  techniques in dogs, 845–850
  techniques of, 844–845
  maintenance of, analgesic techniques for, 920–922
  recovery from, analgesia during, 922–924
  first 24 hours following, 924–925
Anesthetics, local, absorption and metabolism of, 840–841
  adverse effects of, 841–842
  clinical pharmacology of, 839–844
  epidural and intrathecal opioids with, 767–768
  for epidural analgesia and anesthesia, 863–865
  in acute pain, 901
  mechanism of action of, 840
Anti-inflammatory drugs, nonsteroidal, 783–804
  adverse effects of, 818–823
  and opioid analgesics, pharmacologic considerations for, 815–837
  clinical effectiveness of, 776–777
  complications caused by physiologic conditions or disease and, 823–824
  contraindications to use of, 788–789
  dosing regimen for, 792–793
  for perioperative pain, 926
  for veterinary patients, 790–796
  in acute pain, 901
  in cancer pain, 956
  in osteoarthritis, 938
  in pain management, indications for, 787–788
  licensed for veterinary use, 778
  mechanism of action of, 773–781, 784, 816
  not approved for veterinary use, 796–797
  of future, 790
  pharmacokinetic characteristics of, 817–818
  topically applied, 789–790
Anxiety, management of, during diagnostic and emergency procedures, 887–888
Arrhythmias, management of, during diagnostic and emergency procedures, 893
Ascorbate, in osteoarthritis, 942–943
Aspirin, 797, 936
Atropine, 897
Behaviors, concerns associated with, during diagnostic and emergency procedures, 885–887
of cats and dogs, associated with pain, 732–733, 954
Biopsy, abdominal, for diagnostic and emergency procedures, 895–896
Bladder, support of, in acute pain, 907–908
Bone pain, in cancer, management of, 963
Bupivacaine, 843
Buprenorphine, 762–763
Butorphanol, 761–762, 904–905
Cancer, pain of, assessment of, 953–954
causes and types of, 952–953
epidural analgesia in, 959
management of, 951–966
alternative therapies in, 963
barriers to, 952
drugs used in, 956–957, 962
reasons for, 951–952
treatment strategies for, 957–959, 960–961
Cardiac disease(s), management of, during diagnostic and emergency procedures, 893
Cardiovascular compromise, management of, during diagnostic and emergency procedures, 891–893
Cardiovascular system, support of, in acute pain, 904–905
Carprofen, 793–794, 816, 818, 821, 822–823, 935, 936
Cartrofen Vet, in osteoarthritis, 944
Catheters, placement of, skin desensitization for, 896
Cats, local and regional anesthesia in, techniques of, 845–850
Cerebrospinal fluid, collection of, for diagnostic and emergency procedures, 888
Chemical restraint, and analgesia, for diagnostic and emergency procedures, 885–889
Chest trauma, management of, during diagnostic and emergency procedures, 890–891
Chondroitin sulfate, in osteoarthritis, 940–942
Constipation, in cats, management of, restraint for, 895
Corticosteroids, in osteoarthritis, 938–939
Cosequin, in osteoarthritis, 940–942
Cyclo-oxygenase, nonsteroidal anti-inflammatory drugs and, 774–780
Cyclo-oxygenase-2 inhibitors, 816–817
Dehydration, management of, during diagnostic and emergency procedures, 892–893
Diagnostic and emergency procedures, chemical restraint and analgesia for, 885–898
Diaphragmatic hernia, management of, during diagnostic and emergency procedures, 890
Dipyrone, 796
Dogs, local and regional anesthesia in, techniques of, 845–850
Dorsal horn, neurochemistry of, 708
Eicosanoids, 773
Endoscopy, for diagnostic and emergency procedures, 894–895
Epidural analgesia, and anesthesia, 859–874
combinations of local anesthetics and opioids for, 870–871
contraindications to, 860
drugs and drug combinations for, 863–865
drugs used for, 871
indications for, 859–860
local anesthetics for, 863–865
opioids for, 865–870
technique of, 860–863
in cancer pain, 959
Etidocaine, 843
Etidolac, 795, 818, 936–937
Exercise, and physical rehabilitation, in osteoarthritis, 944
Famotidine, 800
Fentanyl, 761, 765–766, 958
Flunixin meglumine, 795
Foreign body, esophageal, management of, during diagnostic and emergency procedures, 894
Hemorrhage, management of, 885–887
Hydration, management of, during diagnostic and emergency procedures, 892–893
Intubation, chemical restraint and, 885–898
IV catheters, chemical restraint and, 885–898
Lidocaine, 843
Malignancy, primary or metastatic, management of, 960–961
Medication(s).
INDEX

Gastric-dilation volvulus, management of, during diagnostic and emergency procedures, 894
Gastrointestinal compromise, management of, during diagnostic and emergency procedures, 894–895
Glucosamine, in osteoarthritis, 940, 941
Gut, support of, in acute pain, 907–908

Halothane, 896–897
Hyaluronic acid, in osteoarthritis, 944
Hydromorphone, 761

Ibuprofen, 937
Illness, levels of pain associated with, 735–736
Injuries, and pain, systemic responses to, 719–720
levels of pain associated with, 735–736
Intra-articular analgesia, 850

Ketamine, 806–807
Ketoprofen, 794–795, 937
Ketorolac, 796–797

Lidocaine, 842

Manganese, in osteoarthritis, 942–943
Meclofenemic acid, 937
Medetomidine, 806
Medication(s), for treatment of acute pain, 900–902
pain, reasons for withholding, 731–732
use of, 730–731
Meloxicam, 792–793, 818, 935, 937
Meperidine, 760, 904
Mepivacaine, 843
Methadone, 761
Methohexital, 896
Misoprostol, 798
Modulatory pathways, descending, 710–711
Morphine, 759–760
Motor function, support of, in acute pain, 906–907
Muscle failure, respiratory, management of, during diagnostic and emergency procedures, 889–890

Nalbuphine, 762
Nalmefene, 764
Naloxone, 763
Naproxen, 937–938
Nerve fibers, afferent, 707
Nervous system, central, sensitization of, 715–717
peripheral, sensitization of, 714–715
plasticity of, 714–717
Neural blockade, peripheral, in cats, 851–855
in dogs, 845–850
Neurologic compromise, management of, during diagnostic and emergency procedures, 888
Neurons, dorsal horn, 707–708
Neurosurgery, 959
Nociceptors, peripheral, 705–706
NSAIDS. See Anti-inflammatory drugs, nonsteroidal.
Nutrition, in osteoarthritis, 945

Obstipation, management of, restraint for, 895
Omeprazole, 800
Opiate receptors, 757
Opioid agonists, kappa, 761–763
mu, 759–761
Opioid analgesics, 757–772
advantages of, 824–825
adverse effects of, 827–830
discovery of, 865
drug interactions with, 831–831
epidural and intrathcal, with local anesthetics, 768–769
epidural or intrathcal administration of, 767–768
for cancer pain, 956–957, 958
for epidural analgesia and anesthesia, 865–870
for maintenance of anesthesia, 921–922
for perioperative pain, 926
doses of, 758
in acute pain, 901
local administration of, 766–767
oral administration of, 764
pharmacokinetics of, 826–827
pharmacologic effects of, 825–826
rectal administration of, 764–765
systemic injection of, 758–764
transdermal administration of, 765–766
Opioid antagonists, mu, 761–763
Osteoarthritis, anti-inflammatory and analgesic medications in, 935–939
chronic pain of, management of, 933–949
clinical characteristics of, 933–934
diagnosis of, 934
disease-modifying agents in, injectable, 943
oral, 939–943
INDEX

Osteoarthritis (Continued)
exercise and physical rehabilitation in, 944
nutrition in, 945
treatment of, 934–935
Oxymorphone, 760

Pain, acute, common causes of, treatment of, 908–914
in cats and dogs, analgesics for initial management of, 738
management of, 745–748, 899–916
pharmacologic treatment of, 900–902
surgical, treatment of, 909–910, 911–912
traumatic, treatment of, 908–911
and injury, systemic responses to, 719–720
assessment of, 732–741
and general approach to management of, 729–755
general considerations in, 734–738
in animals, key points in, 734
methods of, clinical use of, 740
chronic, management of, 748, 749
in cats and dogs, behaviors associated with, 732–733, 954
levels of, associated with surgical procedures, illness, or injuries, 735–736
management of, 703–966
general approach to, 741–749
implications for, 720–723
importance of, 875–876
in veterinary medicine, current status of, 730–732
recommendations for improving, 748
neuromatrix theory of, 718–719
neuropathic, 718
nociceptive processing of, 704–711
ongoing, analgesics for various levels of, 744–745
pathologic, 711–713
acute, 712–713
chronic, 713
perioperative, management of, 917–932
in geriatric patients, 927–928
in pediatric patients, 925–927
in pregnant and lactating patients, 928–929
premedication to provide analgesia for, 919–920
physiologic, 704
physiology of, 703–728
visceral, 717–718
Pain evaluation scale(s), 955
descriptive, 733–755
Pain scoring systems, 739–741
Pancreatitis, pain of, management of, 912–914
Pantoprazole, 800
Pentazocine, 762
Peritonitis, pain of, management of, 912–914
Phenylbutazone, 938
Physical rehabilitation, exercise and, in osteoarthritis, 944
Piroxicam, 797, 938
Premedication, for analgesia for perioperative pain, 919–920
Procaine, 842
Radiation, palliative, 959–963
Ranitidine hydrogen chloride, 798–800
Respiratory compromise, management of, during diagnostic and emergency procedures, 889–891
Respiratory disease, lower, management of, during diagnostic and emergency procedures, 890
Respiratory system, support of, in acute pain, 905–906
Restraint, chemical, and analgesia, for acute pain, 902–904
Sucralfate, 798
Supraspinal centers, 709–710
Surgery, levels of pain associated with, 735–736
Thalamocortical neurochemistry, 710
Tolmetin, 795–796
Ulcer, prophylaxis and treatment of, 798–800
Ultrasound, abdominal, for diagnostic and emergency procedures, 895–896
