Index

Note: Page numbers of article titles are in boldface type.

A

AAFCO. See Association of American Feed Control Officials (AAFCO)

Abamectin
  toxicology of
    in dogs and cats
      exposure sources, formulations, and therapeutic and toxic dosages, 318–319

Acepromazine
  as reversal agent in small animal poisoning, 406

Acetaminophen
  in animal poisoning cases, 223

N-Acetylcysteine
  as reversal agent in small animal poisoning, 403

Acute renal failure (ARF)
  toxicologic vs. nontoxicologic, 392–393

ADD/ADHD. See Attention-deficit disorder/attention-deficit/hyperactivity disorder (ADD/ADHD)

S-Adenosyl-L-methionine
  as reversal agent in small animal poisoning, 405

Adulteration
  pet food contamination due to, 245–247

Aflatoxin
  toxicology of
    in pet foods, 239–242

Aluminum
  toxicology of
    in small animals, 367

4-Aminopyridine
  in treating calcium channel blocker toxicity in dogs and cats, 274

Ammonium nitrate and fuel oil (ANFO)
  toxicology of
    in small animals, 366

Amphetamine salts
  in dogs and cats
    metabolism of, 281
    pharmacokinetics of, 281
    toxicity of
      clinical signs of, 281
      diagnosis of, 281
      mechanisms of, 280–281
      patient monitoring, 284
      prognosis, 284
      treatment of, 282–284
    veterinary uses of, 280
Anemia
  Heinz body
toxicologic vs. nontoxicologic, 395
ANFO. See Ammonium nitrate and fuel oil (ANFO)
Animal Poison Control Center (APCC)
  of ASPCA. See ASPCA Animal Poison Control Center (APCC)
Animal poisoning cases
  in U.S.: 2002–2010
    overview of trends in, 219–228
    locations of, 219–221
    seasonality of, 219–221
    therapy-related, 226–227
    toxicants involved in, 222–226. See also specific toxic agents
types of animals involved in, 221–222
Anti-inflammatory drugs
  nonsteroidal. See Nonsteroidal anti-inflammatory drugs (NSAIDs)
Anticoagulant rodenticides
toxicology of
  in small animals, 349–352
  clinical signs of, 350–351
  described, 349–350
  diagnosis of, 351
  pathophysiology of, 350
  treatment of, 351–352
APCC. See ASPCA Animal Poison Control Center (APCC)
ARF. See Acute renal failure (ARF)
ASPCA Animal Poison Control Center (APCC)
  on amphetamine salt–related toxicity in dogs and cats, 282
  on atomoxetine-related toxicity in dogs and cats, 287
described, 219
Aspirin
  overdose of
    in dogs and cats, 296–297
Association of American Feed Control Officials (AAFCO)
  on safety of commercial pet foods, 233–234
Atipamezole
  as reversal agent in small animal poisoning, 404
Atomoxetine
  in dogs and cats
    mechanism of action of, 287
    metabolism of, 286–287
    pharmacokinetics of, 286–287
    toxicity of
      ASPCA APCC’s experience on, 287
diagnosis of, 285
differential diagnosis of, 285
monitoring of, 286
prognosis of, 286
treatment of, 286
Atropine sulfate
  as reversal agent in small animal poisoning, 404
Attention-deficit disorder/attention-deficit/hyperactivity disorder (ADD/ADHD)
  defined, 279
drugs for
  intoxication in dogs and cats
    ASCPA APCC’s experience with, 282
differential diagnosis of, 281
  intoxication in dogs and cats with, 279–287. See also specific drugs
    amphetamine salts and similar agents, 280–284
    atomoxetine, 284–286
Attention-deficit/hyperactivity disorder (ADHD). See Attention-deficit disorder/attention-deficit/hyperactivity disorder (ADD/ADHD)
Avermectins
  toxicology of
    in dogs and cats, 313–333
    mechanisms of, 314–315
    P-gp and, 314–315

B
BAL (British antilewisite)
  as reversal agent in small animal poisoning, 404
Barium
  toxicology of
    in small animals, 368
Benzodiazepines
  pharmacology of, 266–268
Beryllium
  toxicology of
    in small animals, 368
Blindness
  acute
    toxicologic vs. nontoxicologic, 392
Blood loss
  toxicologic vs. nontoxicologic, 395
Borates
  toxicology of
    in small animals, 341
British antilewisite (BAL)
  as reversal agent in small animal poisoning, 404
Bromethalin
  in animal poisoning cases, 226
Bromethalin rodenticides
  toxicology of
    in small animals, 352–355
    clinical signs of, 352–353
    described, 352
diagnosis of, 353
pathophysiology of, 352
  treatment of, 353–354
C

Calcium
  toxicology of
    in small animals, 368
    in treating calcium channel blocker toxicity in dogs and cats, 272
Calcium channel blocker(s)
  classes of, 263
    pharmacology of, 265–269
      benzodiazepines, 266–268
      dihydropyridines, 266–269
      phenylalkylamines, 265–267
  described, 263
  uses of, 263
Calcium channel blocker toxicity
  in dogs and cats, 263–277
    clinical signs of, 269–270
    diagnosis of, 270
    pathophysiology of, 264–265
    pharmacology of, 265–269
    prevalence of, 263–264
    treatment of, 270–274
      4-aminopyridine in, 274
      calcium in, 272
      decontamination in, 270–271
      glucagon in, 272
      glucose in, 273
      ILEs in, 273–274
      inamrinone in, 272–273
      insulin in, 273
      monitoring in, 271
      pacemakers in, 274
      supportive care in, 271–272
      sympathomimetics in, 273
Calcium disodium EDTA
  as reversal agent in small animal poisoning, 404
Carbamates
  toxicology of
    in small animals, 335–337
Cardiac abnormalities
  toxicologic vs. nontoxicologic, 396
Cat(s)
  ADD/ADHD–related drug intoxication in, 279–287. See also Attention-deficit disorder/attention-deficit/hyperactivity disorder (ADD/ADHD), drugs for, intoxication in dogs and cats with calcium channel blocker toxicity in, 263–277. See also Calcium channel blocker toxicity, in dogs and cats drug-related toxicoses in
    ILEs in management of, 255
  mushroom poisoning in, 375–387. See also Mushroom poisoning, in dogs and cats NSAIDs in
toxicology of, 289–306. See also Nonsteroidal anti-inflammatory drugs (NSAIDs), in dogs and cats, toxicology of
Central nervous system (CNS) abnormalities
toxicologic vs. nontoxicologic, 389–391

Cesium
toxicology of
in small animals, 368

Chlorates
toxicology of
in small animals, 368–369

Chocolate
dark
in animal poisoning cases, 226

Cholecalciferol
in animal poisoning cases, 224–226

Cholecalciferol rodenticides
toxicology of
in small animals, 355–359
clinical signs of, 355–356
described, 355
diagnosis of, 356–357
pathophysiology of, 355
treatment of, 357–359

CNS. See Central nervous system (CNS)

Commercial pet food
prevalence of use of, 229

Contaminant(s)
in pet foods
in small animals, 237–250. See also Pet food contaminants, in small animals

Copper
toxicology of
in small animals, 369

Cyanuric acid
in pet food contamination, 245–247

Cyproheptadine
as reversal agent in small animal poisoning, 403

D

Dark chocolate
in animal poisoning cases, 226

Deferoxamine
as reversal agent in small animal poisoning, 404

Deracoxib
overdose of
in dogs and cats, 298–299

Diclofenac
overdose of
in dogs and cats, 301–302

Digoxin immune Fab
as reversal agent in small animal poisoning, 404

Dihydropyridines
pharmacology of, 266–269
Dog(s)
ADD/ADHD–related drug intoxication in, 279–287. See also Attention-deficit disorder/attention-deficit/hyperactivity disorder (ADHD), drugs for, intoxication in dogs and cats with calcium channel blocker toxicity in, 263–277. See also Calcium channel blocker toxicity, in dogs and cats drug-related toxicoses in ILEs in management of, 254, 255 mushroom poisoning in, 375–387. See also Mushroom poisoning, in dogs and cats NSAIDs in toxicology of, 289–306. See also Nonsteroidal anti-inflammatory drugs (NSAIDs), in dogs and cats, toxicology of xylitol toxicosis in, 307–312. See also Xylitol, in dogs

Doramectin
toxicology of
in dogs and cats
exposure sources, formulations, and therapeutic and toxic dosages, 319

E
Edema
pulmonary
toxicologic vs. nontoxicologic, 396–397
Eprinomectin
toxicology of
in dogs and cats
exposure sources, formulations, and therapeutic and toxic dosages, 319
Essential oils
toxicology of
in small animals, 343–344
Etodolac
overdose of
in dogs and cats, 303
Explosives
toxicology of
in small animals, 361–367
ANFO, 366
described, 361–363
lead-based, 366–367
nitramines, 363–365
nitrate esters, 365–366
nitroaromatics, 363

F
Fipronil
toxicology of
in small animals, 340–341
Fireworks
toxicology of
in small animals, 367–371
aluminum, 367
barium, 368
beryllium, 368
calcium, 368
cesium, 368
chlorates, 368–369
copper, 369
described, 367
iron, 369
lithium, 369
magnesium, 369
nitrates, 369
phosphorus, 370
potassium, 370
rubidium, 370
strontium, 370
sulfur, 370
titanium, 371
zinc, 371

Flumazenil
  as reversal agent in small animal poisoning, 403

Fomepizole
  as reversal agent in small animal poisoning, 404

G

Gastrointestinal symptoms
  toxicologic vs. nontoxicologic, 397

Gastropathy(ies)
  NSAID-related
    in dogs and cats
      prostaglandins for, 294

Glucagon
  as reversal agent in small animal poisoning, 406
  in treating calcium channel blocker toxicity in dogs and cats, 272

Glucose
  in treating calcium channel blocker toxicity in dogs and cats, 273

H

Heinz body anemia
  toxicologic vs. nontoxicologic, 395

Hydralazines
  toxicity of
    in dogs and cats, 380

Hydramethylnon
  toxicology of
    in small animals, 341–342

Hydroxycobalamin
  as reversal agent in small animal poisoning, 406

Hyperbaric oxygen
  as reversal agent in small animal poisoning, 406

Hypernatremia
  toxicologic vs. nontoxicologic, 398
Hypervitaminosis D  
  misformulation and, 242–243
Hypoglycemia  
  toxicologic vs. nontoxicologic, 398

I

Ibuprofen  
  in animal poisoning cases, 223, 296
ILEs. See Intravenous lipid emulsions (ILEs)
Imidacloprid  
  toxicology of  
    in small animals, 339
Inamrinone  
  in treating calcium channel blocker toxicity in dogs and cats, 272–273
Indomethacin  
  overdose of  
    in dogs and cats, 302–303
Indoxacarb  
  toxicology of  
    in small animals, 342–343
Insecticides  
  toxicology of  
    in small animals, 335–347  
      borates, 341  
      carbamates, 335–337  
      essential oils, 343–344  
      fipronil, 340–341  
      hydramethylnon, 341–342  
      imidacloprid, 339  
      indoxacarb, 342–343  
      lufenuron, 344  
      methoprene, 344–345  
      nitenpyram, 340  
      organophosphates, 335–337  
      pyrethrins/pyrethroids, 337–339  
      pyriproxyfen, 345  
      spinosad, 342  
      sulfuramid, 343
Insulin  
  in treating calcium channel blocker toxicity in dogs and cats, 273
Intravenous lipid emulsions (ILEs)  
  composition of, 251  
  as reversal agent in small animal poisoning, 405  
  in treating poisoning cases in small animals, 251–262  
    background of, 251–252  
    beyond local anesthetic toxicoses, 254–258  
    calcium channel blocker toxicity, 273–274  
    clinical application of, 258–259  
    for drug-related toxicoses, 254–258  
    mechanisms of action of, 253–254
Iron
  toxicology of
    in small animals, 369
Isoxazoles
  toxicity of
    in dogs and cats, 380–381
Ivermectin
  toxicology of
    in dogs and cats
      exposure sources, formulations, and therapeutic and toxic dosages, 316–318

L
Lactone(s)
  macrocyclic
    toxicology of, 313–333. See also Macrocyclic lactones
Lead-based explosives
  toxicology of
    in small animals, 366–367
Leucovorin
  as reversal agent in small animal poisoning, 405
Lithium
  toxicology of
    in small animals, 369
Liver damage
  differential diagnoses of, 393–394
Loratidine
  in animal poisoning cases, 223–224
Lufenuron
  toxicology of
    in small animals, 344

M
Macrocyclic lactones
  chemistry of, 313–314
  toxicokinetics of
    in dogs and cats
      P-gp in, 320–321
  toxicology of, 313–333
    in dogs and cats
      in animals treated with other P-gp substrates, 321–322
      diagnostics in, 328
      in dogs with ABCB1-1Δ gene defect, 321
      exposure sources, formulations, and therapeutic and toxic dosages, 315–319
        abamectin, 318–319
        doramectin, 319
        eprinomectin, 319
        ivermectin, 316–318
        milbemycin, 319
        moxidectin, 318
        nemadectin, 319
        selamectin, 318
mechanisms of, 314–315
in neonatal and elderly animal, 322–324
in obese and malnourished animals, 324–325
outcome of, 328
P-gp and, 314–315
in sensitive populations, 321–325
treatment of, 325–328

Magnesium
toxicology of
in small animals, 369

Melamine
in pet food contamination, 245–247

Meloxicam
overdose of
in dogs and cats, 299–300

Methemoglobinemia
toxicologic vs. nontoxicologic, 395

Methocarbamol
as reversal agent in small animal poisoning, 404

Methoprene
toxicology of
in small animals, 344–345

Methylene blue
as reversal agent in small animal poisoning, 406

Milbemycins
toxicology of
in dogs and cats, 313–333. See also Macrocyclic lactones

Milk thistle
as reversal agent in small animal poisoning, 406

Misformulation
as cause of pet food contamination, 242–244

Moxidectin
toxicology of
in dogs and cats
exposure sources, formulations, and therapeutic and toxic dosages, 318

Muscle weakness (paresis, paralysis)
toxicologic vs. nontoxicologic, 391–392

Mushroom poisoning
in dogs and cats, 375–387
described, 375–376
gastrointestinal irritation related to, 382–383
hepatotoxic mushrooms, 376–380
incidence of, 376
muscarine-containing mushrooms, 381–382
nephrotoxic mushrooms, 383–385
neurotoxic mushrooms, 380–381

N

Nabumetone
overdose of
in dogs and cats, 300
Naloxone
as reversal agent in small animal poisoning, 405
Naproxen
overdose of
in dogs and cats, 297–298
Natural contaminants, 239–242
Nemadectin
toxicology of
in dogs and cats
  exposure sources, formulations, and therapeutic and toxic dosages, 319
Nitenpyram
toxicology of
in small animals, 340
Nitramines
toxicology of
in small animals, 363–365
Nitrate(s)
toxicology of
in small animals, 369
Nitrate esters
toxicology of
in small animals, 365–366
Nitroaromatics
toxicology of
in small animals, 363
Nonsteroidal anti-inflammatory drugs (NSAIDs)
described, 289
in dogs and cats
  absorption of, 291–292
  classifications of, 289–290
  distribution of, 291–292
  excretion of, 291–292
  mechanisms of action of, 292–293
  metabolism of, 291–292
  toxicology of, 289–306
  aspirin, 296–297
  deracoxib, 298–299
  diclofenac, 301–302
  etodolac, 303
  ibuprofen, 296
  incidence of, 290
  indomethacin, 302–303
  meloxicam, 299–300
  nabumetone, 300
  naproxen, 297–298
  piroxicam, 300–301
  treatment for, 295–296
    prostaglandins in, 293–295
  uses of, 289–290
Nontoxicologic vs. toxicologic illnesses
differential diagnoses of, 389–402. See also specific disorders and Toxicologic vs. nontoxicologic illnesses, differential diagnoses of NSAIDs. See Nonsteroidal anti-inflammatory drugs (NSAIDs)
O

Oral lesions/ulcers
  toxicologic vs. nontoxicologic, 394

Organophosphates
  toxicology of
    in small animals, 335–337

Oxygen
  hyperbaric
    as reversal agent in small animal poisoning, 406

P

P-glycoprotein (P-gp)
  toxicology of avermectins and macrocyclic lactones in dogs and cats and,
    313–333. See also Avermectins; Macrocyclic lactones

P-gp. See P-glycoprotein (P-gp)

Pacemaker(s)
  in treating calcium channel blocker toxicity in dogs and cats, 274

2-PAM (paralidoxime)
  as reversal agent in small animal poisoning, 404

Pamidronate
  as reversal agent in small animal poisoning, 403

D-Penicillamine
  as reversal agent in small animal poisoning, 404

Permethrin
  in animal poisoning cases, 224

Pesticide(s)
  in animal poisoning cases, 224

Pet food contaminants. See also specific types
  aflatoxin, 239–242
  prevalence of, 237
  in small animals, 237–250
    adulteration-related, 245–247
    misformulation-related, 242–244
    natural contaminants, 239–242
  sources of, 229–230
  types of, 238

Pet food recalls, 237–250
  prevalence of, 238
  types of, 237–238

Pet food–related outbreaks/recalls
  veterinarian’s role in, 229–235
    establishing causal relationship between clinical signs and suspect foodstuff, 231–232
    case history in, 231
    evaluation of animal in, 231
    evaluation of pet food product in question, 231
    veterinary diagnostic laboratories in, 232–233
      reporting complaint, 233–234
      sample collection, 232–233
Phenylalkylamines
pharmacology of, 265–267
Phosphorus
toxicity of
in small animals, 370
Pig(s)
drug-related toxicoses in
ILEs in management of, 255
Piroxicam
overdose of
in dogs and cats, 300–301
Plant exposures
in animal poisoning cases, 224–225
Poisoning(s). See also specific types, e.g., Mushroom poisoning
reversal agents in, 403–406. See also specific agents
in small animals
ILEs in treating, 251–262. See also Intravenous lipid emulsions (ILEs), for treating
poisoning cases in small animals
in U.S.: 2002–2010
overview of trends in, 219–228. See also Animal poisoning cases, in U.S.: 2002–2010, overview of trends in
Potassium
toxicity of
in small animals, 370
Prostaglandin(s)
in NSAID-induced intoxication
in dogs and cats, 293–295
gastropathy-related, 294
renal toxicosis–related, 295
Prussian blue
as reversal agent in small animal poisoning, 405
Psilocin
toxicity of
in dogs and cats, 381
Psilocybin
toxicity of
in dogs and cats, 381
Pulmonary edema
toxicologic vs. nontoxicologic, 396–397
Pyrethrins
toxicity of
in small animals, 337–339
Pyrethroids
toxicity of
in small animals, 337–339
Pyridoxine
as reversal agent in small animal poisoning, 405
Pyriproxyfen
toxicity of
in small animals, 345
Rabbit(s)
  drug-related toxicoses in
  ILEs in management of, 256
Rat(s)
  drug-related toxicoses in
  ILEs in management of, 256–257
Renal toxicosis
  NSAID-related
    in dogs and cats
      prostaglandins for, 295
Reversal agents
  in small animal poisoning, 403–406. See also specific agents
Rodenticides
  toxicology of
    in small animals, 349–360. See also Bromethalin rodenticides; Cholecalciferol rodenticides; specific types, e.g., Anticoagulant rodenticides
      anticoagulant, 349–352
      bromethalin, 352–355
      cholecalciferol, 355–359
Rubidium
  toxicology of
    in small animals, 370
S
Selamectin
  toxicology of
    in dogs and cats
      exposure sources, formulations, and therapeutic and toxic dosages, 318
Silymarin
  as reversal agent in small animal poisoning, 406
Spinosad
  toxicology of
    in small animals, 342
Strontium
  toxicology of
    in small animals, 370
Succimer
  as reversal agent in small animal poisoning, 404
Sudden death
  toxicologic vs. nontoxicologic, 398–402
Sulfuramid
  toxicology of
    in small animals, 343
Sulfur
  toxicology of
    in small animals, 370
Sympathomimetics
  in treating calcium channel blocker toxicity in dogs and cats, 273
T

Thiamine deficiency
misformulation and, 243–244
Titanium
  toxicology of
    in small animals, 371
Toxicologic vs. nontoxicologic illnesses
differential diagnoses of, 389–402
  anemia, 395
  ARF, 392–393
  blindness, 392
  blood loss, 395
  cardiac abnormalities, 396
  CNS abnormalities, 389–391
  gastrointestinal symptoms, 397
  Heinz body anemia, 395
  hypernatremia, 398
  hypoglycemia, 398
  liver damage, 393–394
  methemoglobinemia, 395
  muscle weakness, paresis, paralysis, 391–392
  oral lesions/ulcers, 394
  pulmonary edema, 396–397
sudden death, 398–402

U

Ulcer(s)
  oral
    toxicologic vs. nontoxicologic, 394

V

Veterinarian(s)
  role in pet food–related outbreaks/recalls, 229–235. See also Pet food–related outbreaks/recalls, veterinarian’s role in
Vitamin D
  in animal poisoning cases, 224–226
Vitamin K1
  as reversal agent in small animal poisoning, 405

X

Xylitol
  sources of
    in dogs, 307–308
  toxicity of
    in dogs, 307–312
      clinical signs of, 309–310
      laboratory changes related to, 309–310
monitoring of, 310–311
