Note: Page numbers of article titles are in boldface type.

A

Abortion
in dogs and cats
   clinical approach to, 501–513
   diagnostic procedures for, 502–507
      assigning significance to gross findings, 506
      interpreting results, 507
      necropsy, 503–506
      preparing submission, 506–507
   differentials for, 507–511
      congenital defects and genetic disorders, 510
      infectious causes, 508–509
      noninfectious causes and maternal factors, 510–511
      traumatic causes, 509–510

Abscess(es)
   prostatic
      in dogs, 531–532

Accessory genital glands
   of dogs and cats
      common lesions in, 530–533

Age
   as factor in infertility in bitch
      in estrus within past 12 months: normal interestrus interval, 460–461

Androgens
   in estrus suppression in dogs, 434–435

Anestrus
   in dogs, 426
      primary
         as factor in infertility in bitch
            no estrus detected in past 12 months, 464–465
      secondary
         as factor in infertility in bitch
            no estrus detected in past 12 months, 465–466
      stress-related
         as factor in infertility in bitch
            no estrus detected in past 12 months, 465

Artificial insemination
   in dogs
      clinical techniques of, 439–444
         breeding techniques in bitch, 440–443
         ovulation timing and cycle management, 439–440
Autoimmune orchitis/epididymitis
stud dog–related infertility due to, 480

B

Bacterial reproductive pathogens
of dogs and cats, 561–582
Bartonella spp., 577
Brucella spp., 565–568
Campylobacter spp., 574–575
Chlamydia felis, 576
Coxiella burnetii, 576–577
described, 561–564
Escherichia coli, 568–570
leptospira, 572–574
Listeria monocytogenes, 577
Mycoplasma spp., 576
Salmonella spp., 574
Streptococcus spp., 570–572
Bartonella spp.
in reproductive tract of dogs and cats, 577
Benign prostatic hyperplasia and hypertrophy (BPH)
stud dog–related infertility due to, 472–476
Bitch(es)
breeding techniques in, 440–443
duration of estrous stages/breeding management history, 427
hormone assays, 429–431
natural mating, 440
physical changes, 427
surgical insemination, 443
transcervical insemination, 441–442
transvaginal insemination, 440–441
ultrasound of ovaries, 429
vaginal cytology, 427–428
infertility in
clinical approaches to, 457–468. See also Infertility, in bitch
reproductive cycle in
estrous cycle, 423–426. See also Estrous cycle, in dogs
management of, 423–437
breeding-related, 426–431. See also Bitch(es), breeding techniques in
estrus induction, 431–433
estrus suppression in, 434–435
Bluetongue virus
in dogs, 587–588
BPH. See Benign prostatic hyperplasia and hypertrophy (BPH)
Breeding techniques
in bitches, 440–443. See also Bitch(es), breeding techniques in
Brucella spp.
B. canis
in reproductive tract of dogs and cats, 565–568
antimicrobial therapy for, 568
clinical signs of, 565
control of, 568
described, 565
diagnosis of, 566–568

C

Cabergoline
  in estrus induction in dogs, 433
CaHV-1. See Canid herpesvirus 1 (CaHV-1)
Campylobacter spp.
  in reproductive tract of dogs and cats, 574–575
Cancer
  prostatic
    in dogs, 532–533
Canid herpesvirus 1 (CaHV-1), 583–586
Canine minute virus (CnMV), 586–587
Canine parvovirus 1, 586–587
Canine transmissible venereal tumor (CTVT), 528
Cat(s)
  abortion in
    clinical approach to, 501–513
  bacterial reproductive pathogens of, 561–582. See also specific pathogens and
  Bacterial reproductive pathogens, of dogs and cats
  common lesions in female reproductive tract of, 547–559. See also specific lesions
    and Female reproductive tract of
  common lesions in male reproductive tract of, 527–545. See also specific lesions
    and Male reproductive tract of
  disorders of sexual development in, 515–526. See also specific disorders and
  Sexual development, in dogs and cats, disorders of
  gestation in
    current advances in, 445–456. See also Gestation; Pregnancy
  neonatal death in
    clinical approach to, 501–513
  overt pseudopregnancy in, 455
  parturition in
    current advances in, 445–456. See also Parturition; Pregnancy
    emergency interception during, 489–499. See also Parturition
    pregnancy diagnosis in, 446–448
  stillbirth in
    clinical approach to, 501–513
  viral reproductive pathogens in, 588–594. See also specific pathogens and Viral
    reproductive pathogens, in cats
Chimerism
  in dogs and cats, 520
Chlamydyphila felis
  in reproductive tract of dogs and cats, 576
Chromosomal abnormalities
  in dogs and cats, 519–520
Chromosomal sex
  in dogs and cats, 515–516
CnMV. See Canine minute virus (CnMV)
Congenital defects
- abortion, stillbirth, and neonatal death in dogs and cats related to, 510

Coxiella burnetii
- in reproductive tract of dogs and cats, 576–577

Cryptochidism
- in dogs and cats, 522–523

CTVT. See Canine transmissible venereal tumor (CTVT)

Cyst(s)
  - luteal
    - as factor in infertility in bitch
    - no estrus detected in past 12 months, 466
  - ovarian
    - in female reproductive tract in dogs and cats, 550–552
  - paraprostatic
    - in dogs, 533
  - prostatic
    - in dogs, 533
  - uterine
    - in female reproductive tract in dogs and cats, 556

Cystic endometrial hyperplasia–pyometra complex
- in female reproductive tract in dogs and cats, 552–554

D

Death
- neonatal
  - in dogs and cats
    - clinical approach to, 501–513. See also Neonatal death, in dogs and cats

Dermatitis
- scrotal
  - stud dog–related infertility due to, 481

Diestrus
- in dogs, 425–426

Dog(s)
- abortion in
  - clinical approach to, 501–513
- artificial insemination in
  - clinical techniques of, 439–444. See also Artificial insemination, in dogs, clinical techniques of
- bacterial reproductive pathogens of, 561–582. See also specific pathogens and
  - Bacterial reproductive pathogens, of dogs and cats
- common lesions in female reproductive tract of, 547–559. See also specific lesions and
  - Female reproductive tract, of dogs and cats, common lesions in
- common lesions in male reproductive tract of, 527–545. See also specific lesions and
  - Male reproductive tract, of dogs and cats, common lesions in
- disorders of sexual development in, 515–526. See also specific disorders and
  - Sexual development, in dogs and cats, disorders of female. See Bitch(es)
- gestation in
  - current advances in, 445–456. See also Gestation; Pregnancy
- neonatal death in
  - clinical approach to, 501–513
overt pseudopregnancy in, 455
parturition in
  current advances in, 445–456. See also Parturition; Pregnancy
  emergency interception during, 489–499. See also Parturition
pregnancy diagnosis in, 446–448
stillbirth in
  clinical approach to, 501–513
viral reproductive pathogens in, 583–588. See also specific pathogens and Viral
  reproductive pathogens, in dogs

Dystocia
during parturition
  in dogs and cats, 490–492
    causes of, 490–492
    diagnosis of, 493
    management of, 493–498
      mechanical interventions in, 494
      medical, 493–494
      surgical, 494–498

E

Ejaculatory disorders
  stud dog–related infertility due to, 484–485
Endometritis
  in female reproductive tract in dogs and cats, 555
Epididymal disease
  in dogs and cats, 539–542
    infectious epididymitis, 539–540
    segmental aplasia of mesonephric duct, 541
    spermatic granuloma of epididymal head, 540–541
Epididymal head
  spermatic granuloma of
    in dogs, 540–541
Epididymitis
  infectious
    in dogs, 539–540
    stud dog–related infertility due to, 478–480
    stud dog–related infertility due to, 480
Escherichia coli
  in reproductive tract of dogs and cats, 568–570
    antimicrobial therapy for, 569–570
    clinical signs of, 569
    control of, 569–570
    described, 568–569
    diagnosis of, 569
Estrogen
  in estrus induction in dogs, 432–433
Estrous cycle
  in dogs, 423–426
    anestrus, 426
    described, 423–425
diestrus, 425–426
estrus, 425
proestrus, 425

Estrus
in dogs, 425
induction of, 431–433
cabergoline in, 433
estrogen in, 432–433
general management of, 431–432
GnRH agonists in, 433
gonadotropins in, 432
infertility related to, 457–468. See also Infertility, in bitch, clinical approaches to suppression of, 434–435

Extratesticular testicular tumors
in previously neutered dogs, 536–537

F

Failure to breed
stud dog–related, 483–484

FeHV-1. See Feline herpes virus 1 (FeHV-1)
Feline herpes virus 1 (FeHV-1), 593–594
Feline immunodeficiency virus (FIV), 590–592
Feline leukemia virus (FLV), 592–593
Feline panleukopenia virus (FPLV), 588–590

Female differentiation
in dogs and cats, 518

Female reproductive tract
of dogs and cats
common lesions in, 547–559
ovarian, 547–552
cystic ovaries, 550–552
ovarian remnant syndrome, 547–550
uterine, 552–556
cystic endometrial hyperplasia–pyometra complex, 552–554
cysts, 556
endometritis, 555
metritis, 554–555
neoplasias, 556
vaginal, 556–558
neoplasia, 557–558
prolapse, 556–557

FIV. See Feline immunodeficiency virus (FIV)

Fluid(s)
within vaginal space
stud dog–related infertility due to, 481–482

FLV. See Feline leukemia virus (FLV)

Foreign body(ies)
preputial
in dogs, 529

FPLV. See Feline panleukopenia virus (FPLV)
Fracture(s)
   of os penis
      in dogs, 530

G
Genetic disorders
   abortion, stillbirth, and neonatal death in dogs and cats related to, 510
Genital glands
   accessory
      of dogs and cats
         common lesions in, 530–533
Germ cell tumors
   in dogs, 535–536
Gestation
   in dogs and cats
      current advances in, 445–456. See also Pregnancy
         normal period of, 445, 489–490, 501
Gonadal abnormalities
   in dogs and cats, 520–521
Gonadal sex
   in dogs and cats, 516–517
Gonadotropin(s)
   in estrus induction in dogs, 432
Gonadotropin releasing hormone (GnRH) agonists
   in estrus induction in dogs, 433
   in estrus suppression in dogs, 435
Gonadotropin releasing hormone (GnRH) antagonists
   in estrus suppression in dogs, 435

H
Hermaphroditism
   in dogs and cats, 520–521
Hormone(s)
   as factor in infertility in bitch
      in estrus within past 12 months: normal interestrus interval, 460–461
Hormone assays
   in breeding management in dogs, 429–431

I
Infection(s)
   abortion, stillbirth, and neonatal death in dogs and cats related to, 508–509
   as factor in infertility in bitch
      in estrus within past 12 months: normal interestrus interval, 461–462
Infectious epididymitis
   in dogs, 539–540
   stud dog–related infertility due to, 478–480
Infectious orchitis
   stud dog–related infertility due to, 478–480
Infertility
in bitch
clinical approaches to, 457–468
in estrus within past 12 months: abnormal interestrus interval, 462–463
  extended interestrus interval, 462–463
  persistent estrus, 463
  shortened interestrus interval, 462
in estrus within past 12 months: normal interestrus interval, 458–462
  age effects, 460–461
  congenital or acquired occlusion of reproductive tract, 462
  hormonal exposure effects, 460–461
  infectious causes, 461–462
  prior breeding management evaluation, 458–460
no estrus detected in past 12 months, 463–466
  luteal cysts and, 466
  metabolic disorders and, 466
  primary anestrus, 464–465
  secondary anestrus, 465–466
described, 457–458
evaluation of, 457–458
defined, 457
stud dog–related, 469–488
causes of, 472–480
  autoimmune orchitis/epididymitis, 480
  ejaculatory disorders, 484–485
  fluid within vaginal space, 481–482
  infectious orchitis/epididymitis, 478–480
  neoplasias, 482–483
  prostatic disease, 472–477
  scrotal dermatitis, 481
  scrotal overheating, 480
  scrotal trauma, 481
  testicular degeneration, 480
  testicular insult or infarct, 480–483
  unwillingness/failure to breed, 483–484
evaluation of
  advanced semen diagnostics in, 471
  patient history in, 469–470
  physical examination in, 470
  semen collection and evaluation in, 470–471
  spermiogram abnormalities in, 471–472
presentation of, 469
prevalence of, 469

Insemination
artificial
in dogs
  clinical techniques of. See also specific techniques and Artificial insemination, in dogs, clinical techniques of
  techniques, 439–444

L
Leptospira
  in reproductive tract of dogs and cats, 572–574
antimicrobial therapy for, 573–574
clinical signs of, 573
control of, 573–574
described, 572–573
diagnosis of, 573

Lesion(s)
in female reproductive tract in dogs and cats, 547–559. See also specific lesions and Female reproductive tract, of dogs and cats, common lesions in
in male reproductive tract in dogs and cats, 527–545. See also specific lesions and Male reproductive tract, of dogs and cats, common lesions in

Listeria monocytogenes
in reproductive tract of dogs and cats, 577

Luteal cysts
as factor in infertility in bitch
no estrus detected in past 12 months, 466

M

Male differentiation
in dogs and cats, 517–518

Male reproductive tract
of dogs and cats
common lesions in, 527–545
of accessory genital glands, 530–533
CTVT, 528
described, 527
epididymal disease–related, 539–542
fracture of os penis, 530
paraphimosis, 528
penile, 528–530
penile papilloma, 529–530
penile/preputial trauma and ulceration, 529
of peritesticular tissues, 534
phimosis, 529
posthitis, 528
prepuce, 528–530
preputial foreign body, 529
priapism, 528–529
prostate cancer, 532–533
prostatic atrophy/hypoplasia, 530
prostatic hyperplasia/hypertrophy, 531
prostatic/paraprostatic cysts, 533
prostatic squamous metaplasia, 531
prostatitis, 531–532
of scrotal contents, 534–539
testicular, 542
of testicular capsule, 534
testicular disease–related, 534–539
of vaginal tunics, 534
Mesonephric duct
  segmental aplasia of
    in dogs, 541
Metabolic disorders
  as factor in infertility in bitch
    no estrus detected in past 12 months, 466
Metritis
  in female reproductive tract in dogs and cats, 554–555
Monosomy X
  in dogs and cats, 520
Mycoplasma spp.
  in reproductive tract of dogs and cats, 576

N
Natural mating
  as breeding technique in bitches, 440
Necropsy
  in diagnosis of abortion, stillbirth, and neonatal death
    in dogs and cats, 503–506
Neonatal death
  in dogs and cats
    clinical approach to, 501–513
    diagnostic procedures for, 502–507
      assigning significance to gross findings, 506
      interpreting results, 507
      necropsy, 503–506
      preparing submission, 506–507
    differentials for, 507–511
      congenital defects and genetic disorders, 510
      infectious causes, 508–509
      noninfectious causes and maternal factors, 510–511
      traumatic causes, 509–510
Neoplasia(s)
  stud dog–related infertility due to, 482–483
    uterine
      in dogs and cats, 556
    vaginal
      in dogs and cats, 557–558

O
Occlusion
  of reproductive tract
    as factor in infertility in bitch
      in estrus within past 12 months: normal interestrus interval, 462
Orchitis
  autoimmune
    stud dog–related infertility due to, 480
  in dogs, 538
    infectious
      stud dog–related infertility due to, 478–480
Os penis
  fracture of
    in dogs, 530
Ovarian remnant syndrome
  in female reproductive tract in dogs and cats, 547–550
Ovary(ies)
  common lesions of
    in dogs and cats, 547–552
  cystic
    in dogs and cats, 550–552
  ultrasound of
    in breeding management in dogs, 429
Ovulation
  timing and cycle of
    in artificial insemination in dogs, 439–440

P
Papilloma(s)
  penile
    in dogs, 529–530
Parapimosis
  in dogs, 528
Paraprostatic cysts
  in dogs, 533
Parturition
  in dogs and cats
    current advances in, 445–456. See also Pregnancy
      emergency interception during, 489–499
        dystocia-related, 490–492
        uterine torsion, 492
    normal, 452
    stages of, 490
Penis
  of dogs
    common lesions of, 528–530
    os penis
      fracture of, 530
    papilloma of, 529–530
    trauma to, 529
Peritesticular tissues
  lesions of
    in dogs, 534
Persistent Müllerian duct syndrome (PMDS)
  in dogs and cats, 522
Phenotypic abnormalities
  in dogs and cats, 521–523
Phimosis
  in dogs, 529
PMDS. See Persistent Müllerian duct syndrome (PMDS)
Posthitis
  in dogs, 528
Pregnancy
  in dogs and cats
    complications during, 451–452
    diagnosis of, 446–448
    maternal care during, 448
    monitoring during, 448–451
      complete blood count in, 449
      physical examination in, 448–449
      of prepartum rectal temperatures, 450–451
      progesterone, 450
      radiography in, 449
      serum biochemistry studies in, 449
      tocodynamometry in, 451
      ultrasound in, 449
    termination of, 452–454
Prepartum rectal temperatures
  monitoring of
    during pregnancy in dogs and cats, 450–451
Prepuce
  common lesions of
    in dogs, 528–530
Preputial foreign body
  in dogs, 529
Priapism
  in dogs, 528–529
Proestrus
  in dogs, 425
Progesterone
  during pregnancy in dogs and cats
    monitoring of, 450
Progestins
  in estrus suppression in dogs, 434
Prolapse
  vaginal
    in female reproductive tract in dogs and cats, 556–557
Prostate
  of dogs
    abscess of, 531–532
    atrophy/hypoplasia of, 530
    carcinoma of, 532–533
    cysts of, 533
    hyperplasia/hypertrophy of, 531
    squamous metaplasia of, 531
Prostatic disease
  stud dog–related infertility due to, 472–477
    BPH, 472–476
Prostatitis
  in dogs, 531–532
  stud dog–related infertility due to, 476–477
Pseudocyesis
  in dogs and cats, 455
Pseudogenetra
  in dogs and cats, 455
Pseudohermaphroditism
  in dogs and cats, 521–522
Pseudopregnancy
  overt
    in dogs and cats, 455

R
Radiography
  during pregnancy in dogs and cats, 449
Rectal temperatures
  prepartum
    monitoring of
      during pregnancy in dogs and cats, 450–451
Reproductive cycle
  in bitches
    management of, 423–437. See also Bitch(es), reproductive cycle in
Reproductive tract
  of dogs and cats
    bacterial pathogens in, 561–582. See also specific pathogens and Bacterial
      reproductive pathogens, of dogs and cats
    male
      of dogs and cats
        common lesions in, 527–545. See also specific lesions and Male reproductive
          tract, of dogs and cats, common lesions in
        occlusion of
          as factor in infertility in bitch
            in estrus within past 12 months: normal interestrus interval, 462

S
Salmonella spp.
  in reproductive tract of dogs and cats, 574
Scrotum
  contents of
    lesions related to
      in dogs, 534–539
dermatitis of
  stud dog–related infertility due to, 481
overheating of
  stud dog–related infertility due to, 480
trauma to
  stud dog–related infertility due to, 481
Sex cord–stromal (gonadostromal) tumors
  in dogs, 534–535
Sexual development
  in dogs and cats
    chromosomal sex, 515–516
described, 515
disorders of, 515–526
chromosomal abnormalities, 519–520
cryptochidism, 522–523
gonadal abnormalities, 520–521
phenotypic abnormalities, 521–523
PMDS, 522
female differentiation, 518
gonadal sex, 516–517
male differentiation, 517–518
Spermatic granuloma of epididymal head
in dogs, 540–541
Spermiogram
abnormalities of
in stud dog–related infertility, 471–472
Staphylococcus spp.
in reproductive tract of dogs and cats, 575–576
Stillbirth
in dogs and cats
clinical approach to, 501–513
diagnostic procedures for, 502–507
assigning significance to gross findings, 506
interpreting results, 507
necropsy, 503–506
preparing submission, 506–507
differentials for, 507–511
congenital defects and genetic disorders, 510
infectious causes, 508–509
noninfectious causes and maternal factors, 510–511
traumatic causes, 509–510
Streptococcus spp.
in reproductive tract of dogs and cats, 570–572
antimicrobial therapy for, 572
clinical signs of, 571
control of, 572
described, 570–571
diagnosis of, 572
Stress
anestrus related to
as factor in infertility in bitch
no estrus detected in past 12 months, 465
Stud dog
infertility in, 469–488. See also Infertility, stud dog–related
Surgical insemination
as breeding technique in bitches, 443
T

Testes
larger
in dogs, 538
small or missing
in dogs, 537–538
Testicular capsule
lesions of
in dogs, 534

Testicular degeneration
stud dog–related infertility due to, 480

Testicular disease
in dogs, 534–539
germ cell tumors, 535–536
larger testes, 538
orchitis, 538
previously neutered
extratesticular testicular tumors, 536–537
sex cord–stromal (gonadostromal) tumors, 534–535
small or missing testes, 537–538
testicular insult or infarct, 480–483
testicular neoplasia, 534
testicular rupture, 539
testicular torsion and death, 538–539

Testicular insult or infarct
stud dog–related infertility due to, 480–483

Testicular lesions
in cats, 542

Testicular neoplasia
in dogs, 534

Testicular rupture
in dogs, 539

Testicular torsion and death
in dogs, 538–539

Tocodynamometry
during pregnancy in dogs and cats, 451

Torsion
testicular
in dogs, 538–539

Transcervical insemination, 441–442
Transvaginal insemination, 440–441

Trauma
abortion, stillbirth, and neonatal death in dogs and cats related to, 509–510
penile and preputial
in dogs, 529
scrotal
stud dog–related infertility due to, 481

Trisomy XXY
in dogs and cats, 519–520

Tumor(s)
sex cord–stromal
in dogs, 534–535

U

Ulceration
penile and preputial
in dogs, 529
Ultrasound
  of ovaries
    in breeding management in dogs, 429
    during pregnancy in dogs and cats, 449
Unwillingness/failure to breed
  stud dog–related infertility due to, 483–484
Uterine torsion
  during parturition
    in dogs and cats, 492
Uterus
  common lesions of
    in dogs and cats, 552–556

V

Vagina
  common lesions of
    in dogs and cats, 556–558
Vaginal neoplasia
  in dogs and cats, 557–558
Vaginal prolapse
  in dogs and cats, 556–557
Vaginal space
  fluid within
    stud dog–related infertility due to, 481–482
Vaginal tunics
  lesions of
    in dogs, 534
Viral reproductive pathogens
  in cats, 588–594
    FeHV-1, 593–594
    FeLV, 592–593
    FIV, 590–592
    FPLV, 588–590
  in dogs, 583–588
    bluetongue virus, 587–588
    CaHV-1, 583–586
    CnMV, 586–587
