Index

Note: Page numbers of article titles are in **boldface** type.

A

Abdominal FAST (AFAST)
- for dogs and cats in emergency room, 774–782
- AFS and, 777–780
  - beyond blunt abdominal trauma–induced injury, 780–782
  - for blunt trauma, 774–775
  - for penetrating trauma, 776

Abdominal fluid score (AFS) scanning technique
- AFAST and, 777–780

Activated charcoal
  - multidose
    - in poisoned small animal management, 763
    - in poisoned small animal management, 761–762

Acute kidney injury (AKI), **843–867**
  - conditions causing
    - management of, 848–864
      - acute pyelonephritis, 852–854
      - canine urethral calculi, 860–864
      - EG intoxication, 848–852
      - FUO, 856–860
      - ureteral obstruction, 854
      - uroperitoneum, 854–856
    - described, 843–845
    - diagnosis of, 846–847
    - management of
      - general, 847–848
      - pathophysiology of, 845–846
  - Advanced life support, 976–981
    - capnography in, 978
    - drug therapy in, 978–981
    - ECG in, 976–978
    - electrical defibrillation in, 981
    - monitoring in, 976–978

AFAST. See Abdominal FAST (AFAST)

AFS scanning technique. See Abdominal fluid score (AFS) scanning technique

AKI. See Acute kidney injury (AKI)

Alfaxalone
  - in emergent small animals, 945

Alpha-2 agonist
  - in stabilization of emergent small animals, 943–944
Analgesia/analgesics
  in emergent small animals, 941–953. See also Emergent patients, analgesia, anesthesia, and chemical restraint in

Anesthesia/anesthetics
  in emergent small animals, 941–953. See also Emergent patients, analgesia, anesthesia, and chemical restraint in

Anti-arrhythmic drugs
  in advanced life support, 980

Anticholinergics
  in stabilization of emergent small animals, 943

Anticonvulsants
  in TBI management, 925

Antidotal therapy
  in poisoned small animal management, 767

Aortic thromboembolism (ATE)
  feline
    management of, 835–837

Arrhythmia(s)
  in small animals
    management of, 828–833

Assist-control ventilation
  in dogs and cats, 959

ATE. See Aortic thromboembolism (ATE)

Atropine
  in advanced life support, 978–980

B

Barbiturate(s)
  in TBI management, 925–926

Basic life support, 973–976
  airway and breathing–related, 975–976
  circulation-related, 973–975

Blood components
  in transfusion medicine, 741

Blood donor screening
  in transfusion medicine, 741

Blood pressure
  monitoring of
    in emergent small animals, 710–713
      direct arterial blood pressure, 712
      noninvasive blood pressure, 712–713

Blood typing
  advances in, 736–738

Blunt trauma
  to dogs and cats
    emergency room management of, 782–783
    AFAST in, 774–775

Body weight
  monitoring of
    in emergent small animals, 715
Buffers
   for emergent small animals, 726–727

C
Calcium
   for emergent small animals, 726
Capnography
   in advanced life support, 978
   in monitoring of emergent small animals, 717–718
Cardiac emergencies
   management of, 817–842
       arrhythmias, 828–833
       cardiac tamponade/pericardial effusion, 833–835
       feline ATE, 835–837
       heart failure, 817–828
Cardiac tamponade
   in dogs and cats
       TFAST in diagnosis of, 788
Cardiac tamponade/pericardial effusion
   in small animals
       management of, 833–835
Cardiopulmonary arrest (CPA)
   described, 971
Cardiopulmonary resuscitation (CPR), 971–987
   advanced life support, 976–981
   basic life support, 973–976
   for CPA
       described, 971–972
       in postcardiac arrest care, 981–982
       preparedness for, 972–973
       prevention of, 972–973
       prognosis after, 982–983
Cardiovascular system
   monitoring of
       in emergent small animals, 709–710
Cat(s)
   advances in blood typing for, 737–738
   in emergency room
       ultrasound for, 773–797. See also Ultrasound, for dogs and cats in emergency room
   endocrine emergencies in, 869–897. See also Endocrine emergencies, in dogs and cats
   mechanical ventilation for, 955–969. See also Mechanical ventilation, for dogs and cats
   urethral obstruction in
       AKI due to
           management of, 856–860
Central nervous system (CNS) support
   in poisoned small animal management, 765–766
Central venous pressure
   monitoring of
       in emergent small animals, 717
Charcoal
   activated
   in poisoned small animal management, 761–763

Chemical restraint
   in emergent small animals, 941–953. See also Emergent patients, analgesia, anesthesia, and chemical restraint in

Chest wall pathology
   in dogs and cats
   TFAST in diagnosis of, 787

Chloride
   for emergent small animals, 725

Circulatory shock
   severe
   in dogs and cats
   mechanical ventilation for, 958

CNS. See Central nervous system (CNS)

Coagulation testing
   monitoring of
   in emergent small animals, 717

Colloid(s)
   natural
   for emergent small animals, 730–732
   synthetic
   for emergent small animals, 732

Colloid osmotic pressure
   in emergent small animals, 730
   monitoring of
   in emergent small animals, 718

Colloid solutions
   for emergent small animals, 730

Continuous positive airway pressure (CPAP)
   in dogs and cats, 960

Contusion(s)
   lung
   in dogs and cats
   diagnosis of
   TFAST in, 785–787

Corticosteroid(s)
   in advanced life support, 980
   in SCI management, 927
   in TBI management, 925

CPA. See Cardiopulmonary arrest (CPA)

CPR. See Cardiopulmonary resuscitation (CPR)

Crossmatching
   in transfusion medicine, 738–739

Crystalloid fluids
   for emergent small animals, 722–724

D

Dehydration
   in emergent small animals, 728
Dextrose
for emergent small animals, 727

Diabetes mellitus
in dogs and cats
postcrisis therapy for, 875

Diabetic emergencies
in dogs and cats, 869–875. See also Diabetic ketoacidosis (DKA); Hyperglycemic hyperosmolar syndrome (HHS)

Diabetic ketoacidosis (DKA)
in dogs and cats, 869–875
described, 869–870
diagnosis of, 872
emergency management of, 872–875
postcrisis therapy for, 875
prognosis of, 875
progression to, 870–871
signs and symptoms of, 871

Dissociative medications
in stabilization of emergent small animals, 943

Dog(s)
advances in blood typing for, 736–737
in emergency room
ultrasound for, 773–797. See also Ultrasound, for dogs and cats in emergency room
endocrine emergencies in, 869–897. See also Endocrine emergencies, in dogs and cats mechanical ventilation for, 955–969. See also Mechanical ventilation, for dogs and cats
urethral calculi in AKI due to
management of, 860–864

Drug therapy
in advanced life support, 978–981

E

ECG. See Electrocardiography (ECG)
EG. See Ethylene glycol (EG)

Electrical defibrillation
in advanced life support, 981

Electrocardiography (ECG)
in advanced life support, 976–978

Electrolyte therapy
for HHS and DKA in dogs and cats, 873–874

Emergent patients
analgesia, anesthesia, and chemical restraint in, 941–953
induction of, 944–947
intraoperative hypotension related to, 948
introduction, 941
maintenance-related, 947–948
recovery-related, 948–949
colloid osmotic pressure in, 730
dehydration in, 728
Emergent (continued)
fluid therapy for, 721–734
  buffers, 726–727
  calcium, 726
  chloride, 725
  colloid solutions, 730
  crystalloid fluids, 722–724
  deficit of, 728
  dextrose, 727
  goals of, 722
  hypertonic saline, 724
  magnesium, 726
  maintenance requirements, 727
  natural colloids, 730–732
  potassium, 725
  sodium, 724–725
  synthetic colloids, 732
  TBW, 722
hypovolemia in, 728–730
monitoring of, 705–720
  blood pressure, 710–713
  body weight, 715
  capnography, 717–718
  cardiovascular system, 709–710
  central venous pressure, 717
  coagulation testing, 717
  colloid osmotic pressure, 718
  lactate, 716
  minimum database, 716
  neurologic assessment, 713–714
  respiratory, 706–709
  temperature, 714–715
  urine output, 715–716
stabilization of, 942–944
  chemical restraint in, 942
  premedication in, 942–944
surgical considerations in, 899–914
  damage control, 908
  described, 899–900
  feeding tubes and nasogastric decompression, 907
  hemostasis, 905–907
  instrumentation, 902
  patient positioning, 905
  patient preparation, 903–905
  peritoneal drainage, 907
  peritoneal lavage, 907
  postoperative care, 910
  preoperative assessment, 901–902
  readiness, 900–901
  timing of surgery, 900
trauma triad of death, 907–908
wounds, 908–910
Endocrine emergencies
   in dogs and cats, 869–897
      diabetic emergencies, 869–875. See also Diabetic ketoacidosis (DKA);
         Hyperglycemic hyperosmolar syndrome (HHS)
         hyperthyroidism, 887–889
         hypoadrenocorticism, 881–886
         hypoglycemia
            exogenous or endogenous insulin excess and, 875–881
         hypothyroidism, 889–892
         pheochromocytoma, 886–887
Ethylene glycol (EG) intoxication
   AKI due to
      management of, 848–852
Etomidate
   in emergent small animals, 946
Excessive work of breathing
   in dogs and cats
      mechanical ventilation for, 958

F
FAST. See Focused assessment with sonography for trauma (FAST)
Feline urethral obstruction (FUO)
   AKI due to
      management of, 856–860
Fluid compartments
   in small animals, 722
Fluid therapy
   for emergent small animals, 721–734. See also Emergent patients, fluid therapy for
   for HHS and DKA in dogs and cats, 872
   in poisoned small animal management, 764–765
Focused assessment with sonography for trauma (FAST), 773–797
   abdominal
      for dogs and cats in emergency room, 774–782. See also Abdominal FAST (AFAST)
      for dogs and cats in emergency room, 774–782
         templates for medical records, 793
   global
      for dogs and cats in emergency room
         use of, 791–793
      introduction to, 773–774
   thoracic
      for dogs and cats in emergency room, 782–788. See also Thoracic FAST (TFAST)
FUO. See Feline urethral obstruction (FUO)

G
Gastrointestinal support
   in poisoned small animal management, 765
Heart failure
  in small animals
    management of, 817–828
Hepatoprotectants
  in poisoned small animal management, 766–767
HHS. See Hyperglycemic hyperosmolar syndrome (HHS)
Hyperglycemic hyperosmolar syndrome (HHS)
  in dogs and cats, 869–875
    described, 869–870
    diagnosis of, 872
    emergency management of, 872–875
    postcrisis therapy for, 875
    prognosis of, 875
    progression to, 871
    signs and symptoms of, 871
Hyperosmolar therapy
  in neurologic trauma management in small animals, 923–925
Hyperthyroidism
  in dogs and cats, 887–889
    described, 887
    diagnosis of, 888
    emergency management of, 888–889
    postcrisis management of, 889
    prognosis for, 889
    signs and symptoms of, 887–888
Hypertonic saline
  for emergent small animals, 724
Hypoadrenocorticism
  in dogs and cats, 881–886
    described, 881–882
    diagnosis of, 882–883
    emergency management of, 883–884
    postcrisis management of, 884–886
    prognosis for, 886
    signs and symptoms of, 882
Hypoglycemia
  in dogs and cats, 875–881
    causes of
      exogenous insulin overdose, 875–876
      insulinoma, 876
      diagnosis of, 876–877
      signs and symptoms of, 876
Hypoglycemic crisis
  in dogs and cats
    emergency management of, 877–880
Hypotension
  intraoperative
    in emergent small animals, 948
Hypothyroidism
  in dogs and cats, 889–892
Hypoventilation
  severe
    in dogs and cats
    mechanical ventilation for, 957–958
Hypovolemia
  in emergent small animals, 728–730
Hypoxemia
  severe
    despite oxygen therapy
    in dogs and cats
    mechanical ventilation for, 956–957

I
Insulin
  exogenous
    in dogs and cats
    hypoglycemia due to, 875–876
    for HHS and DKA in dogs and cats, 874–875
Insulinoma
  in dogs and cats, 876
    emergency management of, 877–880
    postcrisis management of, 881
    prognosis for, 881
Intermittent positive pressure ventilation (IPPV)
  for dogs and cats
    indications for, 955
Intravenous (IV) fluid therapy
  in advanced life support, 980
  in neurologic trauma management in small animals, 921–922
IPPV. See Intermittent positive pressure ventilation (IPPV)

K
Ketamine
  in emergent small animals, 946

L
Lactate
  monitoring of
    in emergent small animals, 716
Lower airway disease
  management of, 800–801
Lung contusions
  in dogs and cats
    diagnosis of
      TFAST in, 785–787
Lung ultrasound
   for dogs and cats in emergency room, 788–791

M
Magnesium
   for emergent small animals, 726
Mechanical ventilation
   for dogs and cats, 955–969. See also specific types
      anesthesia in, 964–966
      described, 955–956
      indications for, 956–958
      initial settings, 962–968
      IPPV, 955
      modes of, 959–960
      monitoring of, 966
      PaCO₂, 963–964
      PaO₂, 963
      prognosis after, 958–959
      troubleshooting, 966–968
      ventilator settings, 960–962
         inspiratory time and flow rate, 961
         peak inspired airway pressure, 962
         PEEP, 961–962
         respiratory rate and inspiration, 961
         tidal volume, 961
         trigger variable, 960
Minimum database monitoring
   in emergent small animals, 716
Myxedema crisis
   in dogs and cats, 889–892
      described, 889–891
      diagnosis of, 891
      emergency management of, 891–892
      postcrisis management of, 892
      prognosis for, 892
      signs and symptoms of, 890

N
Natural colloids
   for emergent small animals, 730–732
Neurologic assessment
   in emergent small animals, 713–714
Neurologic trauma
   in small animals
      described, 915–916
      management of, 915–940
         diagnostic evaluation in, 917–921
         goals in, 916–917
         hyperosmolar therapy in, 923–925
         IV fluid therapy in, 921–922
nonpharmacologic, 927–932
oxygen therapy in, 921
pain-related, 922
pharmacologic, 921–927
systemic therapy in, 927–929
prognosis for, 932

O
Opioid(s)
in emergent small animals, 945–946
stabilization-related, 942–943
Oxygen therapy
in neurologic trauma management in small animals, 921

P
PaCO₂
in dogs and cats, 963–964
PaO₂
in dogs and cats, 963
PEEP. See Positive end-expiratory pressure (PEEP)
Penetrating trauma
to dogs and cats
emergency room management of
AFAST in, 776
TFAST in, 782–783
Pericardial effusion
in dogs and cats
TFAST in diagnosis of, 787–788
Pheochromocytoma
in dogs and cats, 886–887
Plasma products
in transfusion medicine, 745–748
Platelet products
in transfusion medicine, 748–749
Pleural effusion
in dogs and cats
TFAST in diagnosis of, 787–788
Pleural space disease
management of, 801–802
Pneumothorax
in dogs and cats
diagnosis of
TFAST in, 785
Poisoned small animals
emergency management and treatment of, 757–771
activated charcoal in, 761–762
multidose, 763
antidotal therapy in, 767
CNS support in, 765–766
Poisoned (continued)
  decontamination in, 758–761
  described, 757
  diagnostic testing in, 763
  fluid therapy in, 764–765
  gastrointestinal support in, 765
  hepatoprotectants in, 766–767
  patient history in, 758
  sedatives/reversal agents in, 766
  monitoring of, 770
Positive end-expiratory pressure (PEEP)
  in dogs and cats, 961–962
Potassium
  for emergent small animals, 725
Pressure control
  volume control vs.
    mechanical ventilation–related
      in dogs and cats, 959
Pressure support ventilation
  in dogs and cats, 960
Profiling and pattern recognition
  in respiratory emergencies management, 802
Propofol
  in emergent small animals, 945
Pulmonary parenchymal disease
  management of, 801
Pyelonephritis
  acute
    AKI due to
      management of, 852–854

R
RBC products. See Red blood cell (RBC) products
Red blood cell (RBC) products
  in transfusion medicine, 741–745
Respiratory distress
  described, 799
Respiratory emergencies
  management of, 799–815
    initial assessment and action steps in, 803–814
      blood gas analysis, 811–814
      hyperthermia control, 804–805
      inhaled therapy, 808–810
      intubation and PPV, 810
      laboratory evaluation, 811
      pharmacologic therapy, 807–808
      sedation/anxiolytic therapy, 804
      supplemental oxygen therapy, 803–804
      thoracentesis, 805–807
thoracic radiographs, ultrasound, or echocardiography, 811
tracheostomy, 810
lower airway disease, 800–801
patient history in, 803
pleural space disease, 801–802
profiling and pattern recognition in, 802
pulmonary parenchymal disease, 801
upper airway disease, 800
Respiratory monitoring
of emergent small animals, 706–709
Reversal agents
in advanced life support, 980
in poisoned small animal management, 766
in stabilization of emergent small animals, 944

S
Saline
hypertonic
for emergent small animals, 724
Sedative(s)
in poisoned small animal management, 766
Sodium
for emergent small animals, 724–725
Sodium bicarbonate
in advanced life support, 980–981
Spinal cord injury (SCI)
in small animals
management of
nonpharmacologic, 930–932
pharmacologic, 927
Surgical considerations
in emergent small animals, 899–914. See also Emergent patients, surgical considerations in
Synchronized intermittent mandatory ventilation (SIMV)
in dogs and cats, 960
Synthetic colloids
for emergent small animals, 732

T
TBW. See Total body water (TBW)
Temperature
monitoring of
in emergent small animals, 714–715
TFAST. See Thoracic FAST (TFAST)
Thiopental
in emergent small animals, 945
Thoracic FAST (TFAST)
for dogs and cats in emergency room, 782–788
Thoracic (continued)
for blunt and penetrating trauma, 782–783
in cardiac tamponade diagnosis, 788
in cardiovascular assessment, 791
in chest wall pathology diagnosis, 787
examination procedure, 783
in lung contusion diagnosis, 785–787
patient preparation and positioning for, 783–785
in pericardial effusion diagnosis, 787–788
in pleural effusion diagnosis, 787–788
in pneumothorax diagnosis, 785
Thromboembolism
aortic
  feline
    management of, 835–837
Thyroid storm
  in dogs and cats, 887–889
Thyrotoxicosis
  in dogs and cats, 887–889
Total body water (TBW)
  in emergent small animals, 722
Tranquilizers
  in stabilization of emergent small animals, 943
Transfusion medicine, 735–756
  blood components in, 741
  blood donor screening in, 736
  blood typing in
    advances in
      in cats, 737–738
      in dogs, 736–737
  collection and administration in, 739–741
  crossmatching in, 738–739
  described, 735–736
  plasma products in, 745–748
  platelet products in, 748–749
  RBC products in, 741–745
  risks of transfusion products in, 749–751
Trauma
  blunt. See Blunt trauma
  neurologic
    in small animals
      management of, 915–940. See also Neurologic trauma, in small animals
  penetrating. See Penetrating trauma
ultrasound in evaluation of
  for dogs and cats in emergency room, 773–797. See also Ultrasound, for dogs and cats in emergency room
Traumatic brain injury (TBI)
  in small animals
    management of
      nonpharmacologic, 929–930
      pharmacologic, 923–926
U

Ultrasound
for dogs and cats in emergency room, 773–797. See also Thoracic FAST (TFAST); specific procedures, e.g., Abdominal FAST (AFAST)
Upper airway disease
management of, 800
Ureteral obstruction
AKI due to
management of, 854
Urethral calculi
in dogs
AKI due to
management of, 860–864
Urinary tract emergencies
management of, 843–867
AKI, 843–867. See also Acute kidney injury (AKI)
Urine output
monitoring of
in emergent small animals, 715–716
Uroperitoneum
AKI due to
management of, 854–856
V
Vasopressors
in advanced life support, 978
Vet Blue
in cardiovascular assessment, 791
for dogs and cats in emergency room, 788–791
