

Index

Note: Page numbers of article titles are in **boldface** type.

A

Abnormal repetitive behaviors (ARBs)

in dogs and cats, **543–564**

compulsive disorders, 549–554. *See also* Compulsive disorders, in dogs and cats

evaluation of, 559–560

introduction, 543–545

management of, 555–559

adjustment in, 559–560

environmental modification in, 558–559

nonpharmacologic, 556–559

pharmacologic, 555–556

nature of problem, 545

OCDs, 547–548

recognizing/diagnosing of, 554–555

recurrence of, 559–560

stereotypies, 545–547

functions of, 546–547

neurobiology of, 547

terminology related to, 544

Acral lick dermatitis

in dogs and cats, 551–552

Adolescent behavior wellness appointments, 388–389

Aggression

canine

human-directed, **599–628**

behavioral causes of, 610–622

conflict aggression, 618–619

fear aggression, 610–617

impulsive behavior, 622

play aggression, 621

possessive aggression, 619

predatory aggression, 621–622

redirected aggression, 620–621

territorial aggression, 619–620

diagnosis of, 600–602

management of, 603–610

cessation in, 623–625

monitoring of, 623

prevention of

clinician's role in, 625

prognosis for, 602–603

introduction, 599–600

Aggression (*continued*)

feline

toward family members, **581–597**

assessment of, 586

basic information, 586

environmental information, 586

household pet information, 586

human family members and visitors, 586

incident information, 586

owner's role in, 586–587

auditory, 583–584

causes of, 587–589

communication related to, 582

domestication and, 582

early socialization in, 582

gathering information related to, 584–585

genetics in, 582

normal behavior related to, 582–584

prevention of, 593–594

relevance of, 581

social hierarchies and, 584

tactile, 584

treatment of, 589–593

visual, 583

intercat, **565–579**. *See also* Intercat aggression

Anxiety disorders

recognizing behavioral signs of

in cats, 509

in dogs, 508–509

ARBs. *See* Abnormal repetitive behaviors (ARBs)

B

Behavior(s)

disease-related pain effects on, **507–524**. *See also* Pain, disease-related, recognizing behavioral signs of

genetics and, **483–505**. *See also* Genetic(s), behavioral

heritableness of, 489–493

molecular approaches to, 492–493

normal

aggression and, 582–584

quantitative approaches to, 489–492

stress effects on, **525–541**. *See also* Stress, health and behavior effects of

Behavior modification

common sense strategies, **401–426**. *See also* Common sense behavior modification

Behavioral problems

medical problems–related, 382–383

triaging of, 381–382

Behavioral triage, **379–399**

for behavioral problems, 381–382

human–animal bond, 379–380

integration into general practice, 383–391

- adolescent behavior wellness appointments, 388–389
- benefits of, 383–384
- creating pet-friendly veterinary practice, 384–385
- first appointment, 385–388
- incorporating behavioral questions into standard history taking, 385
- intervention behavior services, 389–391
- preventive behavior services, 389
- senior behavior wellness appointments, 389
- introduction, 379–381
- pet relinquishment in, 380–381
- resources related to, 397–398
- team members in
 - defining roles of, 391–396
 - CAABs, 393
 - general practitioner, 392
 - qualified professional trainers, 394–396
 - veterinary behaviorist, 393
 - veterinary technician, 393–394
 - integration of, 396–397
- Blanket and flank sucking
 - in Doberman Pinschers, 553–554
- Body harnesses
 - in common sense behavior modification, 414–415

C

- CAABs. *See* Certified applied animal behaviorists (CAABs)
- Cat(s)
 - aggression among, **565–579**. *See also* Intercat aggression
 - toward family members, **581–597**. *See also* Aggression, feline, toward family members
 - anxiety disorders in
 - recognizing behavioral signs of, 509
 - ARBs in, **543–564**. *See also* Abnormal repetitive behaviors (ARBs), in dogs and cats
 - behavior of
 - providing species-appropriate information on
 - in common sense behavior modification, 402–403
 - body language of, 459–460
 - dental diseases and pain in
 - recognizing behavioral signs of, 518
 - dermatologic diseases and pain in
 - recognizing behavioral signs of, 517
 - endocrine diseases in
 - recognizing behavioral signs of, 517–518
 - enrichment in the home for, **427–435**. *See also* Enrichment, in the home, for cats
 - free-living
 - social structure of, 566–567
 - gastrointestinal diseases and pain in
 - recognizing behavioral signs of, 516
 - handling tools for, 473–478

Cat(s) (*continued*)

- in the kennel environment

- enrichment for, **442–446**. See also Enrichment, in the kennel environment, for dogs and cats

- multicat households, 567

- neurologic disorders in

- recognizing behavioral signs of, 512–513

- nocturnal activity in

- in common sense behavior modification, 424

- osteoarthritis and pain in

- recognizing behavioral signs of, 519

- palatable foods easily administered to, 463–464

- urogenital disorders in

- recognizing behavioral signs of, 513

- wood sucking and pica in, 554

Certified applied animal behaviorists (CAABs)

- defining roles of, 393

Chemical restraint

- in pet-friendly veterinary practice, 466

Classical conditioning

- defined, 404–405

Collar(s)

- in common sense behavior modification, 412–413

- types of, 412

Common sense behavior modification, **401–426**

- ancillary products in, 419–420

- described, 417–419

- environmental enrichment and exercise in, 420–421

- general principles in, 409–421

- how to get started, 409

- medical diagnostics, 409–410

- predictable interactions and consequences, 410–411

- questions to ask, 409

- reward-based training, 410–411

- tools and products, 411–417

- body harnesses, 414–415

- collars, 412–413

- crates and confinement tools, 415–417

- leashes, 411–412

- muzzles, 415

- trigger stimuli avoidance, 410

- introduction, 401–402

- learning principles in, 403–409

- constraints on learning, 403–404

- implementation of, 408–409

- terminology related to, 404–408

- timing and selection of rewards, 408–409

- problems related to, 421–424

- basic underlying tenets—associated, 421–422

- fear-based aggression toward unfamiliar dogs outside, 423

- intraspecific aggression toward familiar dogs, 422–423

- nocturnal activity in cats, 424
- species-appropriate information on dog and cat behavior in, 402–403
- Communication
 - feline aggression and, 582
- Compulsive disorders
 - in dogs and cats, 549–554
 - acral lick dermatitis, 551–552
 - blanket and flank sucking in Doberman Pinschers, 553–554
 - self-injurious behaviors, 552–553
 - tail chasing and spinning behaviors, 550–551
 - wood sucking and pica in cats, 554
- Confinement tools
 - in common sense behavior modification, 415–417
- Conflict aggression
 - canine, 618–619
- Counterconditioning
 - defined, 407–408
 - in pet-friendly veterinary practice, 462–463
- Crate(s)
 - in common sense behavior modification, 415–417
- D**
- Dental diseases
 - recognizing behavioral signs of
 - in dogs and cats, 518
- Dermatitis
 - acral lick
 - in dogs and cats, 551–552
- Dermatologic diseases
 - pain and
 - recognizing behavioral signs of, 516–517
 - in cats, 517
 - in dogs, 516–517
- Desensitization
 - defined, 408
- Doberman Pinschers
 - blanket and flank sucking in, 553–554
- Dog(s)
 - aggression in
 - human-directed, **599–628**. *See also* Aggression, canine, human-directed
 - anxiety disorders in
 - recognizing behavioral signs of, 508–509
 - ARBs in, **543–564**. *See also* Abnormal repetitive behaviors (ARBs), in dogs and cats
 - behavior of
 - providing species-appropriate information on
 - in common sense behavior modification, 402–403
 - blanket and flank sucking in, 553–554
 - body language of, 457–458
 - dental diseases and pain in
 - recognizing behavioral signs of, 518

Dog(s) (*continued*)

- dermatologic diseases and pain in
 - recognizing behavioral signs of, 516–517
 - endocrine diseases in
 - recognizing behavioral signs of, 517
 - enrichment in home for, **436–442**. *See also* Enrichment, in the home, for dogs
 - familiar
 - intraspecific aggression toward
 - in common sense behavior modification, 422–423
 - gastrointestinal diseases and pain in
 - recognizing behavioral signs of, 514–516
 - handling tools in, 468–472
 - in the kennel environment
 - enrichment for, **442–446**. *See also* Enrichment, in the kennel environment, for dogs and cats
 - neurologic disorders in
 - recognizing behavioral signs of, 511–512
 - osteoarthritis and pain in
 - recognizing behavioral signs of, 518–519
 - palatable foods easily administered to, 463
 - unfamiliar
 - fear-based aggression toward
 - in common sense behavior modification, 423
- Drug dosage chart, **629–632**

E

Endocrine diseases

- recognizing behavioral signs of
 - in dogs and cats, 517–518

Enrichment

- defined, 427
- goals of, 427–428
- in the home, **427–442**
 - for cats, **428–435**
 - ability to perform normal behaviors, 431–432
 - blocking access by other cats, 433
 - making a cat-friendly home, 428–435
 - outdoor environment-related, 432
 - privacy-related, 430–431
 - providing accessible and significant scratching places, 432–433
 - providing hiding places and vantage points, 433
 - providing outdoor toilets, 433–435
 - resources for, 430
 - space-related, 429–430
 - for dogs, **436–442**
 - ability to express normal behaviors, 438
 - exercise and mental stimulation, 441
 - feeding-related, 439
 - freedom from fear and stress, 440
 - garden- or yard-related, 441–442
 - making a dog-friendly home, **436–442**

- mental stimulation via play, 438–439
- space-related, 436–438
- toilet facilities access, 439
- training, 440–441
- introduction, 427–428
- in the kennel environment
 - for dogs and cats, **442–446**
 - described, 442–443
 - ease of hygiene maintenance, 444
 - ease of management, 444
 - freedom from fear and stress, 444
 - personnel requirements, 444–446
 - provision for appropriate species-specific stimulation, 443–444
 - spatial requirements, 443
 - toileting facilities, 443

Environment

- as factor in feline aggression, 586

Environmental enrichment

- in common sense behavior modification, 420–421

Epigenetics

- described, 496

Exercise

- in common sense behavior modification, 420–421

Extinction

- defined, 407

F

Fear aggression

- canine, 610–617

Food

- in common sense behavior modification, 420
- in pet-friendly veterinary practice, 463

Free-living cats

- social structure of, 566–567

G

Gastrointestinal diseases

- pain associated with
 - recognizing behavioral signs of, 513–516
 - in cats, 516
 - in dogs, 514–516

Gastrointestinal system

- stress effects on, 529–530

General practitioner

- defining roles of, 392

Genetic(s)

- behavioral, **483–505**
- epigenetics and, 496
- future directions in, 496–498
- genetic markers and canine studies, 494–495

Genetic(s) (*continued*)

- genotype vs. phenotype, 484–486

- introduction, 483–484

- measuring behavior in, 486–489

- in feline aggression, 582

Genetic markers

- canine studies, 494–495

H

Head collars

- in common sense behavior modification, 412–413

Health

- stress effects on, **525–541**. *See also* Stress, health and behavior effects of

Herbal supplements

- in common sense behavior modification, 420

Home

- dogs and cats in

- enrichment for, **436–442**. *See also* Enrichment, in the home

Human–animal bond

- in behavioral triage, 379–380

I

Immune system

- stress effects on, 529

Impulsive behavior

- canine, 622

Integument

- stress effects on, 530

Intercat aggression, **565–579**

- diagnosis of, 567–569

- identification of, 567–569

- introduction, 565–566

- management of, 569–576

- case example, 576

- medications in, 574–576

- punishment during social interventions in, 574

- separation in

- indications for, 572–573

- not recommended, 570–571

- prevention of, 577–578

- prognosis for, 576–577

Intervention behavior services, 389–391

K

Kennel environment

- dogs and cats in

- enrichment for, **442–446**. *See also* Enrichment, in the kennel environment, for dogs and cats

L

Leash(es)

- in common sense behavior modification, 411–412

- Low-stress handling
 - in veterinary practice
 - benefits of, 452
 - reasons for, 451–452

M

- Medical problems
 - underlying behavioral issues related to, 382–383
- Mental health
 - stress effects on, 530–532
- Multicat households, 567
- Muzzle(s)
 - in common sense behavior modification, 415

N

- Negative reinforcement
 - defined, 406
- Neurologic disorders
 - recognizing behavioral signs of, 510–513
 - in cats, 512–513
 - in dogs, 511–512
- Nutraceuticals
 - in common sense behavior modification, 420

O

- Obsessive-compulsive disorders (OCDs)
 - in dogs and cats, 547–548
 - vs. stereotypies, 548–549
- OCDs. *See* Obsessive-compulsive disorders (OCDs)
- Operant conditioning
 - defined, 405
- Osteoarthritis
 - recognizing behavioral signs of, 518–519
 - in cats, 519
 - in dogs, 518–519

P

- Pain
 - disease-related
 - recognizing behavioral signs of, **507–524**
 - anxiety disorders
 - in cats, 509
 - in dogs, 508–509
 - dental diseases, 518
 - dermatologic diseases, 516–517
 - endocrine diseases, 517–518
 - gastrointestinal diseases, 513–516
 - in cats, 516
 - in dogs, 514–516
 - introduction, 507–508
 - neurologic disorders, 510–513

Pain (*continued*)

- in cats, 512–513
- in dogs, 511–512
- osteoarthritis, 518–519
- urogenital disorders
 - in cats, 513

Pet-friendly veterinary practice, **451–481**

- appropriate handling results in
 - terminology associated with patients with, 462
- counterconditioning in, 462–463
- environmental comfort in, 452–456
 - assessment for, 452, 455–456
 - maximizing, 452–455
- foods in, 463–464
- handler language and attitude toward patient in
 - assessment for, 456
- handling strategy in, 452
 - creation of, 462
- handling tools in, 466–478
 - for cats, 473–478
 - for dogs, 468–472
- introduction, 451–452
- low-stress handling in, 451–452
 - benefits of, 452
 - reasons for, 451–452
- poor handling results in
 - terminology associated with patients with, 456
- restraint in
 - chemical, 466
 - guidelines for, 465
 - safe and effective, 464–465

Pet relinquishment, 380–381

Pheromones

- in common sense behavior modification, 419–420

Physical health

- stress effects on, 528–530

Play aggression

- canine, 621

Positive reinforcement

- defined, 405–406

Possessive aggression

- canine, 619

Predatory aggression

- canine, 621–622

Preventive behavior services, 389

Punishment

- defined, 406–407

Q

Qualified professional trainers

- defining roles of, 394–396

R

- Redirected aggression
 - canine, 620–621
- Repetitive behaviors
 - abnormal. *See* Abnormal repetitive behaviors (ARBs)
- Reproductive system
 - stress effects on, 529
- Restraint
 - in pet-friendly veterinary practice, 464–465. *See also* Pet-friendly veterinary practice, restraint in
- Reward-based training
 - in common sense behavior modification, 410–411

S

- Self-injurious behaviors
 - in dogs and cats, 552–553
- Senior behavior wellness appointments, 389
- Social health
 - stress effects on, 532
- Socialization
 - early
 - in feline aggression, 582
- Stereotypies
 - ARBs and
 - in dogs and cats, 545–547
 - vs. OCDs, 548–549
- Stress
 - health and behavior effects of, **525–541**
 - demands- and expectations-related, 535–536
 - introduction, 525–526
 - management of, 536–538
 - mental health, 530–532
 - physical health, 528–530
 - social health, 532
 - stress auditing and intervention management
 - principles of, 532–536
 - stress response assessment, 526–528
- Stress responses
 - assessment of, 526–528

T

- Tail chasing and spinning behaviors
 - in dogs and cats, 550–551
- Territorial aggression
 - canine, 619–620

U

- Urinary system
 - stress effects on, 529

Urogenital disorders
recognizing behavioral signs of
in cats, 513

V

Veterinary behaviorist
defining roles of, 393
Veterinary technician
defining roles of, 393–394

W

Wood sucking and pica
in cats, 554
