Index

Note: Page numbers of article titles are in **boldface** type.

A

Acinetobacter spp.

- HAIs related to, 225

AMR. **See** Antimicrobial resistance (AMR)

Animal bites and scratches

- in workplace, 418–420
  - prevention of, 420

Antimicrobial paradox, 363

Antimicrobial prophylaxis

- in SSIs prevention, 254–265

Antimicrobial resistance (AMR)

- approach to, 362
- described, 361–362
- management of
  - ASPs in. **See** Antimicrobial stewardship; Antimicrobial stewardship programs (ASPs)

Antimicrobial stewardship, **361–376**. **See also** Antimicrobial stewardship programs (ASPs)

- approach to, 362
- ASPs in, **361–376**
  - described, 363–365
  - in HAIs prevention, 227
  - introduction, 361–362
  - strategies in, 367–371
    - computer-based decision support, 371
    - development and implementation of guidelines, 368
    - educational approaches, 367–368
    - postprescription review, 370–371
    - preprescription approval, 369–370

Antimicrobial stewardship programs (ASPs), **361–376**. **See also** Antimicrobial stewardship

- antimicrobial susceptibility testing in
  - limited use of, 372–373
- economic sustainability of
  - barriers to, 372
- establishment of, 365–366
- goals of, 362
- implementation of
  - barriers to, 371–373
- lack of formally trained infectious disease specialists for, 372
- lack of standard methods and data to assess outcomes in, 373
- microbiology laboratory role in, 366–367
Antimicrobial (continued)
   outcomes of
      measurement of, 371
   scientific knowledge gaps in, 373
   strategies of, 367–371

ASPs. See Antimicrobial stewardship programs (ASPs)

B

Bacterial biofilms
   diagnosis of, 251–252
   lifecycle of, 251
   as risk factor for SSIs, 251–253
   treatment of, 252–253

Biofilm(s)
   bacterial. See Bacterial biofilms

Bite(s)
   in workplace, 418–420
      prevention of, 420

Bloodborne Pathogens Standard
   of OSHA
      in workplace safety, 416–417

Bloodstream infections
   hospital-associated, 220

Breach of duty
   in legal implications related to transmission of pet-associated zoonoses in veterinary practices, 396–397

Burden of proof
   in legal implications related to transmission of pet-associated zoonoses in veterinary practices, 397

C

C/D. See Cleaning and disinfection (C/D)

Causation
   in legal implications related to transmission of pet-associated zoonoses in veterinary practices, 397–398

Chemical disinfection
   of patient care items, 335–336

Cleaning and disinfection (C/D)
   environmental, 299–330. See also Environmental cleaning and disinfection (C/D)
   in HAIs prevention, 226
   of patient care items, 331–342
      approaches to, 333–336
      assessment of, 339
      contamination of multidose items, 340
      goals in, 333–336
      introduction, 331–332
      principles of, 332–333
      quality control/quality assurance measures in, 336–339
      reprocessing single use items, 339–340
principles of, 332–333
Compliance
  as risk factor for SSIs, 249
Contact precautions, 343–360
  compliance with, 352–354
  improving, 354–356
  monitoring of, 354

D
Damages
  in legal implications related to transmission of pet-associated zoonoses in veterinary
  practices, 398
Diarrhea
  infectious
    hospital-associated, 220
Disinfectant(s)
  in environmental C/D, 310–319
Disinfection. See Cleaning and disinfection (C/D)
Dry heat sterilization
  of patient care items, 334
Duty
  in legal implications related to transmission of pet-associated zoonoses in veterinary
  practices, 396

E
Education
  in HAIs prevention, 227–228
Employer responsibility
  in workplace safety, 412–413
Enterococcus spp.
  HAIs related to, 224
Environmental cleaning and disinfection (C/D), 299–330
  areas to be addressed, 306–310
  background of, 299–300
  disinfectant selection, 310–319
  facility design, 302–303
  general concepts, 303–306
  laundry, 319–320
  surveillance, 322–325
  waste management, 320–322
Environmental contamination
  in human hospitals, 300–301
  in veterinary hospitals, 301–302
Environmental surveillance
  in environmental C/D, 322–325
Escherichia coli
  HAIs related to, 223–224
Ethylene oxide
  in sterilization of patient care items, 334
G

Gloving
  technique and timing, 350–352
Gowning
  technique and timing, 350–352

H

HAIs. See Hospital-associated infections (HAIs)
Hand hygiene, 343–360
  basics of, 344–349
  compliance with, 352–354
    improving, 354–356
  in HAIs prevention, 226
  importance of, 343–344
  monitoring of, 354
  in SSIs prevention, 253–254
  technique and timing, 349–350
Hazard(s)
  in workplace, 417–421. See also specific types and Workplace, hazards in
Hazard Communication Standard
  of OSHA
    in workplace safety, 414–415
Hazardous drug exposures
  in workplace, 420–421
    prevention of, 421
Health care–associated infections
  in human medicine, 300
  in veterinary medicine, 301
Hospital-associated infections (HAIs)
  in small animal practice, 217–233
    approach to, 218–219
    bloodstream infections, 220
    challenges and risks associated with, 225
    control of
      goals in, 218–219
      epidemiology of, 219–225
      infectious diarrhea, 220
      introduction, 217–218
      multidrug-resistant organisms and, 222–225
      pathogens of concern, 221–222
      pneumonia, 219–220
    prevention of, 225–228
      antimicrobial stewardship in, 227
      C/D in, 226
      education and training in, 227–228
      hand hygiene in, 226
      infection-control officer/infection-control practitioner in, 228
      patient management in, 226–227
      PPE in, 226
surveillance in, 227
site of, 219–220
UTIs, 219
Hydrogen peroxide vapor sterilization
of patient care items, 334

I
Infection(s). See also specific types
hospital-associated, 217–233. See Hospital-associated infections (HAIs)
Infection control. See also Environmental cleaning and disinfection (C/D)
background of, 299–300
environmental C/D in, 299–330
surveillance systems in, 235–242. See also Surveillance; Surveillance systems
Infection-control officer/infection-control practitioner
in HAIs prevention, 228
Infection control risk assessment
defined, 278
Infectious diarrhea
hospital-associated, 220

L
Laundry
in environmental C/D, 319–320
Legal duties
of veterinarian, 394–395
Legal issues
zoonotic disease transmission–related
implications for veterinary practices, 393–408. See also Zoonoses, pet-associated,
transmission of, legal implications for veterinary practices
Liability
of veterinarian in transmission of pet-associated zoonoses, 395–396
Liquid immersion sterilization
of patient care items, 334–335

M
Malpractice
veterinary, 396
Microbiology laboratory
role in ASPs, 366–367

N
Needlestick injuries
in workplace
prevention of, 418
O

Occupational health
for veterinary health care team, 409–426. See also Workplace safety

Occupational Safety and Health Administration (OSHA)
Bloodborne Pathogens Standard of
in workplace safety, 416–417
in workplace safety, 409–426. See also Workplace safety
OSHA. See Occupational Safety and Health Administration (OSHA)

P

Patient care items
C/D of, 331–342. See also Cleaning and disinfection (C/D), of patient care items

Patient management, 277–298
admission, patient food, and belongings in, 281–282
approaches to, 280
examination areas, 283–294
patient care, 286
physical environment, 283–285
staff equipment and procedures, 285
general hospitalization routines in, 280–281
goals in, 280
in HAIs prevention, 226–227
housing, 282–294
of animals with confirmed or suspected infectious disease, 286–294
barrier nursing, 288–289
considerations common to barrier nursing and isolation, 292–293
full isolation, 289–292
non–PPE barriers, 293–294
basic, 282–283
cohorting of patients, 282–283
traffic patterns, 283
introduction, 277–278
risk assessment in, 278–280
routine practices in, 280–282

Personal protective equipment (PPE)
gowning and gloving technique and timing, 350–352
in HAIs prevention, 226
in workplace safety, 415–416

Pneumonia
hospital-associated, 219–220

PPE. See Personal protective equipment (PPE)
Pseudomonas spp.
HAIs related to, 225

Public health
veterinarian’s role in, 395

Q

Quality control/quality assurance measures
in C/D of patient care items, 336–339
Record-keeping, in workplace safety, 413–414
Respiratory protection, in workplace safety, 416
Risk assessment, 278–280
  defined, 278
  factors to be considered in, 278
  at patient level, 278–280
Safety
  workplace-related, 409–426. See also Workplace safety
  Salmonella spp.
    HAIs related to, 224–225
Scratch(es)
  in workplace, 418–420
  prevention of, 420
SSIs. See Surgical site infections (SSIs)
Staphylococcus spp.
  HAIs related to, 222–223
  methicillin-resistant S. pseudintermedius
    in veterinary hospital
      surveillance program for, 241
Steam sterilization
  of patient care items, 333–334
Sterilization
  of patient care items
    principles of, 332–333
    quality control/quality assurance measures in, 336–339
    types of, 333–336
Surgical site infections (SSIs), 243–276
  challenges and risks associated with, 248–253
  bacterial biofilms, 251–253
  compliance, 249
  TPLO, 250–251
  epidemiology of, 244–247
  incidence of, 244–246
  introduction, 243–244
  pathogens recovered from, 246–247
  prevention of, 253–266
    antimicrobial prophylaxis in, 254–265
    future directions in, 266
    hand hygiene in, 253–254
    low evidence-based but commonly accepted measures in, 266
    multimodal interventions in, 266
    terminology related to, 244
Surveillance
  defined, 236
Surveillance (continued)
    in environmental C/D, 322–325
    in HAIs prevention, 227
Surveillance systems, 235–242
    costs of, 240–241
    in infection control, 235–236
    methods, 236–238
    in veterinary hospitals, 235–242
        example of, 241
        future directions for, 239–240
        pros and cons of, 238–239

T
Tibial plateau leveling osteotomy (TPLO)
    SSIs related to, 250–251
TPLO. See Tibial plateau leveling osteotomy (TPLO)
Training
    in HAIs prevention, 227–228

U
Urinary traction infections (UTIs)
    hospital-associated, 219
UTIs. See Urinary traction infections (UTIs)

V
Veterinarian(s)
    legal duties of, 394–395
    public health role of, 395
Veterinary health care team
    workplace safety and health for, 409–426. See also Workplace safety
Veterinary hospitals
    environmental contamination in, 301–302

W
Waste management
    in environmental C/D, 320–322
Workplace
    hazards in, 417–421
        animal bites and scratches, 418–420
        prevention of, 420
        hazardous drug exposures, 420–421
        prevention of, 421
        sharps, 417–418
        injury prevention, 418
Workplace safety, 409–426
    general clinic prevention in, 410–417
        developing occupational safety and health program in, 410–411
occupational safety and health standards, 411–417
  Bloodborne Pathogens Standard, 416–417
  employer responsibility, 412–413
  Hazard Communication Standard, 414–415
  overview, 411–412
  PPE, 415–416
  record-keeping, 413–414
  respiratory protection, 416
  introduction, 409–410

Z

Zoonoses
  pet-associated
    epidemiology of, 379–382
    risks for immunocompromised and high-risk clients and staff, 377–392
      challenges related to, 382–383
      guidelines for ownership and contact, 385–387
      introduction, 377–378
      management of
        approach to, 378–379
        goals in, 378–379
        prevention of, 383–387
      transmission of
        legal implications for veterinary practices, 393–408
          approach to handling, 394–395
          bad employee, 402
          breach of duty–related, 396–397
          burden of proof–related, 397
          causation–related, 397–398
          challenges related to, 395–398
          client communication strategies, 402
          damages–related, 398
          duty–related, 396
          failure to advise clients on dangers of exotic, atypical, or high-risk pets, 400
          failure to advise clients on risky pet husbandry and care, 400–401
          failure to advise clients to seek care from physician, 401–402
          failure to avoid client exposures while in exam room, 400
          failure to recommend preventive measures, 399
          failure to take appropriate samples or quarantine an animal, 399–400
          introduction, 393–394
          liability issues, 395–396, 402–405
          malpractice–related issues, 396
          poor record–keeping, 398
          reporting requirements, 405
          work–related zoonotic infections, 402–404
          workers’ compensation and employee injuries, 404–405
        prevention of, 398–405

Zoonotic disease. See Zoonoses
