Index

Note: Page numbers of article titles are in **boldface** type.

A
Abdomen
  - minimally invasive surgery of, **507–522**
    - approach to, 510
    - complications of, 517–518
    - contraindications to, 508
    - controversies related to, 519
    - current concepts in, **507–522**
    - future considerations for, 519
    - indications for, 508
    - introduction, 507–508
    - outcomes of, 519
    - patient positioning for, 509–510
    - postoperative care, 518
    - preparation for, 509
    - reporting, follow-up, and clinical implications of, 519
  - technique/procedure for, 510–517
    - cholecystocentesis in, 512
    - feeding and/or drainage tubes in, 517
    - gastropexy, 517
    - kidney biopsy and nephrectomy, 513–514
    - laparoscopic adrenalectomy, 515
    - laparoscopic-assisted cystoscopic calculus removal, 516–517
    - laparoscopic-assisted gastrointestinal biopsies, 514
    - laparoscopic CC ablation, 515–516
    - laparoscopic cholecystectomy, 516
    - laparoscopic cryptorchid testicle removal, 515
    - laparoscopic EHPSS ligation, 516
    - laparoscopic ovariotomy, ovariohysterectomy, or ovarian remnant removal, 514–515
    - liver biopsy in, 511–512
    - lymph node extirpation, 513
    - pancreatic biopsy in, 512–513
    - spleen biopsy and splenectomy in, 513
  - Abdominal ultrasonography
    - in CPSSs diagnosis, 479–480
Acemannan
  - in wound healing, 549
Adrenalectomy
  - laparoscopic, 515
Alginate dressings
  - in wound healing, 556
Anesthesia/anesthetics
for thoracoscopy, 524–525
Antimicrobial agents
dressings with
in wound healing, 556–557
in perioperative patients, 585–608
biofilm, 597–602
de-escalating use of, 586–592
decontamination with, 602–604
mucous membranes preparation in, 603
skin preparation in, 602–603
wound sepsis in, 603–604
dosing regimen for, 592–602
pharmacokinetic/pharmacodynamic indices in
determining and achieving, 593–596
drug distribution to infection site, 596–597
introduction, 585–586
in wound management, 545–548
Antisepsis
defined, 602

B
Bile duct tumors
hepatobiliary surgery for, 467
Biofilm
in perioperative patients, 597–602
Bone marrow
MCTs in dogs effects on, 438

C
Cat(s)
injection site sarcomas in, 446
MCTs in, 441–442
CC ablation
laparoscopic. See Laparoscopic cisterna chyli (CC) ablation
Chemotherapy
for STSs, 444–445
Chitosan
in wound healing, 529–530
Cholangiocellular (bile duct) tumors
hepatobiliary surgery for, 467
Cholecystectomy
complications of, 470–472
laparoscopic, 516
Cholecystocentesis
in minimally invasive surgery of abdomen, 512
Cholecystoenterostomy/choledochoduodenostomy
complications of, 472
Choledochotomy/choledochal or cholecystostomy tubes
Complications of, 472–473
Collagen
   in wound healing, 530
Computed tomography (CT)
   in CPSSs diagnosis, 480
Congenital portosystemic shunts (CPSSs), 477–487
   current concepts in, 477–487
   diagnosis of, 478–480
      clinicopathologic findings in, 478–479
      imaging in, 479–480
   introduction, 477–478
   treatment of, 480–485
      outcomes of, 484–485
      postoperative, 483–484
      preoperative management in, 481
      technique/procedure in, 481–483
CPSSs. See Congenital portosystemic shunts (CPSSs)
CT. See Computed tomography (CT)
Cystoscopic calculus removal
   laparoscopic-assisted, 516–517

D
Dog(s)
   MCTs in, 437–441. See also Mast cell tumors (MCTs), in dogs
Dressing(s)
   in wound healing, 532–557. See also Wound healing

E
EEA staplers. See End-to-end anastomotic (EEA) staplers
EHPSS ligation. See Extrahepatic portosystemic shunt (EHPSS) ligation
Electrical stimulation
   in wound healing, 558–559
End-to-end anastomotic (EEA) staplers
   in soft tissue surgery, 454–455
ESWT. See Extracorporeal shock wave therapy (ESWT)
Extracorporeal shock wave therapy (ESWT)
   in wound healing, 557
Extrahepatic biliary surgery
   complications of, 469–473
      cholecystectomy-related, 470–472
      cholecystoenterostomy/choledochoduodenostomy–related, 472
      choledochotomy/choledochal or cholecystostomy tubes–related, 472–473
      cholecystotomy-related, 472
Extrahepatic portosystemic shunt (EHPSS) ligation
   laparoscopic, 516

F
Feeding and/or drainage tubes
   in minimally invasive surgery, 517
Feline injection site sarcomas, 446
Foam dressings
  in wound healing, 553

G
Gastrointestinal anastomosis (GIA) stapler
  in soft tissue surgery, 453–454
Gastrointestinal biopsies
  laparoscopic-assisted, 514
Gastropexy
  minimally invasive surgery for, 517
GIA stapler. See Gastrointestinal anastomosis (GIA) stapler
Growth factors
  in wound healing, 549

H
Hepatectomy
  partial
    perioperative considerations for, 468–469
Hepatic abscessation
  in hepatobiliary surgery, 465–466
Hepatic mass lesions
  hepatobiliary surgery for, 466–468
Hepatobiliary surgery, 463–475
  anatomic considerations in, 463–464
  current concepts in, 463–475
  extrahepatic biliary surgery
    complications of, 469–473
  hepatic abscessation in, 465–466
  for hepatic mass lesions, 466–468
  introduction, 463–464
  liver biopsy considerations in, 464–465
  outcomes of, 473
  partial hepatectomy
    perioperative considerations for, 468–469
Hepatocellular tumors
  hepatobiliary surgery for, 466–467
Honey
  in wound healing, 530
Hydrocolloid dressings
  in wound healing, 553
Hydrofiber dressings
  in wound healing, 553
Hydrogel
  in wound healing, 552–553
Hypberbaric oxygen
  in wound healing, 557
Hypertonic saline
  in wound healing, 552
I
Imaging systems
   novel
      in oncologic surgery, 446–447
Intercostal thoracotomy, 492–495. See also Lateral (intercostal) thoracotomy
Intestinal linear anastomosis stapler
   in soft tissue surgery, 453–454
Intraoperative mesenteric portography
   in CPSSs diagnosis, 479

K
Kidney biopsy
   minimally invasive surgery of abdomen in, 513–514

L
Laparoscopic adrenalectomy, 515
Laparoscopic-assisted cystoscopic calculus removal, 516–517
Laparoscopic-assisted gastrointestinal biopsies, 514
Laparoscopic cholecystectomy, 516
Laparoscopic cisterna chyli (CC) ablation, 515–516
Laparoscopic cryptorchid testicle removal, 515
Laparoscopic extrahepatic portosystemic shunt (EHPSS) ligation, 516
Laparoscopic ovariectomy, 514–515
Laser therapy
   in wound healing, 558
Lateral (intercostal) thoracotomy, 492–495
   anatomy related to, 492–493
   approach to, 494
   closure of, 494–495
   indications for, 492
LDS stapler. See Ligate-divide staple (LDS) stapler
Ligate-divide staple (LDS) stapler
   in soft tissue surgery, 455–456
Liver biopsy
   in minimally invasive surgery of abdomen, 511–512
Lung biopsy
   thoracoscopy and, 529
Lymph node(s)
   MCTs in dogs effects on, 438
Lymph node biopsy
   thoracoscopy and, 529
Lymph node extirpation
   minimally invasive surgery of abdomen in, 513

M
Magnetic resonance angiography (MRA)
   in CPSSs diagnosis, 480
Maltodextrin
Maltodextrin (continued)
in wound healing, 549
Mast cell tumors (MCTs)
in cats, 441–442
  current concepts in, 437–442
in dogs, 437–441
  bone marrow involvement with, 438
  introduction, 437
  lymph node status related to, 438–439
  nonsurgical management of, 441
  staging of, 437–438
  surgical treatment of, 439–441
  controversies related to, 440
  future considerations for, 440
  introduction, 439
  outcomes of
    cutaneous MCTs, 439–440
    subcutaneous MCTs, 440–441
MCTs. See Mast cell tumors (MCTs)
Median sternotomy, 495–501
  anatomy related to, 496
  closure of, 498–501
  indications for, 495–496
  procedure for, 496–498
Mediastinal biopsy
  thoracoscopy and, 528
Mediastinal debridement
  thorascopic, 530
Mediastinal mass removal
  thorascopic, 530
Mesenchymal tumors
  hepatobiliary surgery for, 467–468
Minimally invasive surgery
  of abdomen
    current concepts in, 507–522. See also Abdomen, minimally invasive surgery of
    of thorax, 523–535. See also Thorax, minimally invasive surgery of
MRA. See Magnetic resonance angiography (MRA)

N
Negative pressure wound therapy (NPWT), 565–584
  advantages of, 576–577
  care and monitoring of, 575
  complications of, 575–576
  contraindications to, 569–570
  current concepts in, 565–584
  described, 566
  disadvantages of, 576–577
  future considerations for, 577–578
  indications for, 569–570
  introduction, 565–566
material selection for, 570–573
mechanisms of action of, 566–569
origin of, 566
outcomes of, 577
technique/procedure for, 573–575
Nephrectomy
minimally invasive surgery of abdomen in, 513–514
Neuroendocrine tumors
hepatobiliary surgery for, 467
Nonadherent dressings
in wound healing, 532
NPWT. See Negative pressure wound therapy (NPWT)

O
Oncologic surgery, 437–449
current concepts in, 437–449
feline injection site sarcomas, 446
MCTs, 437–442. See also Mast cell tumors (MCTs)
novel imaging systems, 446–447
STSs, 442–446. See also Soft tissue sarcomas (STSs)
Ovarian remnant removal
laparoscopic, 514–515
Ovariectomy
laparoscopic, 514–515
Ovariohysterectomy
laparoscopic, 514–515

P
Pancreatic biopsy
in minimally invasive surgery of abdomen, 512–513
Partial hepatectomy
perioperative considerations for, 468–469
Pericardial biopsy
thoracoscopy and, 529
Pericardiectomy/pericardial window
thoracoscopic, 530
Perioperative patients
antimicrobial agents in, 585–608. See also Antimicrobial agents, in perioperative patients
Persistent right aortic arch (PRAA)
thoracoscopy for, 530–531
Platelet-derived products (PRPs)
in wound healing, 549
Pleural biopsy
thoracoscopy and, 528
Pneumolobectomy, 531–532
PRAA. See Persistent right aortic arch (PRAA)
PRPs. See Platelet-derived products (PRPs)
R
Radiation therapy
for STSs, 444

S
Sarcoma(s)
feline injection site, 446
soft tissue
    current concepts in, 442–446. See also Soft tissue sarcomas (STSs)
Scintigraphy
    in CPSSs diagnosis, 480
Shunt(s)
    congenital portosystemic, 477–487. See also Congenital portosystemic shunts (CPSSs)
Skin staplers
    in soft tissue surgery, 456–457
Soft tissue sarcomas (STSs)
    adjuvant therapy for, 444–445
    controversies related to, 445–446
    current concepts in, 442–446
    future considerations related to, 445–446
    introduction, 442
    staging of, 442–443
    surgical resection and margin considerations in, 443–444
Soft tissue surgery, 451–461
    facilitation of, 451–461
    introduction, 451
    stapling instruments in, 452–457
        conventional devices, 452–457
        EEA staplers, 454–455
        endoscopic, 457
        GIA and intestinal linear anastomosis staplers, 453–454
        LDS stapler, 455–456
        skin staplers, 456–457
        TA stapler, 452–453
        vascular clips, 456
    vessel sealing devices in, 457–458
Spleen biopsy
    in minimally invasive surgery of abdomen, 513
Splenectomy
    in minimally invasive surgery of abdomen, 513
Sternotomy
    median, 495–501. See also Median sternotomy
STSs. See Soft tissue sarcomas (STSs)
Sugar
    in wound healing, 530
Surgical antisepsis
    defined, 602
TA stapler. See Thoracoabdominal (TA) stapler
Therapeutic ultrasound
  in wound healing, 559–560
Thoracic duct ligation, 532
Thoracic surgery, 489–506
  approaches to, 491–503. See also specific types, e.g., Lateral (intercostal) thoracotomy
  controversies related to, 504
  future considerations for, 504
  lateral (intercostal) thoracotomy, 492–495
  median sternotomy, 495–501
  overview of, 489–491
  perioperative planning for, 491
  postoperative care, 503–504
  transdiaphragmatic thoracotomy, 501–503
Thoracoabdominal (TA) stapler
  in soft tissue surgery, 452–453
Thoracoscopy, 523–535
  aftercare, 533
  anesthesia for, 524–525
  approaches to, 527–528
  complications of, 533
  contraindications to, 524
  current concepts in, 523–535
  equipment for, 525–527
  future directions in, 534
  indications for, 524
  introduction, 523
  procedures, 528–532
    diagnostic, 528–529
    interventional, 529–532
      mediastinal debridement, 530
      mediastinal mass removal, 530
      pericardiectomy/pericardial window, 530
      pneumolobectomy, 531–532
      for PRAA, 530–531
      thoracic duct ligation, 532
Thoracotomy
  lateral, 492–495. See also Lateral (intercostal) thoracotomy
  transdiaphragmatic, 501–503. See also Transdiaphragmatic thoracotomy
Thorax
  minimally invasive surgery of, 523–535. See also Thoracoscopy
Transdiaphragmatic thoracotomy, 501–503
  closure of, 502
  indications for, 501–502
  procedure for, 502
  thoracostomy tube placement in, 502–503
Transparent films
  in wound healing, 556
Tripeptide-copper complex
in wound healing, 549
Tumor(s). See specific types, e.g., Mast cell tumors (MCTs)

U
Ultrasonography
abdominal
in CPSSs diagnosis, 479–480
therapeutic
in wound healing, 559–560

V
Vascular clips
in soft tissue surgery, 456
Vessel sealing devices
in soft tissue surgery, 457–458

W
Wound dressing
optimal
characteristics of, 532
Wound healing. See also Wound management
bandaging in, 531–557
alginate dressings, 556
antimicrobial dressings, 556–557
foam dressings, 553
hydrocolloid dressings, 553
hydrofiber dressings, 553
hydrogel, 552–553
hypertonic saline, 552
nonadherent dressings, 532
transparent films, 556
described, 531–532
electrical stimulation in, 558–559
ESWT in, 557
hyperbaric oxygen in, 557
laser therapy in, 558
stages of, 531
therapeutic ultrasound in, 559–560
Wound management, 537–564. See also Wound healing
antimicrobial agents in, 545–548
current concepts in, 537–564
debriement in, 538–545
described, 538
nonselective, 538–542
gauze sponges, 541–542
surgical debridement, 541
wound irrigation, 538–541
selective, 542–545
  autolytic debridement, 544–545
  biosurgical debridement, 542–544
  enzymatic debridement, 542
delayed
  factors contributing to, 548
initial, 537–538
introduction, 537
negative pressure, 565–584. See also Negative pressure wound therapy (NPWT)
  topical products in, 545–550
    acemannan, 549
    antimicrobial agents, 545–548
    chitosan, 529–530
    collagen, 530
    growth factors, 549
    honey, 530
    maltodextrin, 549
    PRPs, 549
    sugar, 530
    tripeptide-copper complex, 549
