Index

Note: Page numbers of article titles are in boldface type.

A

Abdominal distention
hypotension due to, 969
ABP. See Arterial blood pressure (ABP)
Acepromazine
cardiovascular actions of, 973
Acid-base and electrolyte disturbances
hypotension due to, 969
perioperative, 941–952
intraoperative derangements, 947–948
hypoxemia/hypercapnia, 947–948
introduction, 941–942
postoperative derangements, 948–950
hypernatremia, 948–949
RTA, 949–950
preoperative derangements, 943–947
hyperkalemia, 945–946
hypochloremic metabolic alkalosis, 946–947
lactic acidosis, 944–945
metabolic acidosis, 943–944

Acidosis
lactic, 944–945
metabolic, 943–944
renal tubular, 949–950
Acute resuscitative fluid therapy (ARFT)
in perioperative patient, 900
α2-Adrenergic agonists
cardiovascular actions of, 974
α2-Agonist(s)
in perioperative period, 1020–1021
Alfaxalone
in blood pressure management, 976
Alkalosis
metabolic
hypochloremic, 946–947
Analgesia/analgesics
in perioperative period, 1013–1027
adjuncts, 1021–1024
α2-agonists, 1020–1021
anticonvulsants, 1022–1023
creating plan for, 1015
introduction, 1013
Analgesia/analgesics (continued)
- local anesthetics, 1019–1020
- N-methyl-D-aspartate antagonists, 1022
- nonpharmacologic therapies with, 1024
- NSAIDs, 1018–1019
- opioids, 1015–1018
- serotonin–norepinephrine reuptake inhibitor, 1023
- TCAs, 1023

Anemia, 923–927
- clinical approach to patients with, 925–927
  - tissue oxygenation assessment in, 925–926
- CO and, 924
- described, 923–924
- oxygen delivery in patients with
  - methods for enhancing, 926–927
- oxygen extraction and, 925
- physiologic adaptations to, 924–925

Anesthesia/anesthetics
- effects on body temperature, 988
- hypotension during
  - causes of, 967–968
- induction of
  - blood pressure control during, 975
- inhalational, 976–977
- injectable, 975–976
- local
  - in perioperative period, 1019–1020
  - in spinal and epidural spaces
    - hypotension due to, 969

Angiogenesis
- in repair phase of wound healing, 1052

Antibiotic(s)
- in wound care, 1055–1056

Anticholinergic agents
- in blood pressure management, 970–971

Anticoagulant(s)
- perioperative use of, 1001–1002
  - risks associated with, 1003

Anticonvulsant(s)
- in perioperative period, 1022–1023

Antidepressant(s)
- tricyclic
  - in perioperative period, 1023

ARFT. See Acute resuscitative fluid therapy (ARFT)

Arginine
- in peri-surgical nutrition, 1068–1069

Arrhythmia(s)
- formation of
  - mechanisms of, 954–955
  - transient imbalances in, 955
perioperative
  diagnosis of, 955
  monitoring of, 959–961
  treatment of, 955–959
    clinical outcomes of, 959–961
    complications/concerns related to, 961–962
Arterial blood pressure (ABP)
  in perioperative patient
    as upstream endpoint, 906–907
Arteriolar tone
  rheologic control of
    in oxygen delivery, 920–921
Artificial airway management
  in respiratory nursing care, 1032–1037
    complications of, 1037
    coupage in, 1034
    endotracheal tube care in, 1036
    humidification in, 1034
    oral care in, 1036
    suctioning in, 1034–1036
    tracheostomy site care in, 1036
Aspiration
  intermittent
    in respiratory nursing care, 1038
Aspiration pneumonia
  patient care for, 1044
Assisted enteral nutrition, 1072–1076
Atelectasis
  lung
    patient care for, 1043–1044
Atropine
  in blood pressure management, 971

B
Bandaging
  in wound care, 1058–1061
    contact layer, 1059–1062
    intermediate and outer layers, 1061
Benzodiazepine(s)
  cardiovascular actions of, 973
  ketamine combined with
    in blood pressure management, 976
Bladder and bowel maintenance
  patient care in, 1044–1045
Blood pressure
  arterial
    in perioperative patient
      as upstream endpoint, 906–907
Blood (continued)
  central venous
    in perioperative patient
    as upstream endpoint, 907–909
described, 965

Blood pressure control. See also Blood pressure management perioperative, 965–981
cardiovascular actions of drugs for preanesthetic medication in, 973–974
hypotension during anesthesia
  causes of, 967–968
  induction of anesthesia and, 975
long-acting systems in, 967
short-acting systems in, 966–967
ultra-short-acting systems in, 966

Blood pressure management. See also Blood pressure control described, 966
perioperative, 965–981
  anticholinergics in, 970–971
  drugs for preanesthetic medication
    cardiovascular actions of, 973–974
  fluid therapy in, 970
  inhalational anesthetic drugs, 976–977
  injectable anesthetic drugs, 975–976
  opioids in, 974–975
  sympathomimetics in, 971–973

Blood viscosity
  variations in
    in oxygen delivery, 921–923

Body temperature
  anesthetic effects on, 988

Buprenorphine
  in blood pressure management, 975
  in perioperative period, 1018

Butorphanol
  in blood pressure management, 975

C
Cardiac output (CO)
  anemia related to, 924

Cardiovascular nursing care
  of perioperative patient, 1040–1042
    monitoring techniques in, 1040
    vascular catheter care and maintenance in, 1040–1042

Central and mixed venous oxygen saturation ($S_{CO_2}/S_{O_2}$)
  in perioperative patient
    as downstream endpoint, 909–911

Central venous blood pressure (CVP)
  in perioperative patient
    as upstream endpoint, 907–909
Chest drainage
  in respiratory nursing care, 1038

Chest tubes
  in respiratory nursing care, 1037–1038

Closed exhaust valve on anesthetic breathing system
  hypotension due to, 969

CO. See Cardiac output (CO)

Coagulation disturbances
  in perioperative setting
    diagnosis of, 999–1001

Cold therapy
  in perioperative period, 1024

Continuous suction/aspiration
  in respiratory nursing care, 1038

Core temperature
  peripheral temperature vs., 986–987

Coupage
  in respiratory nursing care, 1034

CVP. See Central venous blood pressure (CVP)

D

Debridement
  in wound care, 1055
    in wound healing, 1050

Decubital ulcers
  patient care for, 1042–1043

Dexmedetomidine
  cardiovascular actions of, 974

Dobutamine
  in blood pressure management, 973

Dopamine
  in blood pressure management, 971–972

Drain(s)
  in wound care, 1058

E

Electrolyte and acid-base disturbances
  perioperative, 941–952. See also Acid-base and electrolyte disturbances

Embolism
  pulmonary
    hypotension due to, 970

Endotracheal tube care
  in respiratory nursing care, 1036

Enteral nutrition
  assisted, 1072–1076

Enteral support
  in peri-surgical nutrition, 1068–1070

Ephedrine
  in blood pressure management, 972
Epinephrine
  in blood pressure management, 972
Epithelialization
  in repair phase of wound healing, 1052
Etomidate
  in blood pressure management, 976

F
Fentanyl
  in perioperative period, 1016
Fibroplasia
  in repair phase of wound healing, 1051–1052
Fluid balance
  intraoperative, 901–902
  in perioperative patient
    assessment of, 895–915
      controversies related to, 911–912
      future considerations in, 911–912
      introduction, 895–896
      microcirculation-related, 911
      monitoring in, 896–897
      physical examination in, 898–899
      described, 897–898
    postoperative, 902
    preoperative, 901
Fluid therapy
  in blood pressure management, 970
  in perioperative patient
    approach to, 895–915
      ARFT in, 900
      controversies related to, 911–912
      described, 899–900
      future considerations in, 911–912
      goal-directed therapy in, 905–906
      introduction, 895–896
      IV fluid types in, 902–904
      maintenance fluid therapy in, 900
      rehydration fluid therapy in, 900
      resuscitation endpoints in, 905–906
        downstream endpoints, 909–911
        upstream endpoints, 906–909
      complications of
        risk factors for, 904

G
Glutamine
  in peri-surgical nutrition, 1069
Glycopyrrolate
  in blood pressure management, 971
Goal-directed therapy
  in perioperative patient
  fluid therapy–related, 905–906

H
Hb. See Hemoglobin (Hb)
Heart rate
  perioperative monitoring of, 953–963. See also Arrhythmia(s)
    introduction, 953–955
Heart rhythm
  perioperative monitoring of, 953–963. See also Arrhythmia(s)
    introduction, 953–955
Heat conservation
  mechanisms of, 989–991
  techniques of, 989–991
    active techniques, 990
    complications of, 991
    metabolic techniques, 990–991
    passive techniques, 990
Heat loss
  mechanisms of, 987–988
  patterns of, 986–987
Hematocrit
  variations in
    in oxygen delivery, 921–923
Hemoglobin (Hb)
  in oxygen delivery, 919–920
Hemostasis
  postoperative, 995–1011
    introduction, 995–996
    perioperative planning in, 1003–1005
    surgery-specific modifications in, 1002–1003
    surgical stress and, 996
Heparin(s)
  perioperative use of, 1001–1002
Humidification
  in respiratory nursing care, 1034
Hydration
  in perioperative patient
    physical examination in assessment of, 898–899
Hydromorphone
  in blood pressure management, 974–975
Hypercapnia
  hypotension due to, 968–969
Hypercoagulability
  postoperative
    in veterinary medicine, 997–998
Hyperkalemia, 945–946
Hypernatremia, 948–949
Hypersensitivity reaction
  hypotension due to, 970
Hypochloremic metabolic alkalosis, 946–947
Hypotension
  causes of, 968–970
    abdominal distention, 969
    during anesthesia, 967–968
    closed exhaust valve on anesthetic breathing system, 969
    electrolyte and acid/base imbalances, 969
    hypercapnia, 968–969
    hypersensitivity reaction, 970
    hypothermia, 970
    hypoxemia, 968
    intermittent positive pressure ventilation, 969
    local anesthetics in spinal and epidural spaces, 969
    pulmonary embolism, 970
    surgical procedures and position of animal, 969
    tension pneumothorax, 969
  indirect indicators of, 968
Hypothermia
  deleterious effects of, 988–989
  hypotension due to, 970
  inadvertent perianesthetic
    in small animal patients, 983–994
  mechanisms of, 987–988
  minimizing
    techniques in
      indications for, 989
    response to, 984–986
Hypoventilation
  respiratory-related surgical procedures and, 937–939
Hypoxemia
  hypotension due to, 968
Hypoxemia/hypercapnia, 947–948
Hypoxia
  respiratory-related surgical procedures and, 933–937

I
Immunonutrition
  in human patients
    critically ill patients, 1071–1072
    elective surgery patients, 1070–1071
    impact of, 1070–1072
  in peri-surgical nutrition, 1068–1070
  in veterinary patients, 1072
Inadvertent perianesthetic hypothermia
  in small animal patients, 983–994
Infection(s)
  as factor in wound healing, 1052–1053
Inhalational anesthetic drugs
  in blood pressure management, 976–977
Inotrope(s)
  in blood pressure management, 971–973
Intermittent aspiration
  in respiratory nursing care, 1038
Intermittent positive pressure ventilation hypotension due to, 969
Intravenous (IV) fluid(s)
  types of
    in perioperative patient, 902
Isoflurane
  in blood pressure management, 976
IV. See Intravenous (IV)

K
Ketamine/benzodiazepine combination
  in blood pressure management, 976

L
Lactate
  in perioperative patient
    as downstream endpoint, 909
Lactic acidosis, 944–945
Laser therapy
  low-level
    in perioperative period, 1024
Lavage
  in wound care, 1054–1055
Local anesthetics
  in perioperative period, 1019–1020
  in spinal and epidural spaces
    hypotension due to, 969
Location
  as factor in wound healing, 1053
Low-level laser therapy
  in perioperative period, 1024
Lung atelectasis
  patient care for, 1043–1044

M
Maintenance fluid therapy
  in perioperative patient, 900
Medetomidine
  cardiovascular actions of, 974
Medication(s)
  as factor in wound healing, 1053
Meperidine
  in blood pressure management, 974
Metabolic acidosis, 943–944
Metabolic alkalosis
  hypochloremic, 946–947
Metabolic diseases
  as factor in wound healing, 1054
Methadone
  in blood pressure management, 974–975
N-Methyl-D-aspartate antagonists
  in perioperative period, 1022
Microcirculation
  in perioperative patient
    direct assessment of, 911
Morphine
  in blood pressure management, 974

N
Negative pressure wound therapy (NPWT), 1058
Nitrous oxide
  in blood pressure management, 977
Nonanalgesic drugs
  in perioperative period, 1024
Nonsteroidal anti-inflammatory drugs (NSAIDs)
  in perioperative period, 1018–1019
Norepinephrine
  in blood pressure management, 972
NPWT. See Negative pressure wound therapy (NPWT)
NSAIDs. See Nonsteroidal anti-inflammatory drugs (NSAIDs)
Nursing care
  of perioperative patient, 1029–1048
    cardiovascular-related, 1040–1042. See also Cardiovascular nursing care
    considerations related to, 1039–1040
    developing plans for, 1029–1032
      assessment-related, 1030
      described, 1030, 1032
      technician conclusion-related, 1030–1032
    evaluation of, 1032
    implementation of plans, 1032
    introduction, 1029
    recumbent patient care, 1042–1045. See also Recumbent patient care
      renal-related, 1045–1047. See also Renal nursing care
      respiratory-related, 1032–1038. See also Respiratory nursing care
Nutrition
  as factor in wound healing, 1053
  in hospitalized surgical patients, 1067–1068
  in patient care, 1045
  peri-surgical, 1067–1084. See also Peri-surgical nutrition
O

Omega-3 fatty acids
in peri-surgical nutrition, 1069–1070

Opioid(s)
in blood pressure management, 974–975
in perioperative period, 1015–1018

Oral care
in respiratory nursing care, 1036

Oxygen delivery, 917–923
in anemic patients
methods for enhancing, 926–927
Hb in, 919–920
introduction, 917
microvascular determinants of, 920–923
plasma skimming, 923
precapillary oxygen delivery, 921
rheologic control of arteriolar tone, 920–921
variations in hematocrit and blood viscosity, 921–923
precapillary, 921
RBCs in, 917

Oxygen extraction
anemia related to, 925

Oxygenation
surgical procedures for
hypoventilation related to, 937–939
hypoxia related to, 933–937
ventilation and, 931–940

Oxygenation and ventilatory failure
combined, 939

Oxymorphone
in blood pressure management, 974–975

P

Pain
perioperative
diagnosis of, 1014–1015
treatment of
reasons for, 1013–1014

Parenteral support
in peri-surgical nutrition, 1076–1079

Perfusion
in perioperative patient
physical examination in assessment of, 898–899

Peri-surgical nutrition, 1067–1084
arginine in, 1068–1069
assisted enteral nutrition in, 1072–1076
enteral support and immunonutrition in, 1068–1070
glutamine in, 1069
omega-3 fatty acids in, 1069–1070
parenteral support in, 1076–1079
Perioperative patients. See specific disorders and agents in Perioperative period. See specific disorders and agents during Perioperative period.

Peripheral temperature
  core temperature vs., 986–987

Phenylephrine
  in blood pressure management, 973

Piloerection
  defined, 985

Plasma skimming
  in oxygen delivery, 923

Pneumonia(s)
  aspiration
    patient care for, 1044

Pneumothorax
  tension
    hypotension due to, 969

Postoperative fluid balance, 902

Precapillary oxygen delivery, 921

Preoperative fluid balance, 901

Propofol
  in blood pressure management, 975–976

Pulmonary embolism
  hypotension due to, 970

R

Radiation therapy
  as factor in wound healing, 1054

RBCs. See Red blood cells (RBCs)

Recumbent patient care
  of perioperative patient, 1042–1045
    aspiration pneumonia and, 1044
    bladder and bowel maintenance and, 1044–1045
    decubital ulcers and, 1042–1043
    lung atelectasis and, 1043–1044
    nutrition and, 1045

Red blood cells (RBCs)
  in oxygen delivery, 917

Rehydration fluid therapy
  in perioperative patient, 900

Renal nursing care
  of perioperative patient, 1045–1047
    ins and outs, 1045
    quantifying urine production in, 1045–1046
    urinary catheter care and maintenance in, 1046–1047
    urinary collection system in, 1046–1047

Renal tubular acidosis (RTA), 949–950

Respiratory concerns
  evaluation of, 931–932
  prediction of, 931–932
  surgical procedures for
immediate postoperative support, 933
  types of, 932–933
Respiratory nursing care
  of perioperative patient, 1032–1038
    artificial airway management in, 1032–1037
    chest drainage in, 1038
    chest tubes in, 1037–1038
    continuous suction/aspiration in, 1038
    intermittent aspiration in, 1038
Resuscitation
  in perioperative patient
    fluid therapy–related, 905–911. See also Fluid therapy, in perioperative patient
Rheologic control of arteriolar tone
  in oxygen delivery, 920–921
Rhythm
  heart
    perioperative monitoring of, 953–963. See also Arrhythmia(s)
RTA. See Renal tubular acidosis (RTA)

S
S\textsubscript{uv}O\textsubscript{2}/S\textsubscript{v}O\textsubscript{2}. See Central and mixed venous oxygen saturation (S\textsubscript{uv}O\textsubscript{2}/S\textsubscript{v}O\textsubscript{2})
Second intention healing, 1057–1058
Serotonin–norepinephrine reuptake inhibitor
  in perioperative period, 1023
Sevoflurane
  in blood pressure management, 976
Shivering
  defined, 985
Shock index
  in perioperative patient
    as upstream endpoint, 907
Species differences
  as factor in wound healing, 1054
Stress
  surgical. See Surgical stress
Suctioning
  in respiratory nursing care, 1034–1036
Surgical stress
  hemostatic response to, 996
  postoperative
    comorbidities exacerbating, 998–999
    postoperative thrombophilia related to, 996–997
Sympathomimetics
  in blood pressure management, 971–973

T
Tapentadol
  in perioperative period, 1018
TCAs. See Tricyclic antidepressants (TCAs)
Temperature
   body
      anesthetic effects on, 988
      core vs. peripheral, 986–987
Tension pneumothorax
   hypotension due to, 969
Thermoregulation
   physiology of, 984–986
Thiopental
   in blood pressure management, 975
Thromboembolism
   venous
      postoperative, 995–1011. See also Hemostasis, postoperative; Venous thromboembolism (VTE)
Thrombolytic therapy
   perioperative use of
      risks associated with, 1003
Thrombophilia
   postoperative surgical stress and, 996–997
Tiletamine/zolazepam combination
   in blood pressure management, 976
Tissue oxygenation
   in anemia patients
      assessment of, 925–926
      methods for enhancing oxygen delivery in, 926–927
      determinants of, 917–918
Tracheostomy site care
   in respiratory nursing care, 1036
Tramadol
   in perioperative period, 1018
Transient imbalances
   in arrhythmia formation, 955
Tricyclic antidepressants (TCAs)
   in perioperative period, 1023

U
Ulcer(s)
   decubital
      patient care for, 1042–1043
Urinary catheter care and maintenance
   in renal nursing care, 1046–1047
Urinary collection system
   in renal nursing care, 1046–1047
Urine production
   quantification of
      in renal nursing care, 1045–1046

V
Vascular catheter care and maintenance
   in cardiovascular nursing care, 1040–1042
Vasopressor(s)
  in blood pressure management, 971–973
Venoarterial CO₂ gradient
  in perioperative patient
    as downstream endpoint, 911
Venous thromboembolism (VTE)
  mortality related to, 995
    postoperative, 995–1011. See also Hemostasis, postoperative
Ventilation
  oxygenation and, 931–940
Ventilatory and oxygenation failure
  combined, 939
VTE. See Venous thromboembolism (VTE)

W
Wound care, 1049–1065. See also Wound healing
  antibiotic coverage in, 1055–1056
  bandaging in, 1058–1061
  debridement in, 1055
  drains in, 1058
  introduction, 1049
  lavage in, 1054–1055
  novel treatments in, 1061, 1063
  wound environment in, 1056–1057
Wound closure, 1057–1058
  delayed primary or secondary closure, 1057
  NPWT in, 1058
  primary closure, 1057
  second intention healing, 1057–1058
Wound environment
  in wound care, 1056–1057
Wound healing. See also Wound care
  factors affecting, 1052–1054
    infection, 1052–1053
    location, 1053
    medications, 1053
    metabolic diseases, 1054
    nutrition, 1053
    radiation therapy, 1054
    species differences, 1054
  phases of, 1049–1052
    debridement phase, 1050
    inflammatory phase, 1050
