Index

Note: Page numbers of article titles are in **boldface** type.

A

Abdomen cancer
  CT for surgical planning in, 507
  CT in staging of, 506–507

Ablation
  IO in, 558–559

Abscess(es)
  pancreatic
    ultrasound appearance of, 472
  Antegrade urethral catheterization, 590–591

B

Balloon dilation
  in IR, 546–548

Benign ureteral obstruction
  IR for, 577–587
    canine ureteral stenting, 583–584
    feline ureteral stenting, 580–583
    percutaneous nephrostomy tube placement, 577–578
    subcutaneous ureteral bypass device in cats, 578–580
    traditional ureteral surgery, 577

Bicipital tenosynovitis
  MRI of, 426–428

Bile duct
  normal ultrasound appearance of, 455

Biliary disease
  ultrasound appearance of, 461–465

Biliary tract
  inflammation of
    CT and MRI of, 488–490
  neoplasia of
    CT and MRI of, 485–487

Biopsy
  in IR, 543

C

Cancer
  diagnosis of
    PET/CT in, 520–522
  staging of
Cancer (continued)
CT in
- abdomen, 506–507
- head and neck, 503–505
- thorax, 499–500
PET/CT in, 520–523

Carpus
CT of, 391–395
MRI of, 443–445
- infections, 445
- trauma-related, 444–445

Cat(s)
musculoskeletal diseases in
CT of, 407–408
pancreatitis in
- ultrasound appearance of, 470–472
subcutaneous ureteral bypass device in
IR for benign ureteral obstruction and, 578–580
ureteral stenting in
IR for benign ureteral obstruction and, 580–583

Chemoembolization
IO in, 556–558

Chemotherapy
intra-arterial
IO in, 555–556

Chronic kidney disease/protein-losing nephropathy
intra-arterial stem cell delivery for
IR for, 573–574

Coil(s)
in IR, 545–546

Computed tomography (CT)
of elbow, 382–391
of hepatobiliary system and pancreas, 481–497
- abnormal conditions, 485–494
  - hepatic lipidosis, 487–488
  - inflammation of liver and biliary tract, 488–490
  - inflammation of pancreas, 490–494
  - neoplasia of liver and biliary tract, 485–487
  - neoplasia of pancreas, 490
- introduction, 481–482
- normal systems, 482–484

of musculoskeletal system, 373–420
- applications, 376–411
- of carpus, manus, and pes, 391–395
- coxofemoral joints, 395–399
- feline musculoskeletal diseases, 407–408
- introduction, 373–376
- oncology-related, 404–406
- pearls, pitfalls, and variants of, 411
- shoulder, 376–382
- stifle, 399–403
what referring veterinarian needs to know, 411–413
in oncology, 499–513 (See also specific cancer sites, e.g., Head and neck)
for cancer staging, 499–500
abdomen, 506–507
head and neck cancer, 503–505
thorax, 499–500
CT simulation for radiation therapy planning, 502–503
simulation for radiation therapy planning
abdomen, 507–508
head and neck, 506
thorax, 502–503
for surgical planning
abdomen, 507
head and neck, 506
thorax, 500–502
Contrast-enhanced ultrasound
of hepatobiliary system, 465–467
of pancreas, 474–475
Coxofemoral joints
  CT of, 395–399
CT. See Computed tomography (CT)
Cystostomy tube placement
  for urethral obstruction, 587–589
Cystourethrography
  diagnostic
    IR of urinary bladder and urethra and, 587

D
Device occlusion
  in IR, 545–546
Diagnostic cystourethrography
  IR of urinary bladder and urethra and, 587
Dog(s)
  acute pancreatitis in
    ultrasound appearance of, 469–470
  benign ureteral obstruction in
    ureteral stenting for, 583–584
  chronic pancreatitis in
    ultrasound appearance of, 470
  malignant ureteral obstruction in
    IR for, 585–587
Dysplasia(s)
  of elbow joint
    MRI of, 434–436

E
Edema
  pancreatic
    ultrasound appearance of, 472
Elastography
of hepatobiliary system, 467

Elbow
CT of, 382–391

Elbow joint
MRI of, 431–437
dysplasia, 434–436
introduction, 431–433
neoplasia, 436–437

Embolic s
in IR, 544–545

Embolotherapy
IO in, 556–558

Endoscopic nephrolithotomy (ENL)
for nephrolithiasis, 569–571

Endosonography
of pancreas, 474

ENL. See Endoscopic nephrolithotomy (ENL)
ESWL. See Extracorporeal shock-wave lithotripsy (ESWL)

Extracorporeal shock-wave lithotripsy (ESWL)
for nephrolithiasis, 568–569

Extraction procedures
in IR, 543

F
F-18 FDG. See 2-deoxy-2-18F-Fluorodeoxyglucose (F-18 FDG)

Fluid drainage
IO in, 561–562

2-deoxy-2-18F-Fluorodeoxyglucose (F-18 FDG)
in PET/CT, 516–517
pitfalls of, 529–531
uses for, 528

Fluoroscopy
in IR, 536–538

Focal pancreatic disease
ultrasound appearance of, 472–474

G

Gallbladder
normal ultrasound appearance of, 455

Gastrocnemius
ultrasound imaging of, 365–366

H

Head and neck cancer
CT for surgical planning, 506
CT in staging of, 503–505
CT simulation for radiation therapy planning, 506
Hepatic lipidosis
CT and MRI of, 487–488

Hepatobiliary system
CT and MRI of, 481–497 (See also Computed tomography (CT), of hepatobiliary system and pancreas; Magnetic resonance imaging (MRI), of hepatobiliary system and pancreas)
ultrasound of, 453–467 (See also Liver, ultrasound of; Ultrasound, of hepatobiliary system)

Hyperplasia
pancreatic nodular
ultrasound appearance of, 472

Idiopathic renal hematuria (IRH)
IR for, 571–573
sclerotherapy, 571–572
ureteroscopy, 573

Iliopsoas/hip
ultrasound imaging of, 367–368

Infection(s)
carus-related
MRI of, 445
shoulder-related
MRI of, 429

Interventional oncology (IO), 553–565
anatomy knowledge in, 554
in fluid drainage, 561–562
imaging diagnostics in, 554
in locoregional therapies, 555–559
ablation, 558–559
embolization/chemoembolization, 556–558
intra-arterial chemotherapy, 555–556
overview of, 553–554
patient selection for, 554–555
procedures, 555–562
in stenting of malignant obstructions, 559–561

Interventional radiology (IR), 535–552
equipment for, 536–541
drainage catheters, 541
fluoroscopy, 536–538
needles, sheaths, catheters, and wires, 538–540
introduction, 535–536
for malignant ureteral obstruction
in dogs, 585–587
techniques, 541–551
balloon dilation, 546–548
biopsy, snare, and extraction procedures, 543
coil or device occlusion, 545–546
stents, 548–551
targeted therapeutics, sclerosants, and embolics, 544–545
Interventional (continued)

vascular access
arterial, 542–543
venous, 541–542
of urinary tract, 567–596 (See also specific sites and Urinary tract, IR of)
Intra-arterial chemotherapy
IO in, 555–556
Intra-arterial stem cell delivery for chronic kidney disease/protein-losing nephropathy
IR for, 573–574
IO. See Interventional oncology (IO)
IR. See Interventional radiology (IR)
IRH. See Idiopathic renal hematuria (IRH)

K

Kidney(s)
IR of, 568–574
for intra-arterial stem cell delivery for chronic kidney disease/protein-losing nephropathy, 573–574
for IRH, 571–573
for nephrolithiasis, 568–571

L

Lesion(s)
non-neoplastic
PET/CT for, 522–523
questionable
PET/CT in diagnosis and staging of, 522
Lipidosis
hepatic
CT and MRI of, 487–488
Liver
abnormal
ultrasound appearance of, 455–461
decreased hepatic echogenicity, 457–461
diffuse disease, 455–457
contrast-enhanced ultrasound evaluation of, 465–467
inflammation of
CT and MRI of, 488–490
neoplasia of
CT and MRI of, 485–487
normal
ultrasound appearance of, 453–454
ultrasound of, 453–467 (See also Ultrasound, of hepatobiliary system)
Lymphoma
PET/CT in diagnosis and staging of, 522

M

Magnetic resonance imaging (MRI)
of hepatobiliary system and pancreas, 481–497
abnormal conditions, 485–494
hepatic lipidosis, 487–488
inflammation of liver and biliary tract, 488–490
inflammation of pancreas, 490–494
neoplasia of liver and biliary tract, 485–487
neoplasia of pancreas, 490
introduction, 481–482
normal systems, 482–484
of musculoskeletal system, 421–451 (See also specific sites, e.g., Shoulder joint, MRI of)
carpus, 443–445
elevator joint, 431–437
introduction, 421–422
shoulder joint, 422–431
stifle joint, 438–442
tarsus, 446–450
Malignant ureteral obstruction
in dogs
IR for, 585–587
Manus
CT of, 391–395
Mast cell tumors
PET/CT in diagnosis and staging of, 522
Menisci
MRI of, 441
Metastasis
PET/CT in diagnosis and staging of, 522
MRI. See Magnetic resonance imaging (MRI)
Musculoskeletal disease
feline
CT of, 407–408
Musculoskeletal system
MRI of, 421–451 (See also Magnetic resonance imaging (MRI), of musculoskeletal system)
ultrasound imaging of, 355–371
See also Ultrasound, of musculoskeletal system
N
Nasal tumors
CT in staging of, 503–504
PET/CT for, 525–526
Neck tumors
CT in staging of, 505
Neoplasia(s)
of elbow joint
MRI of, 436–437
of liver and biliary tract
CT and MRI of, 485–487
of pancreas
CT and MRI of, 490
ultrasound appearance of, 473–474
of shoulder joint
Neoplasia(s) (continued)
  MRI of, 429–430
  of stifle joint
    MRI of, 441–442
  of tarsus
    MRI of, 450
Nephrolithiasis
  IR for, 568–571
    ENL, 569–571
    ESWL, 568–569
Nephrolithotomy
  endoscopic
    for nephrolithiasis, 569–571
Non-neoplastic lesions
  PET/CT for, 522–523

O

Oncology
  CT in, 499–513 (See also specific cancer sites, e.g., Head and neck)
  interventional, 553–565 (See also Interventional oncology (IO))
Oral squamous cell carcinoma
  radiation treatment planning for
    PET/CT in, 524–525
Oral tumors
  CT in staging of, 503–504
Osteochondrosis
  of shoulder joint
    MRI of, 424
  of tarsus
    MRI of, 446–450
Osteosarcoma
  PET/CT in diagnosis and staging of, 522

P

Pancreas
  CT and MRI of, 481–497 (See also Computed tomography (CT), of hepatobiliary system and pancreas; Magnetic resonance imaging (MRI), of hepatobiliary system and pancreas)
  inflammation of
    CT and MRI of, 490–494
  neoplasia of
    CT and MRI of, 490
  normal appearance of, 469
  ultrasound of, 467–474 (See also Ultrasound, of pancreas)
Pancreatic abscess
  ultrasound appearance of, 472
Pancreatic disease
  focal
    ultrasound appearance of, 472–474
  ultrasound appearance of, 469
Pancreatic edema  
ultrasound appearance of, 472

Pancreatic neoplasia  
ultrasound appearance of, 473–474

Pancreatic nodular hyperplasia  
ultrasound appearance of, 472

Pancreatic pseudocyst  
ultrasound appearance of, 472

Pancreatitis  
acute  
ultrasound appearance of, 469–470
chronic  
ultrasound appearance of, 470
feline  
ultrasound appearance of, 470–472

Partial cranial cruciate ligament tear  
MRI of, 439–441

Percutaneous nephrostomy tube placement  
IR for benign ureteral obstruction and, 577–578

Pes  
CT of, 391–395

PET/CT. See Positron emission tomography/computed tomography (PET/CT)

Positron emission tomography/computed tomography (PET/CT), 515–533
acquisition of, 517–518
described, 515–516
F-18 FDG in, 516–517
pitfalls of, 529–531
uses for, 528
image processing in, 518–519
information provided by, 519–520
in initial diagnosis and staging of cancer, 520–523
introduction, 515
for nasal tumors, 525–526
in radiation treatment planning, 524–525
radiopharmaceuticals used in, 516–517
SUV in, 519
in treatment response evaluation, 526–528

Pseudocyst(s)  
pancreatic  
ultrasound appearance of, 472

Q

Questionable lesions  
PET/CT in diagnosis and staging of, 522

R

Radiation treatment planning  
CT simulation for
Radiation (continued)
  abdomen, 507–508
  head and neck cancer, 506
  thorax cancer, 502–503
  PET/CT in, 524–525
Radiology
  interventional, 535–552 (See also Interventional radiology (IR))
Radiopharmaceuticals
  in PET/CT, 516–517

S
Sclerosants
  in IR, 544–545
Sclerotherapy
  for IRH, 571–572
Shoulder
  CT of, 376–382
  ultrasound imaging of, 359–363
Shoulder joint
  MRI of, 422–431
    bicipital tenosynovitis, 426–428
    infectious etiologies, 429
    neoplasia, 429–430
    osteochondrosis, 424
    supraspinatus trauma, 424–426
Skull tumors
  CT in staging of, 503–504
Snare
  in IR, 543
Squamous cell carcinoma
  oral
    radiation treatment planning for
      PET/CT in, 524–525
Standardized uptake value (SUV)
  in PET/CT, 519
Stent(s)
  in IR, 548–551
Stenting
  of malignant obstructions
    IO in, 559–561
  ureteral
    in cats
      IR for benign ureteral obstruction and, 580–583
    in dogs
      IR for benign ureteral obstruction and, 583–584
  urethral
    for urethral obstruction, 591
Stifle
  CT of, 399–403
  ultrasound imaging of, 363–365
Stifle joint
MRI of, 438–442
  introduction, 438–439
  menisci, 441
  neoplasia, 441–442
  partial cranial cruciate ligament tear, 439–441
Subcutaneous ureteral bypass device
  in cats
  IR for benign ureteral obstruction and, 578–580
Supraspinatus trauma
MRI of, 424–426
SUV. See Standardized uptake value (SUV)

T
Targeted therapeutics
  in IR, 544–545
Tarsus
CT of, 403–404
MRI of, 446–450
  neoplasia, 450
  osteochondrosis, 446–450
  trauma-related, 450
Tenosynovitis
  bicipital
    MRI of, 426–428
Thorax cancer
  CT in staging of, 499–500
  CT in surgical planning for, 500–502
  CT simulation for radiation therapy for, 502–503
Traditional ureteral surgery
  IR for benign ureteral obstruction and, 577
Trauma
  carpus-related
    MRI of, 444–445
  supraspinatus
    MRI of, 424–426
  tarsus-related
    MRI of, 450
Tumor(s). See also specific types
  of head and neck
    CT in staging of, 503–504

U
Ultrasound
  of hepatobiliary system, 453–467
    abnormal liver appearance on, 455–461
    contrast-enhanced, 465–467
    elastography, 467
    indications for, 453
    introduction, 453
Ultrasound (continued)

- normal appearance of gallbladder and bile duct, 455
- normal liver appearance on, 453–454

of musculoskeletal system, 355–371
- anatomy associated with, 356–358
- equipment for, 356
- gastrocnemius, 365–366
- iliopsoas/hip, 367–368
- introduction, 355–356
- miscellaneous structures, 368
- shoulder, 359–363
- stifle, 363–365
- technique, 356

of pancreas, 467–474
- acute canine pancreatitis, 469–470
- anatomy related to, 467–469
- chronic canine pancreatitis, 470
- contrast-enhanced, 474–475
- feline pancreatitis, 470–472
- focal pancreatic disease, 472–474
- neoplasia, 473–474
- newer imaging techniques, 474–475
- pancreatic disease, 469
- pancreatic edema, 472

Ureter
- IR of, 574–587
  - for benign ureteral obstruction, 577–587
  - introduction, 574–577
  - for malignant ureteral obstruction, 585–587

Ureteral stenting
  - in cats
    - IR for benign ureteral obstruction and, 580–583
  - in dogs
    - IR for benign ureteral obstruction and, 583–584

Ureteroscopy
  - for IRH, 573

Urethra
  - antegrade catheterization of, 590–591
  - IR of, 587–591
  - obstruction of
    - cystostomy tube placement for, 587–589
    - urethral stenting for, 591

Urinary bladder
  - IR of, 587–591

Urinary tract
  - IR of, 567–596
    - introduction, 567–568
    - kidney, 568–574
    - ureter, 574–587
    - urethra, 587–591
    - urinary bladder, 587–591
