Index

Note: Page numbers of article titles are boldface type.

A

Age
in cleft primary palate intervention, 666

Arytenoidectomy
partial
in laryngeal paralysis management, 711

Aural polyps
in dogs, 654

Auricular hematomas, 635–641
introduction, 635
patient evaluation of, 636
recurrence of
prognosis for, 639–640
treatment of, 635–641
nonpharmacologic, 636
options in, 636–639
pharmacologic, 636–637
postoperative care, 639
surgical, 637–639

B

Balloon dilation
in NPS management, 682–683

Bifid nose
repair of
in cleft primary palate reconstruction, 670–672

Bilateral cleft
repair of
in cleft primary palate reconstruction, 669
severe
repair of
in cleft primary palate reconstruction, 669–670

Brachycephalic syndrome (BS), 691–707
anatomic and pathophysiologic changes in, 691–694
laryngeal, tracheal, and bronchial anomalies, 692–694
skull conformation anomalies, 691–692
soft tissue changes, 692
described, 691
diagnosis of, 694–695
gastroesophageal diseases associated with, 694
genesis of
Index

Brachycephalic (continued)
  controversies related to, 696
  imaging of, 695
  prognosis of, 702
  treatment of, 697–701
    elongated-hyperplastic soft palate in, 697–698
    medical therapy in, 697
    postoperative care, 700
    stenotic nares in, 697
    surgical, 697
      for laryngeal diseases, 698–699
    tracheostomy in, 700
    turbinectomy in, 697
BS. See Brachycephalic syndrome (BS)

C

Cat(s)
  otic, nasopharyngeal, and nasal polyps in, 643–653 (See also specific types and
    Feline inflammatory polyps (FIPs))

Cholesteatoma(s)
  defined, 624
  in dogs, 623–634
    clinical findings in, 626
      focused neurologic examination, 626
      otoscopic examination, 626
      physical examination, 626
      signalment and patient history, 626
    described, 623–624
    differential diagnosis of, 630
    imaging of, 627–630
    introduction, 623–625
    pathology of, 630–631
    prognosis of, 632–633
    recurrence of, 632–633
    symptoms of, 624
    treatment of, 631–632

Cleft(s)
  palatal
    described, 664

Cleft lip
  described, 664

Cleft palate
  described, 664

Cleft primary palate
  causes of, 664–665
    clinical approach to, 665–667
      age at time of intervention in, 666
      clinical signs in, 666
      dental implications in, 667
      diagnosis in, 665
diagnostic imaging in, 666
necessity for surgical intervention in, 665
principles of surgical repair in, 666–667
systemic considerations in, 666
environmental teratogens in, 665
genetic factors in, 664
reconstruction of, 663–675
  complications of, 673
  postoperative care, 672–673
  repair of bifid nose–central cleft in, 670–672
  repair of bilateral cleft in, 669
  repair of severe bilateral cleft of primary palate–salvage incisectomy in, 669–670
  repair of unilateral cleft in, 667–669
  types of, 664
  in veterinary literature, 665
Computed tomography (CT)
  in cholesteatoma evaluation in dogs, 628–630
  in FIPs evaluation, 646
Congenital nose
  reconstruction of, 663–675
Covered metallic stents
  in NPS management, 686
CT. See Computed tomography (CT)

D

Dog(s)
  cholesteatomas in, 653–658 (See also Cholesteatoma(s), in dogs)
  polyps in
    otic, nasopharyngeal, and nasal polyps, 653–658 (See also specific types and Polyp(s), in dogs)

E

Elongated-hyperplastic soft palate
  in BS management, 697–698
Endoscopy
  in FIPs evaluation, 647–648
Environmental teratogens
  in cleft primary palate, 665
Everted laryngeal saccules
  surgical treatment of, 698

F

Feline inflammatory polyps (FIPs), 643–653
  imaging of, 644–648
  conventional radiology in, 644–646
  CT in, 646
  endoscopy in, 647–648
  MRI in, 646–647
Feline (continued)
- introduction, 643–644
- of nasal turbinates, 653
- treatment of, 648–653
  - minimally invasive approach, 648–651
  - endoscopic removal of polyps, 650
  - laser ablation of polyps, 650–651
  - traction/avulsion of polyps, 648–650
  - open surgical removal, 651–653

FIPs. See Feline inflammatory polyps (FIPs)

Frontal sinuses
  - lesions of
    - surgical approaches to, 722–725

G

Gastroesophageal disease(s)
  - BS–related, 694

Genetics
  - in cleft primary palate, 664

H

Hematoma(s)
  - auricular, 635–641 (See also Auricular hematomas)

I

Incisectomy
  - salvage
    - in repair of severe bilateral cleft of primary palate, 669–670

Infection(s)
  - persistent deep
    - after TECA-LBO
      - treatment of, 609–621 (See also Total ear canal ablation (TECA) with lateral bulla osteotomy (LBO))

L

Laryngeal collapse
  - surgical treatment of, 698–699

Laryngeal diseases
  - surgical treatment of, 698–699

Laryngeal paralysis
  - introduction, 709–710
  - surgical treatment of, 709–717
    - partial arytenoidectomy in, 711
    - permanent tracheostomy in, 716
    - unilateral arytenoid lateralization in, 712–716

Laryngeal saccules
  - everted
surgical treatment of, 698

Lesion(s)
of frontal sinuses
  surgical approaches to, 722–725
nasal cavity
  surgical approaches to, 722–725

Lip(s)
cleft
described, 664

Lip disorders
  reconstruction of, **663–675**

Lymphoma(s)
nasal
clinical management of, 738

M

Magnetic resonance imaging (MRI)
in cholesteatoma evaluation in dogs, 630
in FIPs evaluation, 646–647

Mast cell tumors
  nasal
clinical management of, 738–739

Metallic stent(s)
covered
  in NPS management, 686

NPS
  in NPS management, 684–686

MRI. See Magnetic resonance imaging (MRI)

N

Nares
  stenotic
treatment of, 697

Nasal cavity
  introduction, 719–722
  lesions of
    surgical approaches to, 722–725
  surgical approaches to, **719–733**
    biopsy of sinonasal lesions, 722
    combined rostrolateral nasal approach, 728
    complications of, 729–731
    dorsal approach, 726–727
    for lesions, 722–725
    minimally invasive approach, 729
    nasopharyngeal approach, 728
    outcomes of, 731
    patient preparation for, 725–726
    postoperative care, 731
    for tumors, 728–729
Nasal (continued)
ventral approach, 727–728

tumors of
surgical extirpation of, 728–729

Nasal neoplasia, 735–750
clinical management of, 737–748
complications of, 744–748
controversies related to, 744–748
lymphoma, 738
mast cell tumors, 738–739
sarcomas, 739
sinonasal carcinoma, 737–738
surgical options in, 739–744
diagnosis of, 735–737

Nasal planum neoplasia, 735–750
clinical management of, 737–748
complications of, 744–748
controversies related to, 744–748
lymphoma, 738
mast cell tumors, 738–739
nasal planum squamous cell carcinoma, 738
sarcomas, 739
sinonasal carcinoma, 737–738
surgical options in, 739–744
diagnosis of, 735–737

Nasal planum squamous cell carcinoma
clinical management of, 738

Nasal polyps
in cats, 643–653
in dogs, 653–658

Nasal turbinates
FIPs of, 653

Nasopharyngeal polyps
in cats, 643–653
in dogs, 653–658

Nasopharyngeal stenosis (NPS), 677–689
clinical management of, 679–680
balloon dilation in, 682–683
controversies related to, 688
covered metallic stents in, 686
disease complications associated with, 687–688
metallic stenting in, 684–686
procedure, 680–687
prognosis of, 688
temporary tubing/stenting in, 686–687
clinical presentation of, 678
described, 677–678
diagnosis of, 678–679

Nasopharyngeal stenosis (NPS) metallic stenting
in NPS management, 684–686

Neoplasia
Index

of nose and nasal planum, 735–750 (See also Nasal neoplasia; Nasal planum neoplasia)

Nose

bifid

repair of

in cleft primary palate reconstruction, 670–672

NPS. See Nasopharyngeal stenosis (NPS)

O

Otic polyps

in cats and dogs, 643–661

P

Palatal cleft(s)

described, 664

Palate

embryologic formation of, 663–664

Paralysis

laryngeal

surgical treatment of, 709–717 (See also Laryngeal paralysis)

Partial arytenoidectomy

in laryngeal paralysis management, 711

Permanent tracheostomy

in laryngeal paralysis management, 716

Polyp(s)

in cats

otic, nasopharyngeal, and nasal, 643–653 (See also specific types and Feline inflammatory polyps (FIPs))

in dogs, 653–658

aural polyps, 654

introduction, 653–654

otic, nasopharyngeal, and nasal, 653–658

Primary palate

cleft

reconstruction of, 663–675 (See also Cleft primary palate, reconstruction of)

embryologic formation of, 663–664

R

Radiography

in cholesteatoma evaluation in dogs, 628

in FIPs evaluation, 644–646

S

Salvage incisectomy

in repair of severe bilateral cleft of primary palate, 669–670

Sarcoma(s)

nasal

clinical management of, 739
Secondary palate
   embryologic formation of, 664
Sinonasal carcinoma
   clinical management of, 737–738
Sinonasal lesions
   surgical approaches to
   biopsy, 722
Sinus(es)
   frontal
   lesions of
      surgical approaches to, 722–725
   introduction, 719–722
   surgical approaches to, 719–733
      combined rostrolateral nasal approach, 728
      complications of, 729–731
      dorsal approach, 726–727
      minimally invasive approach, 729
      nasopharyngeal approach, 728
      outcomes of, 731
      patient preparation for, 725–726
      postoperative care, 731
      ventral approach, 727–728
Soft palate
   elongated-hyperplastic
      in BS management, 697–698
Squamous cell carcinoma
   of nasal planum
      clinical management of, 738
Stenosis(es)
   nasopharyngeal, 677–689 (See also Nasopharyngeal stenosis (NPS))
Stenotic nares
   treatment of, 697
Stent(s)
   metallic
      covered
         in NPS management, 686
      NPS
         in NPS management, 684–686

T

TECA-LBO. See Total ear canal ablation (TECA) with lateral bulla osteotomy (LBO)
Teratogen(s)
   environmental
      in cleft primary palate, 665
Total ear canal ablation (TECA) with lateral bulla osteotomy (LBO)
   persistent deep infection after, 609–621
      clinical presentation of, 611–612
      diagnostic approach to, 613–614
      differential diagnosis of, 612–613
      introduction, 609–610
pathophysiology of, 611
rate of, 610–611
treatment of, 609–621
  initial management in, 613
  outcome following, 618–619
  postoperative monitoring and care in, 617–618
  surgical exploration in, 614–617
Tracheostomy
  in BS management, 700
  permanent
    in laryngeal paralysis management, 716
Tubing/stenting
  temporary
    in NPS management, 686–687
Tumor(s)
  mast cell
  nasal
    clinical management of, 738–739
    of nasal cavity
      surgical approaches to, 728–729
Turbinate(s)
  diseases of
    surgical extirpation of, 728–729
  nasal
    FIPs of, 653
Turbinectomy
  in BS management, 697

U
Ultrasonography
  in cholesteatoma evaluation in dogs, 628
Unilateral arytenoid lateralization
  in laryngeal paralysis management, 712–716
Unilateral cleft
  repair of
    in cleft primary palate reconstruction, 667–669
