Index

Note: Page numbers of article titles are in **boldface** type.

A
Activity
  as factor in obesity management, 885
Adipokine(s)
  in obesity
    in cats and dogs, 786
    secretion of, 803–804
    in osteoarthritis, 833–834
Adiponectin
  in obesity
    effects of, 820
    secretion of, 803–804
Adipose tissue
  in canine and feline obesity, 786
  normal metabolic function of, 798–799
Adiposity factors
  in maintaining body weight, 775–776
Age
  as factor in obesity, 766
Airway obstruction
  recurrent
    obesity and, 824–826
Asthma
  obesity and, 824

B
Behavior(s)
  as factor in obesity management, 885–892
Biomarker(s)
  weight loss effects on, 820–821
Body weight. See Weight
Breed
  as factor in obesity, 764–765

C
Cancer(s)
  obesity and, 846–847
Carbohydrate(s)
  in selecting optimal nutrient profile in weight management in cats and dogs, 874
Cardiopulmonary disease
  obesity effects on, 817–830
Cat(s)
  inappropriate weight gain in, 913–915
  obesity in
    adipose tissue and adipokines, 786
    current topics, 785–795
    genetics and, 786
    gut microflora and, 792
    heart disease related to, 818–819
    “metabolic syndrome” in, 809
    nutraceuticals and, 787–791
    pulmonary function effects of, 823–824
  weight management in
    dietary aspects of, 869–882 (See also specific aspects and Weight management, in cats and dogs, dietary aspects of)
Chronic inflammatory condition
  obesity as, 844–845
Cognitive factors
  in maintaining body weight, 776–777
Communication
  with pet owners
    obesity-related, 899–911 (See also Obesity, communication with pet owners about)
Counseling
  nutritional
    team approach to, 900

D

Diabetes mellitus
  obesity as risk factor for, 801–803
Diet(s)
  adherence to
    in weight management in cats and dogs, 878–879
  assessment of
    in nutritional assessment, 858–964 (See also Nutritional assessment, diet assessment in)
  evidence-based
    in weight management in cats and dogs, 876
  history of
    in selecting optimal diet in weight management, 870–871
    in obesity prevention, 919–921
    in weight management in cats and dogs, 869–882 (See also specific aspects and Weight management, in cats and dogs, dietary aspects of)
Dietary macronutrients
  in food intake control in maintaining body weight, 777
Diet choice
  as factor in obesity, 766–767
Dog(s)
  inappropriate weight gain in, 913–915
obesity in
  adipose tissue and adipokines, 786
  current topics, 785–795
  genetics and, 786
  gut microflora and, 791–792
  heart disease related to, 818–819
  “metabolic syndrome” in, 808–809
  nutraceuticals and, 787–791
  pulmonary function effects of, 822–823
  weight management in
    dietary aspects of, 869–882 (See also specific aspects and Weight
management, in cats and dogs, dietary aspects of)

Dyslipidemia
  obesity and, 804–805

E

Endocrine abnormalities
  obesity and, 804

Endocrine disease(s)
  metabolic effects of obesity related to, 797–815

Energy
  in selecting optimal nutrient profile in weight management in cats
    and dogs, 872–873

Energy expenditure
  determining of
    in obesity prevention, 919
    in maintaining body weight, 779–781

Energy regulation
  obesity-related changes in, 804

Energy restriction
  in weight management in cats and dogs, 876–878

Environment
  as factor in obesity, 767–768
  as factor in obesity management, 884–885
  in nutritional assessment, 863

Exercise
  beyond weight loss
    benefits of, 836–837
  as factor in obesity, 767–768
  in weight loss, 834–836

F

Fat(s)
  in selecting optimal nutrient profile in weight management in cats
    and dogs, 874

Fat distribution
  obesity-related, 805–806

Feeding method
  as factor in obesity, 767
Feeding (continued)
  as factor in obesity management, 884–885
  in nutritional assessment, 863
Fiber
  in selecting optimal nutrient profile in weight management in cats
  and dogs, 875
Food
  in pet–owner relationship, 863–864
Food intake
  control of
    in maintaining body weight, 774–775

G
Gastrointestinal system
  obesity effects on, 845
Gender
  as factor in obesity, 765
Glucose concentrations
  in obesity, 800–801
Growth rate
  as factor in obesity, 766
Gut microflora
  in canine and feline obesity, 791–792

H
Heart
  rate of
    obesity effects on, 821
  size of
    obesity effects on, 821
  weight loss effects on, 821
Heart disease
  obesity effects on, 818–822
    adiponectin-related, 820
    in dogs and cats, 818–819
    heart function–related, 819
    in humans, 818
    RAS–related, 819–820
Human(s)
  obesity in
    genetics and, 786
    heart disease related to, 818
    pulmonary function effects of, 822
Hyperinsulinemia
  obesity related to, 799–800
Hyperlipidemia
  obesity and, 845–846
I
Inappropriate weight gain
  in cats and dogs, 913–915
    defined, 913
    onset of, 914
    prevalence of, 914
    risk factors for, 914–915
    defined, 913
Infection(s)
  respiratory
    obesity and, 824
Inflammatory condition(s)
  chronic
    obesity as, 844–845
Insulin resistance
  obesity related to, 799–800
Intervertebral disc disease
  pathogenesis of, 832–833

K
Kidney(s)
  obesity effects on, 847

L
Leptin
  secretion of
    in obesity, 803
Lipid accumulation
  obesity-related, 806–808
Lipid disorders
  obesity and, 804–808
    dyslipidemia, 804–805
    fat distribution and, 805–806
    lipid accumulation and, 808–808
Liver dysfunction
  obesity and, 845–846
Longevity
  obesity effects on, 847–848

M
Macronutrient(s)
  dietary
    in food intake control in maintaining body weight, 777
Macronutrients
  in selecting optimal nutrient profile in weight management in cats and dogs, 873–874
"Metabolic syndrome"
  in obese cats, 809
  in obese dogs, 808–809
Metabolism
  weight loss effects on, 820–821
Micronutrients
  in selecting optimal nutrient profile in weight management in cats and dogs, 874–875

N
Nutraceuticals
  in canine and feline obesity, 787–791
Nutritional assessment, 855–867
  communication with pet owners about obesity-related, 904–905
diet assessment in, 858–964
  current feeding management and environment, 863
  estimate current energy intake, 860–861
  evaluate current nutrient intake, 861, 863
  identify opportunities and challenges related to pet weight loss, 864
  obtain complete diet history, 858–860
  owner interview, 863
  owner’s interest and willingness to change to help pet lose weight, 864
  role food plays in pet-owner relationship, 863–864
  in selecting optimal diet in weight management, 870
introduction, 855
patient assessment in, 855–858
  general diagnostic testing, 857
  medical history, 856
  physical examination, 856–857
Nutritional counseling
team approach to, 900

O
Obesity
  adipokine secretion in, 803–804
  adverse effects of, 843–853
  benefits of, 843–853
  cancer associated with, 846–847
  canine
    current topics in, 785–795 (See also specific topics and Dog(s), obesity in)
    management of, 883–898 (See also Obesity, management of)
    prevalence of, 883
cardiopulmonary disease effects of, 817–830
  causes of, 764–768
    animal factors in, 764–766
    owner factors in, 766–768
  as chronic inflammatory condition, 844–845
  communication with pet owners about, 899–911
challenges related to, 908–910
  disparate client–related, 909–910
  obese client–related, 908–909
  obese veterinarian–related, 909
elements for weight loss success, 900–904
enlist veterinary health care team in implementing nutritional
  recommendations, 904–905
introduction, 899–900
team approach to nutritional counseling, 900
team communication skills, 906–907
team training, 906
veterinary communication, 907–908
veterinary weight loss visit workflow, 905–906
defined, 843
described, 761–762, 843–844
development of, 773–784 (See also Weight, constancy of)
diabetes mellitus related to, 801–803
endocrine abnormalities associated with, 804
energy regulation changes in, 804
epidemiology of, 761–762
feline
current topics in, 785–795 (See also specific topics and Cat(s), obesity in)
management of, 883–898 (See also Obesity, management of)
gastrointestinal health related to, 845
heart disease effects of, 818–822 (See also Heart disease, obesity effects on)
heart size and rate effects of, 821
hyperinsulinemia and, 799–800
hyperlipidemia and, 845–846
insulin resistance and, 799–800
introduction, 761, 797–798
lipid disorders associated with, 804–808 (See also specific disorders and Lipid
  disorders, obesity and)
liver dysfunction related to, 845–846
longevity effects of, 847–848
management of, 883–898
  behavior-specific, 885–892
    behavioral counseling approach, 889
      5 A’s in, 889–892
    veterinary management strategies, 889–891
  environment-specific, 884–885
    introduction, 883–884
metabolic effects of
  endocrine diseases–related, 797–815
  “metabolic syndrome” in, 808–809
nutritional assessment related to, 855–867 (See also Nutritional assessment)
orthopedic diseases related to, 831–841 (See also specific diseases)
owners’ perception of, 762–764
pancreatic dysfunction related to, 845–846
predispositions for, 762–764
prevalence of, 762
Obesity (continued)

prevention of, 917–925
  determining metabolizable energy requirements and energy expenditure in, 919
dietary strategies in, 919–921
monitoring strategies in, 917–919
  in adult animals, 923
  in early life, 922–923
  in postneutering period, 923
prevention of rebound after weight loss, 924
recommendations for, 922–925
  in senior animals, 923–924
physical activity in, 921–922
tools for, 917–925
pulmonary function effects of, 822–826 (See also Pulmonary function, obesity effects on)
quality of life effects of, 847–848
renal function effects of, 847
scope of the problem, 761–772
veterinarians' perception of, 761–772

Obesity paradox, 848
  survival times and, 821–822
Optimal nutrient profile
  in weight management in cats and dogs, 872–876
    energy and, 872–873
    fiber in, 875
    macronutrients and, 873–874
    micronutrients in, 874–875
    water in, 875
Orthopedic disease(s)
  obesity and, 831–841 (See also specific diseases)

Osteoarthritis
  adipokines in, 833–834
  pathogenesis of, 831–832
Owner assessment
  in selecting optimal diet in weight management, 871
Owner characteristics
  as factor in obesity, 768
Owner interview
  in diet assessment in nutritional assessment, 863

P

Pancreatic dysfunction
  obesity and, 845–846
Pet owner(s)
  communication with
    obesity-related, 899–911 (See also Obesity, communication with pet owners about)
Pet–owner relationship
  food's role in, 863–864
Physical activity
- in maintaining body weight, 779–781
- in obesity prevention, 921–922

Protein
- in selecting optimal nutrient profile in weight management in cats and dogs, 873–874

Pulmonary function
- obesity effects on, 822–826
  - asthma, 824
  - in cats, 823–824
  - in dogs, 822–823
  - in humans, 822
  - recurrent airway obstruction, 824–826
  - respiratory infections, 824

Q
Quality of life
- obesity effects on, 847–848

R
RAS. See Renin-angiotensin-aldosterone system (RAS)
Recurrent airway obstruction
- obesity and, 824–826
Renal function
- obesity effects on, 847
Renin-angiotensin-aldosterone system (RAS)
- obesity effects on, 819–820
Respiratory infections
- obesity and, 824
Rodent(s)
- obesity in
  - genetics in, 785–786
  - gut microflora in, 791

S
Satiation factors
- in maintaining body weight, 775
Sterilization
- as factor in obesity, 765–766

W
Water
- in selecting optimal nutrient profile in weight management in cats and dogs, 875
Weight
- constancy of, 773–781
  - adiposity factors in, 775–776
Weight (continued)
  cognitive factors in, 776–777
  energy expenditure and physical activity in, 779–781
  food intake control in, 774–775
    dietary macronutrients and, 777
  maladaptive changes and, 777–779
  satiation factors in, 775

maintenance of
  after weight loss, 913–929 (See also Weight loss, weight maintenance after)

Weight gain
  inappropriate
    in cats and dogs, 913–915

Weight loss
  cardiac effects of, 821
  in cats and dogs
    identify opportunities and challenges related to, 864
    maintenance of, 878
    owner’s interest and willingness to change, 864
    rate of, 876–878
  exercise beyond
    benefits of, 836–837
    exercise in, 834–836
  metabolic changes with, 820–821
  rebound after
    prevention of, 924
  success of
    communication with pet owners about, 900–904
    veterinary visit workflow related to, 905–906
  weight maintenance after, 913–917
  outcomes of, 915–917

Weight management
  in cats and dogs
    dietary aspects of, 869–882
      energy restriction, 876–878
      evidence-based diet selection, 876
      initial approach to selecting optimal diet, 870–871
      introduction, 869–870
      selecting optimal nutrient profile, 872–876
      strategies for increased diet adherence, 878–879
      troubleshooting and addressing client concerns, 879
