INDEX

Note: Page numbers of article titles are in boldface type.

Abdomen, lymph nodes of, 155-156
Abdominal mass, diagnostic imaging of, 195-202
algorithm for, 196
Abdominal surgery, in oncology patient, infection with, 84-85
Abdominal wall defects, repair of, in surgical oncology, 106
Adjuvant chemotherapy, 135-136
Adjuvant therapy, for chronic pain, in surgical oncology patient, 93-94
Adrenal, diagnostic imaging of, 200-202
Alkylating agents, effects on wound healing, 117
Analgesics, for pain, in surgical oncology patient, 89, 92, 93
Anorexia, in cancer, 64-66
Antebrachium, osteosarcoma of, bone scintigram of, 193
Antibiotics, antitumor, effects on wound healing, 116-117
for infection, in surgical oncology patient, 80
Anticancer therapy, for chronic pain, in surgical oncology patient, 92
Antitumor antibiotics, effects on wound healing, 116-117
Aspiration biopsy, fine-needle, nonaspiration biopsy vs, 38-39
Axial pattern flaps, in surgical oncology, 106

Bacteria, characteristics of, in surgical oncology patient, 79
Bacterial translocation, in cancer catabolism, 66-67
Basic fibroblast growth factor, for impaired wound healing, 124
Biliary tract, diagnostic imaging of, 196-198

Biologic sense, in observational studies, 12
Biopsy, 33-45
in surgical oncology, 226
principles of, 33-35
general complications, 35
indications, 33
specimen handling, 34-35
technical considerations, 34
techniques of, 35-43
catheter, 40-41
cutting-needle, 39-40
endoscopic, 40
excisional, 41
fine-needle, 35-39. See also Fine-needle biopsy.
intraoperative, 41-43
open incisional, 41
percutaneous, 35
Bone, osteosarcoma of, 193
physiology and healing of, radiation therapy and, 114
Brain, diagnostic imaging of, 189-191

Cachexia, in cancer, 64-66
Calcitonin, for hypercalcemia, 54-55
Cancer, and impaired wound healing, 111-131
anorexia/cachexia in, 64-66
as ecosystem, and consequences of subcurative therapy, 239
client counseling for, 19-31
avoiding information overload, 27
delivering bad news, 20-21
exhaustion of treatment options, 28-29
finishing up, 28
further diagnostic evaluation, 21-22
goals of treatment, 27-28
methods of therapy, 24-26
chemotherapy, 26
radiation therapy, 25-26
surgery, 24-25
Cancer (Continued)
  presentation of therapeutic options, 22–24
  fees, 24
  perspective on treatment choices, 22–23
  referrals, 23–24
  decisions about therapy in, responsibil-
  ity for, 30
  definition of, 231–232
  fluid and food selection in, 71–73
  multimodality therapy for, 133
  pathometabolic alterations in, 64
  perioperative nutritional support in,
  63–76
  refeeding in, and feeding of tumor, 66
  residual, control vs eradication of, 239–
  241
  Canine osteosarcoma, 193
  adjunct radiation therapy for, 144
  micrometastatic disease in, 237
  Capillary ingrowth, and wound healing, 112
  Cardiac tamponade, as oncologic surgical
  emergency, 208–211
  clinical presentation and diagnosis of,
  210
  pathophysiology of, 208–210
  surgical therapy and aftercare of,
  210–211
  Case-control studies, in oncology, 15
  Catabolism, in cancer, consequences of,
  66–67
  Catheter biopsy, 40–41
  Cellular resistance, and chemotherapy
  failure, 138–139
  Chemotherapy, 133–148
    adjuvant, 135–136
    for tumor metastases, obstacles to suc-
    cess in, 238
    administration of, 136–137
    as cancer therapy, 26
    neoadjuvant, 135
    simultaneous, 136
    toxicity of, 137–138
    treatment considerations for, 134
    treatment failure with, sources of, 138–
    139
  Chronic pain, in surgical oncology patient,
  therapy for, 92–94
  Cisplatin, effects on wound healing,
  118–119
  Coagulation abnormalities, as
  paraneoplastic syndromes,
  perioperative management of, 48–53
  Codeine, for chronic pain, in surgical
  oncology patient, 92–93
  Cohort studies, in oncology, 13
  Collagen synthesis, and wound healing,
  112

Colonscopy, oncologic applications of, 176
Computed tomography, as diagnostic
imaging modality, 187–188
Consistency, in observational studies, 12
Corticosteroids, for chronic pain, in
surgical oncology patient, 93–94
for hypercalcemia, 54
Cross-sectional studies, in oncology, 12–13
Cytotoxic chemotherapy, adjuvant, for
  tumor metastases, obstacles to success
  in, 238
  and impaired wound healing, in cancer
  patient, 111–131

Debridement, and wound healing, 112
Descriptive studies, in oncology, 11
Diagnostic imaging, 185–205
  anatomic sites of, 189–195
    abdominal mass, 195–202
    brain and spinal cord, 189–191
    algorithm for, 190
    extremity tumors, 191–194
    nasal and oral cavity, 191
    thorax, 194–195
  modalities of, 185–189
    computed tomography, 187–188
    magnetic resonance imaging, 188–189
    nuclear medicine, 188
    radiography, 186, 188
    ultrasonography, 186–187
Diazoxide, for insulinoma, 57
Diphosphonates, for hypercalcemia, 54
Dissection, in surgical oncology, 101–104
Disseminated intravascular coagulation, as
paraneoplastic syndrome,
  perioperative management of, 51–52
Diuretics, for hypercalcemia, 54
Dog, lymph nodes of, 150–152
Dose response, in observational studies, 12

Electrofulguration, of melanoma, 103
End points, in surgical oncology,
  definition of, 226–227
Endoscopy, 169–183
  biopsy with, 40
    oncologic applications of, common neo-
    plasms diagnosed by, 181
    equipment for, 169–171
    examination in, 170
    gastrointestinal, 171–176
      colon, 176
      esophagus, 171–172
      small intestine, 174–176
      stomach, 172–174
    laparoscopy, 180–182
respiratory, 177–180
larynx/trachea, 177
nasal, 178–180
pulmonary, 177–178
Energy requirements, calculation of, perioperative, 68–69
Enteral feeding, for cancer patient, liquid formula for, 73
perioperative, 69–71
Epidemiology, and veterinary oncologist, 1–17
Epidermal growth factor, for impaired wound healing, 121–123
Epidermis, fine-needle biopsy of, 36
Epidural analgesia, for pain, in surgical oncology patient, 91
Esophageal masses, diagnostic imaging of, algorithm for, 199
Esophagostomy tube, selection and use of, 72
Esophagus, endoscopy of, oncologic applications of, 171–172
Excisional biopsy, 41
Experimental studies, in oncology, 14
Explanatory studies, in oncology, 11–12
Extremity tumors, diagnostic imaging of, 191–194

Feeding tubes, selection and use of, 72
Fibroplasia, and wound healing, 112
Fine-needle biopsy, 35–39
accuracy of, 35–38
aspiration vs nonaspiration, 38–39
efficacy of, 38
of mammary gland tumors, 39
Folic acid analogs, effects on wound healing, 118
Food dose, perioperative, calculation of, 69

Gastrostomy tube, selection and use of, 72
Genital surgery, in oncology patient, infection with, 85
Glioma, canine, imaging of, 190
Glucocorticoids, effects on wound healing, 118–119
for insulinoma, 57
Growth factors, for cancer, pharmacologic modulation by, 111–131
for impaired wound healing, 120–124

Head/neck, canine, lymph nodes of, 151–152
lymphocenters of, 157
surgery on, in oncology patient, infection with, 84
Hemangiosarcoma, adjunct radiation therapy for, 145
Hematologic abnormalities, paraneoplastic, perioperative management of,
48–53
disseminated intravascular coagulation, 51–52
hyperhistaminemia, 52–53
thrombocytopenia, 48–51
Hemorrhagic abdominal emergency, as oncologic surgical emergency,
213–215
clinical presentation and diagnosis of, 213–214
pathophysiology of, 213
surgical therapy and aftercare of, 214–215
Hormonal agents, effects on wound healing, 118–119
Host-tumor cell interactions, in tumor metastasis, 235–236
Hypercalcemia, as paraneoplastic syndrome, perioperative management of,
53–55
Hypercatecholaminemia, as paraneoplastic syndrome, perioperative management of, 58
Hyperhistaminemia, as paraneoplastic syndrome, perioperative management of, 52–53
Hypoglycemia, as paraneoplastic syndrome, perioperative management of, 55–58

Immune compromise, in cancer catabolism, 66–67
Immune response, regional lymph node in, 159
Incisions, types of, in surgical oncology, 102
Infection, in surgical oncology patient, 77–96
antibiotic drugs for, 80
clinical significance of, 79–81
catabolism in, 66–67
diagnosis of, 81
pathophysiology of, 77–79
pharmacokinetics in, 81–82
prophylactic antibiotics for, 81–83
risk factors for, 79, 81
specific guidelines in, 83–85
abdominal surgery, 84–85
head and neck surgery, 84
neurosurgery, 84
orthopedic surgery, 83
thoracic surgery, 84
therapeutic drugs for, 83
treatment principles for, 81–83
Inhalation anesthetics, for surgical oncology patient, 89
Insulinoma, perioperative management of, 56–57
Intestinal endoscopy, oncologic applications of, 174–176
Intestinal neoplasm, as oncologic surgical emergency, 219
Intestinal perforation, as oncologic surgical emergency, 219
Intraoperative biopsy, with microscopy, 41–43

Large intestinal surgery, in oncology patient, infection with, 84–85
Larynx, endoscopy of, oncologic applications of, 177
Limb(s), lymphcenters of, 158
Limb mass, diagnostic imaging of, algorithm for, 192
Liquid enteral formula, for cancer patient, 73
Liver, diagnostic imaging of, 196–198
fine-needle biopsy of, 36
neoplasia of, laparoscopy of, 180
scintigram of, 197
surgery of, in oncology patient, infection with, 85
Lung, endoscopy of, oncologic applications of, 177–178
fine-needle biopsy of, 37
Lymph node(s), canine, 150–152
abdominal viscera, 155–156
head and neck, 151–152
thoracic, 153–154
internal structure of, 161
metastases to, and systemic dissemination, 163
common tumors causing, 164
definition of, 161

Survival time with, 162
regional, anatomy of, 149–152
clinical management of, 149–167
abnormal, 164–165
goals and strategies, 161–163
normal, 163–164
surgical courses of action, 163–165
metastases to, pathophysiology of, 156–161
physiology of, 152–161
tumor metastases to, 236

Lymphocenters, of abdomen, 160
of head/neck, 157
of limbs, 158
of thorax, 159
of torso, 158
Lymphoma, diagnostic imaging of, 200–202
Lymphosarcoma, gastric, endoscopy of, 172
intestinal, endoscopy of, 175

Magnetic resonance imaging, as diagnostic imaging modality, 188–189
Mammary masses, diagnostic imaging of, 195
Mast cell tumor, adjunct radiation therapy for, 144–145
Melanoma, electrofulguration of, 103
spectrum of clinical potential in, 20
Metastatic cascade, 233–235
Micrometastatic disease, implications of, 237
Morphine, for chronic pain, in surgical oncology patient, 93

Nasal cavity, diagnostic imaging of, 191
Nasoesophageal feeding tube, selection and use of, 72
Neoadjuvant chemotherapy, 135
Neurosurgery, in oncology patient, infection with, 84
Neutropenia, as paraneoplastic syndrome, perioperative management of, 50
Nose, endoscopy of, oncologic applications of, 178–180
NSAIDs, for chronic pain, in surgical oncology patient, 92
Nuclear medicine, as diagnostic imaging modality, 188
Null hypothesis, in oncology study, 7
Nutritional status, and wound healing, 115
assessment of, perioperative, 68
effect of tumors on, 64–73
anorexia and cachexia, 64–66
consequences of catabolism, 66–67
IMAGING.

NURSING.

Nutritional Oncologic Oncology

Osteosarcoma, canine, adjunct radiation therapy for, 144
bone scintigram of, 193
micrometastatic disease in, 237

P value, calculation of, in oncology study, 8

Pain, in surgical oncology patient, 77–96
analgesics for, 89
pathophysiology and clinical significance of, 86–87
postamputation, 90
recognition of, 87–88
specific guidelines for, 88–91
therapy for, 92–94
treatment principles for, 88
types of, 85–86

Palliation, in surgical oncology, 98

Pancreas, diagnostic imaging of, 196–198

Pancytopenia, as paraneoplastic syndrome, perioperative management of, 50

Paraneoplastic syndromes, 45–60

common, 48–49
definition of, 47
perioperative management of, hematologic abnormalities, 48–53
hypercalcemia, 53–55
hypercatecholaminemia, 58
hypoglycemia, 55–58
pachychromoctytoma, 58
thyrotoxicosis, 58–59

Parenteral feeding, perioperative, 70–71

Pelvis, soft tissue sarcoma of, magnetic resonance imaging of, 192

Pericardial effusions, as oncologic surgical emergency, 208–211
clinical presentation and diagnosis of, 210
pathophysiology of, 208–210
surgical therapy and aftercare of, 210–211

Peritonitis, as oncologic surgical emergency, 219

Pharmacological management, of pain and infection, in surgical oncology patient, 77–96

Pheochromoctytoma, as paraneoplastic syndrome, perioperative management of, 58

Platelet-derived growth factor, for impaired wound healing, 123–124

Platelets, reduction in, as paraneoplastic syndrome, perioperative management of, 48–51

Preoperative staging, in surgical oncology, 226

Proctoscopy, rigid, oncologic applications of, 176

fluid and food selection, 71–73

providing perioperative nutritional support, 67–71

refeeding in, 66

Nutritional support, perioperative, in cancer, 63–76

Observational studies, in oncology, 12

Oncologic applications, of diagnostic imaging techniques, 185–205. See also Diagnostic imaging of endoscopy, 169–183. See also Endoscopy.

Oncology, epidemiology of, 1–17

surgical, principles of, 97–110. See also Surgical oncology.

surgical emergencies in, 207–223
algorithm for, 209

gastroenterologic, 217–220
hemorrhagic abdominal, 213–215
pericardial effusion/cardiac tamponade, 208–211
respiratory, 211–213
urogenital, 215–217

Oncology literature, how to read, 1–17

Oncology study, analysis and sample size of, 7

assignment of exposure/intervention in, 4–6

confounding variables in, 10–14
design and characteristics of, 4
effect or relationship in, strength and precision of, 9–10
findings in, importance of, 14–15
hypotheses in, 7
initial screening criteria for, 2–3
interpretation and extrapolation in, 10–11
objectives of, achievement of, 14–15
assessment of, 3
outcome of, assessment of, 6–7
populations used in, 3–4
selection bias in, 5
statistical significance testing in, 7–9
study design in, 11–14
case-control, 13
cohort, 13
cross-sectional, 12–13
descriptive, 11
experimental, 14
explanatory, 11–12
observational, 12
validity of, assessment criteria for, 3–7
variables in, 5

Open incisional biopsy, 41

Oral cavity, diagnostic imaging of, 191

Orthopedic surgery, in oncology patient, infection with, 83

INDEX 253
Propoxyphene, for chronic pain, in surgical oncology patient, 92–93

Radiation therapy, adjunct, 133–148
  intraoperative, 142
multimodality approach in, 143–146
postoperative, 141–142
preoperative, 141
toxicity associated with, 142–143
treatment considerations in, 139–141
treatment failure with, sources of, 143
and wound healing, 113–115
for cancer, 25–26
Radiography, as diagnostic imaging modality, 186, 188
Radiotherapy, adjunct, principles of, 133–148. See also Radiation therapy.
Regional analgesia, for pain, in surgical oncology patient, 91
Regional lymph node, clinical management of, 151–167. See also Lymph node(s).
Renal tumors, diagnostic imaging of, 198
Respiratory emergency, as oncologic surgical emergency, 211–213
  clinical presentation and diagnosis of, 211–212
  pathophysiology of, 211
surgical therapy and aftercare of, 212–213
Rhinocscopy, oncologic applications of, 178–180

Sanctuary sites, and chemotherapy failure, 138
Sarcoma, soft tissue, adjunct radiation therapy for, 145–146
Simultaneous chemotherapy, 136
Skull, osteosarcoma metastasis to, scintigram of, 193
Small intestine, endoscopy of, oncologic applications of, 174–176
  infection of, in surgical oncology patient, 84
Soft tissue sarcoma, adjunct radiation therapy for, 145–146
Somatostatin, for insulinoma, 57
Spinal cord, diagnostic imaging of, 189–191
Spleen, diagnostic imaging of, 196–198
  fine-needle biopsy of, 36
Staging, preoperative, in surgical oncology, 99–100, 108, 226
Stomach, endoscopy of, oncologic applications of, 172–174
Strength, in observational studies, 12
Streptozotocin, for insulinoma, 57
Surgery, as cancer therapy, 24–25
Surgical margins, in oncologic surgery, 226
Surgical oncology, 97–110
  aftercare in, 107–109
  attitudes in, 227
  complication management in, 98
  emergencies in, 98
  future direction of, 229–230
  goals in, 97–99
  infection in, pharmacological management of, 77–96
  past progress in, 227
  patient preparation in, 101
  planning in, 99–101
  present status of, 228–229
  science of, 225–230
  surgical margins in, 106–108
  surgical technique in, 101–106
  tissue seeding and wound protection in, 104–105
  TNM staging system in, 99–100
  treatment of metastases in, 99
  wound reconstruction in, 105–106
Suture material, in oncologic surgery, 105

Temporality, in observational studies, 12
Thoracic mass, diagnostic imaging of, algorithm for, 194
  fine-needle biopsy of, 36–37
Thoracic surgery, in oncology patient, infection with, 84
Thoracic wall defects, repair of, in oncology patient, 106
Thorax, canine, lymph nodes of, 153–154
diagnostic imaging of, 194–195
  lymphocenters of, 159
Thrombocytopenia, as paraneoplastic syndrome, perioperative management of, 48–51
Thyroid, carcinoma of, scintigram of, 201
diagnostic imaging of, 200–202
Thyrotoxicosis, as paraneoplastic syndrome, perioperative management of, 58–59
Tissue flaps, in surgical oncology, 105
Tissue grafts, in surgical oncology, 106
Tissue seeding, in surgical oncology, 104–105
Torso, lymphocenters of, 158
Trachea, endoscopy of, oncologic applications of, 177
Transdermal analgesia, for pain, in surgical oncology patient, 90
Transforming growth factor beta, for impaired wound healing, 120–121
Tricyclic antidepressants, for chronic pain, in surgical oncology patient, 93–94
Tumor(s), effect on nutritional status, 64–73
fine-needle biopsy of, 37
heterogeneity of, 233
circumvention of, 240
metastases of, 231–247
cascade of, 233–235
circumvention of, 240
control vs eradication of, 239–241
microscopic, implications of, 237
pattern and organ preference in, 236–237
treatment of, obstacles to success in, 238
timing of, 238–239
progression of, 232–233
prometastatic phenotypes in, expression of, 235–236
Tumor-related factors, and wound healing, 115
Tumor volume, increase in, and chemotherapy failure, 138
and radiation therapy failure, 143

Ultrasonography, as diagnostic imaging modality, 186–187
Urinary tract surgery, in oncology patient, infection with, 85
Urogenital oncologic emergency, 215–217
clinical presentation and diagnosis of, 216
pathophysiology of, 215
surgical therapy and aftercare of, 216–217

Urogenital tract, diagnostic imaging of, 198

Veterinary medicine, imaging modalities used in, 186
Vinca alkaloids, effects on wound healing, 117–118

Wound, in surgical oncology, environment of, 78
lavage of, 105
protection of, 104–105
reconstruction of, 105–106
Wound healing, impaired, 111–131
basic fibroblast growth factor for, 124
chemotherapy and, 116–119
clinical perspective on, 124–126
epidermal growth factor for, 121–123
pharmacologic modulation of, 120–124
platelet-derived growth factor for, 123–124
transforming growth factor beta for, 120–121
in cancer catabolism, 67
models to study, 113
multifactorial nature of, 113–115
concurrent systemic diseases, 115
nutritional status, 115
radiation therapy, 113–115
tumor-related factors, 115
physiology of, 111–112
