DISORDERS OF THE FELINE LOWER URINARY TRACT I

INDEX

Note: Page numbers of article titles are in boldface type.

Acid-base homeostasis, urinary, 363–364
Alkaline tide, urinary, postprandial, 366–367
Alkalization, of urine, for fungal infections of feline lower urinary tract, 312–314
Alpha-adrenergic blockers, for detrusor-sphincter dyssynergia, 333
Amitriptyline, for feline interstitial cystitis, 324
Ammonium urate uroliths, feline, 219–220
Amphotericin B, for fungal infections of feline lower urinary tract, 313–314
Antibacterial drugs, for feline urinary tract infections, 301

Bacterial infections, of feline urinary tract, 297–304
antibacterial drugs for, 301
diagnosis of, 299–300
occurrence of, 297–299
outcome in, 302–303
prevention of, 303
treatment of, 301–302
with urethral obstruction, 261
Base excess, urinary, calculation of, 366
Bethanechol chloride, for detrusor-sphincter dyssynergia, 333
Bezoar formation, feline, diagnosis of, 310–311
Biologic behavior, of feline lower urinary tract diseases, 207–215
Bladder, feline, function of, 186
Bladder emptying, abnormality of. See Detrusor-sphincter dyssynergia.
Blood clot, of urinary bladder, double contrast cystogram of, 414
Bovine herpesvirus-4 (BHV-4), role in feline urinary tract infections, 283–286
Brainstem denervation, feline, and detrusor-sphincter dyssynergia, 193
Calcium oxalate crystalluria, feline, 376–380
photomicrograph of, 378–379
Calcium oxalate urethral plug(s), characteristics of, 251
Calcium oxalate uroliths, feline, 220–223
prototype of, 221
risk factors associated with, 222
Calcium phosphate crystalluria, feline, 380–381
Calcium phosphate urethral plug(s), characteristics of, 251
Calcium phosphate uroliths, feline, 223–224
Calicivirus, feline, role in urinary tract infections, 286–288
Colourocytic fistula, feline, 271–272
Continence, feline, 187
loss of, pudendal denervation and, 191, 193
Crystal(s), urinary, feline, identification of, 375–391
habit, 375
number, 375–376
size and aggregation, 376
Crystallography, equipment for, optical, 398
spectroscopic, 399
Crystalluria, feline, 369–391
amorphous urate, 387–388
calcium hydrogen phosphate dihydrate, 372
calcium oxalate, 376–380
calcium phosphate, 380–381
common crystal characteristics, 373
cystine, 371, 381–382
factors influencing urinary crystal formation, 370–374
combinations of crystals, 374
diagnostic and therapeutic agents, 374
diet, 373–374
Crystalluria (Continued)
in vivo and in vitro variables,
370–371
preservation of sample, 372
refrigeration, 373
urine pH, 371–372
magnesium ammonium phosphate,
382–386
struvite, 382–386
urate ammonium, 387–388
uric acid, 388–389
xanthine, 389–391
Cystectomy, feline, healing of, 201
Cystine crystalluria, feline, 381–382
Cystine uroliths, feline, 225,
272–274
Cystitis, hemorrhagic, feline, viruses associated with, 282
interstitial, feline, 171, 317–326. See also Interstitial cystitis.
Cystocentesis, feline, 353–361
contraindications to, 355–356
diagnostic and therapeutic indications for, 353–355
equipment for, 356
postprocedure care, 359
postprocedure complications, 359–360
preprocedure considerations, 357
site of, 356–357
technique of, 357–359
Cystography, double contrast, of feline lower urinary tract, 403–405
complications of, 408
intraluminal filling defects in, radiographic features of,
412–413
normal, 404
pitfalls of, 404
Cystoliths, feline, double contrast cystogram of, 407
urethrocystogram of, 407
Cystometrogram, feline, 186
in detrusor-sphincter dyssynergia diagnosis, 331
Cystoscopy, in feline interstitial cystitis, 320
Cystostomy, feline, healing of, 200

Dantrolene, for detrusor-sphincter dyssynergia, 332–333
Death, with urethral obstruction, 263–264
Detrusor-sphincter dyssynergia, 327–338
case study of, 334–336
clinical course in, 335–336
clinical signs of, 329
definition of, 327
diagnostic plan for, 329–331
feline brainstem denervation and, 193
history in, 334
laboratory tests in, 334–335
pathophysiology of, 327–328
physical examination in, 334
treatment plan for, 331–334
Diazepam, for detrusor-sphincter dyssynergia, 332
Diet, in feline crystalluria, 373–374
influence on feline urine pH, measurement of, 363–368
Dietary moisture, and sterile feline struvite uroliths, 227
Dysuria, feline, contrast radiograph of, 406
diagnostic algorithm for, 348
diagnostic error in, 349–350
disorders in, 176
nonobstructive, and urethral plug formation, 246
radiographic findings in, 177, 349
survey radiograph of, 406
lateral, 402–403
test results in, 214

Environmental stress, reduction of, for feline interstitial cystitis, 324

Feline calicivirus (FCV), role in urinary tract infections, 286–288
Feline crystalluria, detection and interpretation, 369–391. See also Crystalluria.
Feline urologic syndrome, 323
definition of, 169
Flaccid bladder, feline total reflex denervation and, 193
Flucytosine, for fungal infections of feline lower urinary tract, 313
Fruit Jello hypothesis, of feline lower urinary tract disorders, 175–177
Fungal infections, of feline lower urinary tract, 309–315
diagnosis of, 310–312
clinical syndromes, 310–311
urinalysis, 311
urine culture, 311–312
pathogenesis of, 309–310
prevalence of, 309
prognosis of, 312
therapy for, 312–314
Funguria, feline, diagnosis of, 310

Glomerular filtration rate, in urethral obstruction, 257–258
Glycosaminoglycan layer, urothelial, defect in, in feline interstitial cystitis, 322
Hematuria, feline, diagnostic error in, 
346–347, 349–350

disorders in, 176
gross, probable localization of, 345
in interstitial cystitis, 319
radiographic findings in, 177, 349
test results in, 214

Hemorrhagic cystitis, feline, viruses associated with, 282

Hydrochloric acid, urinary, source of, 365

Hyperkalemia, with urethral obstruction, 263

Hypotonic bladder, feline sympathetic denervation and, 193

Interstitial cystitis, feline, 171, 317–326
clinical signs of, 319
criteria for, 318
definition of, 318
diagnosis of, 317
diagnostic error in, 350
histologic features in, 320
recurrence of, 322

Itraconazole, for fungal infections of feline lower urinary tract, 314

Ketaconazole, for fungal infections of feline lower urinary tract, 314

Kidney(s), feline, anatomy of, 181
in urethral obstruction, 257–260
Kidney cells, feline calicivirus-infected, transmission electron micrograph of, 289

Leukocytes, urinary, feline, diagnostic error in, 349

Lower urinary tract. See also Urinary tract.
canine, congenital and hereditary anomalies of, 266
feline, applied anatomy and physiology of, 181–196
anatomy, 181–185
function, 185–188
continence, 187
filling, 185–187
micturition, 187–188
innervation, 188–193
applied embryology of, 265–267
congenital and hereditary anomalies of, 266
developmental physiology of, 267
diagnostic imaging of, 401–415
antegrade urethrocystography, 405
double contrast cystography, 403–405

survey radiography, 401–403
diseases of, 265–279
algorithm for, 405, 408–411
biologic behavior of, 207–215
cystocentesis for, 353–355
prevalence of, 339–340
role of Mycoplasma and Ureaplasma in, 305–308

disorders of, 169–179
clinical relevance of terminology, 178
confirmed causes of, 170
diagnosis of, 339–352

avoiding common errors in, 346–352
case study, 350–352
data needed for, 340–344
minimum, 342
problem-specific, 343–344
therapeutic-specific, 344
ensuring accuracy of, 346
diagnostic testing of, results of, 350
fruit Jello hypothesis, 175–177
incidence and proportional morbidity, 174–175
interstitial cystitis, 171
manifestations of, 177
prevalence of, 340–341
urethral plugs, 174
urolithiasis, 172–174
female, 182

healing responses of, 197–206
phases of, 197–199
lag phase, 197–198
log phase, 198
maturation phase, 198–199
ureter, 199–200
urethra, 202–204
urinary bladder, 200–202

hematuria and dysuria, 213–214
histologic features of, 184–185
infections of, 208–210
bacterial, 208, 297–304. See also Bacterial infections.
consequences of, 208–209
fungal, 209–210, 309–315. See also Fungal infections.
parasitic, 210
spontaneous recovery and recurrence of, 208–210
viral, 209, 281–296. See also Viral infections.

male, 183
neurotransmitters of, 190–191
ultrasonography of, 412–414
urethral plugs, 212–213
urocystolithiasis, 211–212
vesicourachal diverticula of, 210–211

INDEX

419
Magnesium ammonium phosphate crystalluria, feline, 382-386
photomicrograph of, 380
scanning electron micrograph of, 377
Magnesium ammonium phosphate urethral plug(s), characteristics of, 249
Magnesium ammonium phosphate uroliths, formation of, risk factors associated with, 227
Magnesium crystals, in feline urine sediment, 385
Matrix urethral plugs, characteristics of, 251
Micturition, feline, 187-188
dysfunction of, with urethral obstruction, 261
Micturition center, pontine, location of, 192
Mycoplasma, role in feline lower urinary tract disease, 305-308

Neural disorders, of feline urinary tract, 191
Neurogenic inflammation, effect on urinary bladder, 321
Nucleation, in urolith formation, 246

Optical crystallography, equipment for, 398
Organic acids, urinary, source of, 365

Pelvic plexus, feline, innervation of, 188-193
Phenoxybenzamine, for detrusor-sphincter dyssynergia, 332
Phimosis, feline, 277-278
Phosphate crystals, feline, photomicrograph of, 380
Phosphoric acid, urinary, source of, 365
Pollakiuria, feline, diagnostic algorithm for, 348
Pontine micturition center, location of, 192
Postobstructive diuresis, with urethral obstruction, 261
Pudendal denervation, feline, and loss of continence, 191, 193
Pudendal neurectomy, bilateral, for detrusor-sphincter dyssynergia, 333
Purine urethral plugs, characteristics of, 251

Reflex denervation, total, feline, and flaccid bladder, 193
Renal blood flow, in urethral obstruction, 257-258
Renal failure, intrinsic, with urethral obstruction, 261, 263
Renal tubular cast, photomicrograph of, 247

Spectroscopy, of crystals, equipment for, 399
Spinal dysraphism, feline, 277
Spino-bulbo-spinal reflex pathway, feline, 191-193
Stranguria, feline, lateral survey radiograph of, 402-403
vaginourethrogram of, 330
Struvite crystalluria, feline, 382-386
Struvite urethral plug(s), feline, and male urinary obstruction, 245
characteristics of, 234-235
Struvite uroliths, feline, infection-induced, 230
sterile, 225-230
common characteristics of, 229
experimental studies of, 225-227
naturally occurring, 228
Sulfuric acid, urinary, source of, 365
Survey radiography, of feline lower urinary tract, 401-403
Sympathetic denervation, feline, and hypotonic bladder, 193
Syncytia-forming virus (SFV), feline, role in urinary tract infections, 283

Tubular function, in urethral obstruction, 258-260

Urachus, anomalies of, 268-271
Urate crystalluria, feline, amorphous, 387-388
Urate uroliths, feline, 274
Ureaplasma, role in feline lower urinary tract disease, 305-308
Ureter(s), feline, anatomy of, 181
healing of, 199-200
in urethral obstruction, 257-260
Urethra, feline, agenesis/hypoplasia of, 274-275
anatomy of, 182-183, 185
genital and hereditary anomalies of, 274-278
ectopic urethra, 275-276
persistent uterus masculinus, 276
phimosis, 277-278
spinal dysraphism, 277
urethral agenesis/hypoplasia, 274–275
urethral stricture, 276
urethroliths, 276
urethoroctal fistula, 275 ectopic, 275–276
healing of, 202–204
obstruction of, 255–264. See also Urethral obstruction.
structure of, 276
pathology of, in urethral obstruction, 260
Urethral obstruction, feline, 255–264
abdominal survey radiograph of, 256
abdominal ultrasonography of, 256
clinical consequences of, 257
clinical signs of, 255–256
complications of, 261–264
bacterial infection, 261
death, 263–264
hyperkalemia, 263
intrinsic renal failure, 261, 263
midhurition dysfunction, 261
postobstructive diuresis, 261
definition of, 255
diagnostic error in, 347
electrocardiograms in, 262–263
lateral survey radiograph of, 402
male, causes of, 244–245
mechanical, causes of, 329
pathology of, 260
pathophysiology of, 257–260
kidneys and ureters, 257–260
urinary bladder and urethra, 257
struvite crystals in, 383
urinary potassium excretion in, 260
urine acidifying defect in, 259–260
Urinary tract. See also Lower urinary tract.
exstrophy of, 268
feline, bacterial infections of, 297–304.
See also Bacterial infections.
fungal infections of, 309–315. See also Fungal infections.
parasitic infections of, 210
viral infections of, 281–296. See also Viral infections.
Urination, feline, 187–188
Urine, acidification of, 363–367
  acid-base homeostasis, 363–364
  estimating urinary pH, 365–366
  normal urine pH, 367
  postprandial alkaline tide, 366–367
  sources of acids, 365
  alkaline, and sterile feline struvite uroliths, 226
Urine acidifying defect, in urethral obstruction, 259–260
Urine concentration defect, in urethral obstruction, 259
Urine culture, for feline urinary tract infections, bacterial, 299–300
  implications of, 302
  fungal, 311–312
Urine pH, estimation of, 365–366
  feline, measurement of dietary influence on, 363–368
  in feline crystalluria, 371–372
  testing procedures for, 367–368
Urine sediment, feline, magnesium ammonium phosphate crystals in, 385
  magnesium crystals in, 385
  struvite crystals in, 384, 386
Urocyst, feline, congenital and hereditary anomalies of, 267–274
  colourocystic fistula, 271–272
  ectopic uterine horns entering the urinary bladder, 272
  urachal anomalies, 268–271
  urinary bladder agenesis/hypoplasia, 267
  urinary tract exstrophy, 268
  urocytoliths, 272–274
Urocystolith(s), feline, 272–274
  solitary, 270
  struvite crystals in, 383
Urocystolithiasis, feline, 211–212
  recurrence of, 212
  sequel to, 211–212
  spontaneous recovery from, 212
Urolith(s), analysis of, 393–400
  methods of, 396–399
  quantitative, 397
  qualitative vs, 398
  reasons for, 393–396
  reporting of results, 399–400
  retrieval for, 395
  submission for, 395–396
  areas of, 400
cross-section of, 394
  crystalline substances detected in, 394
  definition of, 393
  feline, abdominal radiograph of, 352
    age distribution in, 273
    ammonium urate, 219–220
    calcium oxalate, 220–223
    calcium phosphate, 223–224
    contrast radiograph of, 406
    cystine, 225, 272–274
    diagnostic error in, 347–349
    epidemiology of, 217–219
    mineral composition of, 173, 218
    radiodense vs radiolucent, 351
    struvite, 225–230
    urate, 274
Urolithiasis, feline, 172–174
  and male urethral obstruction, 246–247
  etiology and pathology, 217–232
  without crystalluria, factors influencing, 374
Uropathogens, feline, 176
Urothelium, feline, role in urethral healing, 202
Uterine horns, ectopic, feline, 272
Uterus masculinus, persistent, feline, 276

Vesicourachal diverticula, feline, 210–211, 268–271
Viral infections, of feline urinary tract, 281–296
  consequences of, 282–283
  diagnosis of, 288–291
    DNA/RNA hybridization for, 290
    laboratory, 291
    PCA assays for, 290–291
    viral isolation for, 289
    future directions in, 292–293
    role of bovine herpesvirus–4 (BHV–4), 283–286
    role of feline calicivirus (FCV), 286–288
    role of feline syncytia-forming virus (SFV), 283
    treatment of, 292
Xanthine crystalluria, feline, 389–391
